Brainiacs on the prowl for challenging fun will find everything they're looking for in these cunning conundrums. Puzzle master Terry Stickels has created a mind-melting collection filled with hundreds of diverse and fiendishly tricky problems—including wordplay, math, analytic reasoning, logic, visual dilemmas, and code breaking. Figure out the next number in a series, find hidden phrases, and determine what a three-dimensional object would look like from two-dimensional drawings. Every puzzle provides a workout that strengthens mental muscles. And while these brainteasers do require concentration, they don't demand any special training or high-level math skills. A little practice, patience, and imagination are all it takes.

School and public libraries often provide programs and activities for children in preschool through the sixth grade, but there is little available to young adults. For them, libraries become a place for work—the place to research an assignment or find a book for a report—but the thought of the library as a place for enjoyment is lost. So how do librarians recapture the interest of teenagers? This just might be the answer. Here you will find theme-based units (such as *Cartoon Cavalcade*, *Log On at the Library*, *Go in Style*, *Cruising the Mall*, *Space Shots*, *Teens on TV*, and 44 others) that are designed for young adults. Each includes a display idea, suggestions for local sponsorship of prizes, a program game to encourage participation, 10 theme-related activities, curriculum tie-in activities, sample questions for use in trivia games or scavenger hunts, ideas for activity sheets, a bibliography of related works, and a list of theme-related films. The units are highly flexible, allowing any public or school library to adapt them to their particular needs.

Mathematical History Morgan James Publishing

La matiere de Bretagne is a name given collectively to the body of medieval literature and legendary material associated with Great Britain; especially King Arthur and his knights and their association to the Grail. It is the link between the Grail stories and the legends of both King Arthur and Joseph of Arimathea

and their connection to Glastonbury, the Island of Avalon, which is central to this investigation. The legend of King Arthur at Glastonbury is primarily derived from Geoffrey of Monmouth's mention of King Arthur's arrival at the Island of Avalon after his fatal fight with Mordred. It is the later bogus disinterment of King Arthur's manufactured grave at Glastonbury, which establishes Glastonbury's synonymy with Avalon. This volume sets out to show how the abbot of Glastonbury, Henry Blois, used Geoffrey of Monmouth as a nom de plume and concocted the epic tale from Brutus to Arthur which is now known as the 'History of the Kings of Britain' and was responsible for composing the Prophecies of Merlin"

Freedom to Live: The Robert Hartman Story: What am I here for in the world? Why do I work for this organization? What can this organization do to help me fulfill my meaning in the world? How can I help this organization help me fulfill my meaning in the world? In the course of answering these questions we are taken on a personal exploration of the systemic, extrinsic, and intrinsic dimensions of value as they apply to our individual lives. The purpose of this exercise is to help each of us in our search for meaning and in our endeavor to prioritize our values as we make decisions. Dr. Hartman also explores our spiritual nature by applying his thinking to the intrinsic realm in religion. Robert Hartman's vision was to give us the means to recognize and fulfill "the good" within each of us, thereby enriching our lives. By applying these principles on a broader scale, we may also enrich our world and make it a place of more "goodness" and peace. When the light of formal axiology is cast upon our world, the elements involved in making particular decisions are revealed with a kind of value clarity previously unknown. This Second Edition of *Freedom to Live: The Robert Hartman Story* includes many minor editorial improvements, a new and much expanded table of Contents, a much more detailed Index, and new photographs. Many thanks to Stacey McNutt for the new photos she contributed to this Second Edition--Numbers 1, 5, 6, and 11. Many thanks also to Rodopi, Amsterdam - New York, its original publisher, for returning the rights to this book to the Robert S. Hartman Institute.
