Implementing Mindfulness in Schools aims  
to provide practical, trustworthy and  
evidence-based guidance on developing  
mindfulness in schools and in the whole  
community who work and learn there. It  
attempts to bring some clarity to an area  
of education that is growing fast, and with  
very promising evidence and much  
enthusiasm from schools, but which can  
be confusing and is often riddled with  
misunderstandings. The guidance is based  
on: international scientific evidence of the  
outcomes of mindfulness in schools.  
international empirical research on  
implementing and embedding mindfulness  
in schools for teachers and students.  
advice from a range of experts, drawn  
from innovators in schools, programme  
developers, researchers and academics  
and contemplative practitioners. The

---

guidance is for a range of audiences: those who are actively working in the 3-18 UK education systems initiating, leading and developing practical work on in school settings, or policy mindfulness, with children and young people and the adults who work with them. The detail and application of the advice has a specifically UK focus. those from other parts of the world who are working in this area, and who should find the principles and the evidence base on outcomes and implementation relevant to their situation. those programme makers who are developing and leading mindfulness courses and practices specifically for use in schools or with young people. those who are working in related areas such as compassion, mental health, emotional and social education, personal development and reflective learning who want to

explore what policy and practice around mindfulness has to offer in the joint effort to make schools more humane and effective places. those who are broadly interested in what is happening with mindfulness in schools.
