Kawasaki - Sunrise to Z1 Clymer
Publications

Kawasaki Z1, Z/KZ900 & Z/KZ1000 is for all
owners and enthusiasts of the legendary
Kawasaki Z1 900, Z/KZ900 and Z1000 built
between 1972 and 1980. The book covers the
complete restoration of a 1976 KZ900, from

the sourcing of the bike to its completion as a
fully restored machine. Every area is covered
starting with advice on the different models,
spares availability, and where best to source a
bike to restore. Every area of the restoration is
then covered in full detail including the engine,
frame, gearbox, wheels, suspension and forks,
brakes, ancillaries, bodywork and electrics,
accompanied by hundreds of clear color photos
to illustrate the text. Additional work on a 1974
Z1A model adds complementary information.
What really sets this manual apart, however, is
the style in which it is written: not as some dull
and distant workshop manual but in a friendly,
humorous manner by an enthusiast of many
years who is able to involve and entertain the
reader, as well as guiding them through the
restoration process. This is the third restoration
guide from Chris Rooke, whose previous works
have been a massive hit with mechanics,
enthusiasts and restorers throughout the world.

Each Haynes manual provides specific and detailed instructions for performing everything from basic maintenance and troubleshooting to a complete overhaul of the machine, in this case the Suzuki DL650 V-Strom & SFV650 Gladius, model years 2004 through 2013. Do-it-yourselfers will find this service and repair manual more comprehensive than the factory manual, making it an indispensable part of their tool box. A typical Haynes manual covers:

general information; troubleshooting;
lubrication and routine maintenance; engine top end; engine lower end; primary drive, clutch and external shift mechanism; transmission and internal shift mechanism; engine management system; electrical system; wheels, tires and drivebelt; front suspension and steering; rear suspension; brakes; body, and color wiring diagrams. An index makes the manual easy to navigate.

In 1974, Honda took the wraps off a 1000cc flat four with shaft drive and water cooling, and the Honda Gold Wing was born. Renowned

photographer Malcolm Birkitt has included coverage of Honda's dynamic, new Valkyrie in this update of his best-selling Honda Gold Wing title, as well as examining all the changes in the Gold Wing since 1995. Included are intriguing early design sketches and portraits by Honda's designers and engineers.

An award-winning scientist offers his unorthodox approach to childrearing:

“ Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions ” (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you ' re like many parents, you might ask family and friends for advice when faced

with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages

parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America’s premier suspension specialist, makes the art

and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede’s wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid’s, handle like a pro’s. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension’s condition. He outlines testing procedures that will help you gauge how well you’re improving your suspension, along with your riding. And, if you’re inclined to perfect your bike’s handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help

you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

Dirt Rider magazine publishes monthly one-page riding technique features. Emap magazines survey their readers every month, and the survey results show that bike tests rank first and riding techniques second. Dirt Rider presents these tip features by showing a well-known pro rider going step-by-step through a difficult obstacle. This book features the last five

years of these motocross riding techniques in one volume.

War related separations challenge military families in many ways. The worry and uncertainty associated with absent family members exacerbates the challenges of personal, social, and economic resources on the home front. U.S. military operations in Iraq and Afghanistan have sent a million service personnel from the U.S. alone into conflict areas leaving millions of spouses, children and others in stressful circumstances. This is not a new situation for military families, but it has taken a toll of magnified proportions in recent

times. In addition, medical advances have prolonged the life of those who might have died of injuries. As a result, more families are caring for those who have experienced amputation, traumatic brain injury, and profound psychological wounds. The Department of Defence has launched unprecedented efforts to support service members and families before, during, and after deployment in all locations of the country as well as in remote locations. Stress in U.S. Military Families brings together an interdisciplinary group of experts from the military to the medical to examine the issues of this critical problem. Its goal is to review the factors that contribute to stress in military families and to point toward strategies and policies that can help. Covering the major topics of parenting, marital functioning, and the stress of medical care, and including a special chapter

on single service members, it serves as a comprehensive guide for those who will intervene in these problems and for those undertaking their research.
