This volume contains the General Report and 20 National Reports covering Canada, US, Japan, Korea, India and a number of European countries (Austria, France, Germany, UK, Spain etc). The General Report was prepared on the basis of National Reports. The

national reporters not only describe the existing legal framework, but also provide answers for up to 12 hypothetical cases concerning international jurisdiction, choice-of-law and recognition and enforcement of foreign judgments in multi-state IP disputes. Based on their answers the main differences between legal systems as well as the shortcomings of the cross-border enforcement of IP rights are outlined in the General Report. The Reports in this volume analyse relevant court decisions as well as recent legislative proposals (such as the ALI, CLIP, Transparency, Waseda and Korean Principles). This book is therefore a significant contribution to the existing debate in the field and will be a valuable source of reference in shaping future developments in the cross-border enforcement of IP rights in a global context. Over the centuries, scholars have studied how individuals, institutions and groups have used various rhetorical stances to persuade others to pay attention to, believe in, and adopt a course of action. The emergence of public relations as an identifiable and discrete occupation in the early 20th century led scholars to describe this new iteration of persuasion as a unique, more systematized, and technical form of wielding influence, resulting in an overemphasis on practice, frequently couched within an American historical context. This volume responds to such approaches by expanding the framework for understanding public relations history, investigating broad,

conceptual questions concerning the ways in which public relations rose as a practice and a field within different cultures and countries at different times in history. With its unique cultural and contextual emphasis, *Pathways to Public Relations* shifts the paradigm of public relations history away from traditional methodologies and assumptions, and provides a new and unique entry point into this complicated arena. checkride or airline interview. Surfing the Past McGraw-Hill/Irwin In the last decades, progress in the field of pre-service and in-service teacher education has been evident. Despite the developments of curriculum programs, models and designs, various challenges are shaping the field. Models of teacher education are usually presented as 'research-based', but related research is often invisible or fragmented. The 'support for teachers' and the 'improvement of instruction' are only loosely coupled and their interdependence is not highlighted. These challenges were the impetus to initiate this publication. Individual approaches, models or designs of pre-service and in-service teacher education developed by the authors (action research, video clubs, lesson studies, and others) are introduced and their impact and shortcomings for

further development are specified. In the concluding chapter, a reflective discussion across individual approaches to reveal particular issues that are shaping the field is provided. Practitioners as well as researchers in the field of teacher education can benefit from this book.
