Members of the naval service will find that at all points in their careers they can expect to be involved to some extent in the planning and execution of official ceremonies and social events. Protocol is a code of established guidelines on proper etiquette and precedence which, when followed, lays the foundation for a successful event. From this foundation, the host should consider the facets which make a particular situation unique, and from there, use imagination to design a memorable occasion. The most important consideration in planning should always be the comfort of one's guests. A clever host/hostess is able to reach a proper mixture of protocol and common sense that will enable guests to enjoy themselves completely. If this is accomplished, an event is truly successful.

Tactical Combat Casualty Care (TCCC) has saved hundreds of lives during our nation's conflicts in Iraq and Afghanistan. Nearly 90 percent of combat fatalities occur before a casualty reaches a medical treatment facility.

Therefore, the prehospital phase of care is needed to focus on reducing the number of combat deaths.

However, few military physicians have had training in this area and, at the onset of hostilities, most combat medics, corpsmen, and pararescue personnel in the U.S. military have been trained to perform battlefield trauma care through civilian-based trauma courses. These courses are

not designed for the prehospital combat environment and do not reflect current practices in the area of prehospital care. TCCC was created to train Soldiers and medical personnel on current best practices for medical treatment from the point of injury to evacuation to Role 3 facilities

HVAC Training 101 is a site visited by over 100,000 enthusiasts monthly, who are interested in becoming HVAC technicians. The site initially began as the passion project of a retired HVAC technician.

The site quickly gained popularity, building a strong community of aspiring HVAC technicians. Currently, it is managed by a team of ex-HVAC technicians with decades of experience in the industry. Head over to HVACTraining101.Com to learn more. We began by writing about how to become certified as an HVAC technician. With rules and certifications varying for each state, it was a challenging task.

We had a few friends in other states help us out, but for some states, we had to dig really deep to find the information needed. Our audience at the time was very happy with the information we provided. At this point, we started getting many questions about EPA 608 certification. Once you get the education and experience needed to become a technician, prospective employers will ask for certification to handle refrigerants. When we started writing about how to become certified, viewers again requested we write a study guide to help them prepare for the 608 exams. The study guides out there were dense and had much more information than was needed to pass the test. This inspired us to embark on a journey to write the simplest study guide for the EPA 608 exam, which would still cover all the necessary information. We hope we have achieved our intended objective. The journey to becoming an HVAC technician can be long and arduous. We congratulate you on taking this path and wish you the best in cracking the EPA 608 exam.

Meet and exceed educational requirements and expectations for Paramedic training with The Professional Paramedic Series. Based on the new National EMS Education Standards, this economical three-volume series equips you and your learners with the resources necessary for both paramedic certification and re-certification. Comprehensive, using a case-based methodology, while remaining street-friendly, each volume in the series walks learners through the skills and concepts critical to the job of a Paramedic. The framework of each book is practical in approach: introducing principles, skills and terminology; presenting a typical case; walking through critical response steps; and again reviewing key concepts to ensure understanding for successful application on the job. Volume III: Trauma Care & EMS Operations highlights special response considerations and a broad range of operational medical topics to prepare readers with the complete spectrum of knowledge required to succeed as a Paramedic. Topics include traumatic brain injury, environmental medicine, specialty care transport, triage systems, and much more. This book follows up on the fundamental information covered in Volume I: Foundations of Paramedic Care and the application of skills in emergency situations in Volume II: Medical Emergencies, Maternal Health & Pediatrics. Practical and reader-friendly, each volume includes a full color design with detailed photos, graphics and step-by-step skill sequences to ensure your learners are fully prepared for the responsibilities, adventures, and challenges of the paramedic profession. The CMC Rope Rescue Technician Manual is the standard text for many fire departments, rescue teams and training programs across the country. The sixth edition reflects the latest advances in technology, equipment and procedures available to rescue professionals. Its concise style clearly sequences and describes the elements of rope rescue in a way that is both detailed and easy to understand. Well-drawn diagrams depict each recommended stage of rope rescue operations. The result is a very useful tool for rescue professionals at every skill level. CMC has been an innovator in the emergency services industry for over 40 years. In 1978 Jim Frank endeavored to make rescue safer and more efficient by founding California Mountain Company (later CMC Rescue, now CMC), a company that sourced and supplied specialized life safety equipment to the rescue community. Today, CMC is a globally recognized, employee-owned company that proudly manufactures many products in our ISO-certified Santa Barbara facility, and provides specialized education and training for rescue and rope access professionals. CMC recommends that all rope technicians seek qualified, hands-on instruction from a trusted source. The CMC School provides this type of training with a focus on learning-by-doing. Open enrollment and custom courses are available worldwide. For more information on CMC or the CMC School, visit [cmcpro.com](#).
