...

What is 'Cloud Computing'.
Cloud computing is a method
for delivering information
technology (IT) services in
which resources are retrieved

from the Internet through web-based tools and applications, as opposed to a direct connection to a server. Rather than keeping files on a proprietary hard drive or local storage device,...

Cloud Computing: Can It Be a Solution for Your Marketing ...

Cloud computing is a more efficient way of delivering computing resources. With cloud computing, software and service environments are subscription-based — users pay a monthly fee instead of buying licenses. Software and platforms are managed by the providers and are updated continuously for maximum

performance and security. Cloud Solutions from Cisco - Cisco Cisco brings together networking, security, analytics, and management. We deliver cloud solutions that span your multicloud world, from your on-premises environment to your multiple cloud providers, and from your applications to your infrastructure. Our cloud solutions help you manage a private, hybrid, or public cloud, or all of the above.

Cloud computing - Wikipedia

Cloud computing is the on-demand availability

of computer system resources, especially data storage and computing power, without direct active management by the user. The term is generally used to describe data centers available to many users over the Internet. Large clouds, predominant today, often have functions distributed over multiple locations from central servers.
