Regional health care databases are being established around the country with the goal of providing timely and useful information to policymakers, physicians, and patients. But their emergence is raising important and sometimes controversial questions about the collection, quality, and appropriate use of health care data. Based on experience with databases now in operation and in development, *Health Data in the Information Age* provides a clear set of guidelines and principles for exploiting the potential benefits of aggregated health data--without jeopardizing confidentiality. A panel of experts identifies characteristics of emerging health database organizations (HDOs). The committee explores how HDOs can maintain the quality of their data, what policies and practices they should adopt, how they can prepare for linkages with computer-based patient records, and how diverse groups from researchers to health care administrators might use aggregated data. *Health Data in the Information Age* offers frank analysis and guidelines that will be invaluable to anyone interested in the operation

of health care databases.

"Coding with Modifiers, 6th Ed, is the ultimate resource for modifier guidelines. This revised edition provides guidance on how and when to use modifiers in order to avoid costly payment delays and denials. Coding with Modifiers uses real-life modifier scenarios and medical records to guide correct CPT® and HCPCS modifier usage. Modifiers create clear, concise communications between the provider and payer, and are essential to the coding process. Clinical documentation improvement and other pertinent considerations highlight important clinical documentation improvements for each modifier and related best practices to ensure correct modifier

usage. Provides guidelines from CPT, CMS, third-party payers, and NCCI to explain how and when to use modifiers to avoid payment delays and denials"-- Medicare Claims Elsevier

Take your first step toward a successful career in medical coding with guidance from the most trusted name in coding education! From Carol J. Buck, the bestselling Step-by-Step Medical Coding is a practical, easy-to-use resource that shows you exactly how to code using all current coding sets. Practice exercises follow each 'step' of information to reinforce your understanding of important concepts. In-depth coverage includes reimbursement, ICD-10-CM, CPT, HCPCS, and inpatient coding, with an Evolve website that includes 30-day access to TruCode® Encoder Essentials. No other text so thoroughly covers all coding sets in one source! 30-day access to TruCode® Encoder Essentials (in addition to separate encoder practice exercises on the Evolve companion website) help you understand how to utilize an encoder. A step-by-step approach makes it easier to build skills and remember the material. UNIQUE! Real-world coding reports (cleared of any confidential information) simulate the reports you will encounter as a coder and help you apply coding principles to actual cases. Over 500 illustrations include medical conditions and procedures to help you understand the services being coded. Exercises, Quick Checks, and Toolbox features reinforce coding rules and concepts, and emphasize key information. Valuable tips and advice are offered in features such as From the Trenches, Coding Shots, Stop!, Caution!, Check This Out, and CMS Rules. UNIQUE! Four coding-question variations develop your coding ability and critical thinking skills, including one-code or multiple-code answers. Official Guidelines for Coding and Reporting boxes allow you to read the official guidelines wording for inpatient and outpatient coding alongside in-text explanations. UNIQUE! Coders' Index makes it easy to quickly locate specific codes. Sample Electronic Health Record screenshots in the appendix provide examples similar to the EHRs you will encounter in the workplace. Online practice activities on Evolve include questions such as multiple choice, matching, fill-in-the-blank, and coding reports. A

workbook corresponds to the textbook and offers review and practice with more than 1,200 theory, practical, and report exercises (odd-numbered answers provided in appendix) to reinforce understanding of medical coding. Available separately. Medical Coding Online uses animations, photographs, drawings, narrated slide shows, case-based exercises, pop-up definitions, and professional insights to reinforce coding concepts from the Step-by-Step text. Available separately. UPDATED content includes the latest coding information available, promoting accurate coding and success on the job. NEW and UNIQUE! Learning Objective Review questions are included at the end of each chapter. NEW! Chapter review application on Evolve lets you electronically assess your knowledge at the end of each chapter.

A Guide to the Medicare Requirements Aspen Publishers

For more than a generation haemodialysis has been the principal method of treating patients with both acute and chronic renal failure. Initially, developments and improvements in the system were highly technical and relevant to only a relatively small number of specialists in nephrology. More recently, as advances in therapy have dem

onstrated the value of haemofiltration in the intensive therapy unit and haemoperfusion for certain types of poisoning, the basic principles of haemodialysis have been perceived as important in many areas of clinical practice. In this volume, the potential advantages of bicarbonate haemo dialysis are objectively assessed, the technical and clinical aspects of both haemofiltration and haemoperfusion discussed and the continuing problems associated with such extra corporeal circuits analysed. All the chapters have been written by recognized experts in their field. The increasing availability of highly technical facilities for appropriately selected patients should ensure that the information contained in the book is relevant not only to nephrologists but to all practising clinicians. ABOUT THE EDITOR Dr Graeme R. D. Catto is Professor in Medicine and Therapeutics at the University of Aberdeen and Honorary Consultant Physician/Nephrologist to the Grampian Health Board. His current interest in transplant immunology was stimulated as a Harkness Fellow at Harvard Medical School and the Peter Bent Brighton Hospital, Boston, USA. He is a member of many medical societies including the Association of Physicians of Great Britain and Ireland, the Renal Association and the Transplantation Society.
