Uptime describes the combination of activities that deliver fewer breakdowns, improved productive capacity, lower costs, and better environmental performance. The bestselling second edition of Uptime has been used as a textbook on maintenance management in several postsecondary institutions and by many companies as the model framework for their maintenance management programs. Following in the tradition of its bestselling predecessors, Uptime: Strategies for Excellence in Maintenance Management, Third Edition explains how to deal with increasingly complex technologies, such as mobile and cloud computing, to support maintenance departments and set the stage for compliance with international standards for asset management. This updated edition reflects a far broader and deeper wealth of experience and knowledge. In addition, it restructures its previous model of excellence slightly to align what must be done more closely with how to do it. The book provides a strategy for developing and executing improvement plans that work well with the new values prevalent in today's workforce. It also explains how you can use seemingly competing improvement tools to complement and enhance

each other. This edition also highlights action you can take to compensate for the gradual loss of skills in the current workforce as "baby boomers" retire.

Implementing Mindfulness in Schools aims to provide practical, trustworthy and evidence-based guidance on developing mindfulness in schools and in the whole community who work and learn there. It attempts to bring some clarity to an area of education that is growing fast, and with very promising evidence and much enthusiasm from schools, but which can be confusing and is often riddled with misunderstandings. The guidance is based on: international scientific evidence of the outcomes of mindfulness in schools. international empirical research on implementing and embedding mindfulness in schools for teachers and students. advice from a range of experts, drawn from innovators in schools, programme developers, researchers and academics and contemplative practitioners. The guidance is for a range of audiences: those who are actively working in the 3-18 UK education systems initiating, leading and developing practical work on in school settings, or policy mindfulness, with children and young people and the adults who work with them. The detail and application of the advice has a specifically UK focus. those from other parts of the world who are working in this area, and who should find the principles and the evidence base on outcomes and implementation relevant to their situation. those programme makers who are developing and leading mindfulness courses and practices specifically for use in schools or with young people. those who are working in related areas such as compassion, mental health, emotional and social
