Bobby Monks is blowing the whistle on Wall Street, giving middle class Americans the low down on how they're being fleeced of their retirement money—and what they can do about it. Every month our financial statements arrive, and every month we glance at them, trying to understand, hoping that we'll come out ahead. But most of us have no idea what's really going on or the costs involved. According to Bobby Monks—who has been a banker and borrower, investor and entrepreneur—financial firms and money managers have complicated the investing process to keep us in the dark, profiting from our ignorance.

Having dealt with the financial sector throughout his career, Monks has seen it all. In *Uninvested*, he reveals how, when, and why the relationship between us and our money managers became corrupted—and what we can do to fix it. Monks shows how the system works not only against us as individuals but also against society at large. Without our knowledge or approval, our money is diverted into the pockets of CEOs and misappropriated, promoting business practices that contribute to economic inequality, political dysfunction, and environmental woe. Monks' experiences give him a unique perspective on how we got to this point. Drawing on original research and interviews with key figures such as Vanguard founder Jack Bogle, legendary investor Carl Icahn, and former congressman Barney Frank of the Dodd-Frank Act, Monks teaches us how to take back ownership and control of our money. As he writes: Even in the decades preceding the most recent downturn, very few investors enjoyed financial success equal to that of their

---

money managers. Given this, I have long wondered why investors don't pull their money out of the system en masse. I suspect that it is because most feel powerless. Unaware of the implications of their investments and unable to penetrate the excruciating complexity of the system that facilitates them, many seem to seek refuge in their money managers' aura of sophistication, pretense of competence, and projection of certainty. It seems to me that most investors are simply sleepwalking through the investing process. They have become uninvested. When we outsource our investing, we sacrifice control—but not responsibility. My goal in writing this book is to convince you that the best (and only) way to fix this broken system is to awaken a critical mass of engaged investors and recruit them to participate more fully in the investing process.

It's time to get off the beaten path. Inspiring equal parts wonder and wanderlust, Atlas Obscura celebrates over 700 of the strangest and most curious places in the world. Talk about a bucket list: here are natural wonders—the dazzling glowworm caves in New Zealand, or a baobab tree in South Africa that's so large it has a pub inside where 15 people can drink comfortably. Architectural marvels, including the M.C. Escher-like stepwells in India. Mind-boggling events, like the Baby Jumping Festival in Spain, where men dressed as devils literally vault over rows of squirming infants. Not to mention the Great Stalacpipe Organ in Virginia, Turkmenistan's 40-year hole of fire called the Gates of Hell, a graveyard for decommissioned ships on the coast of Bangladesh, eccentric bone museums in Italy, or a weather-forecasting invention that was powered by leeches, still on display in Devon, England. Created by Joshua Foer, Dylan Thuras and Ella Morton, ATLAS OBSCURA revels in the weird, the unexpected, the overlooked, the hidden and the mysterious. Every page expands our sense of how strange and marvelous the world really is. And with its compelling descriptions, hundreds of photographs, surprising charts, maps for every region of the world, it is a book to enter anywhere, and will be as appealing to the armchair traveler as the die-hard adventurer. Anyone can be a tourist. ATLAS OBSCURA is for the explorer.

Striking out on your own for the first time is exhilarating. But in a culture full of bad advice, predatory banks, and splurge-now-pay-later temptations, it can also be extremely dangerous—leading you to make financial decisions that could hurt you for years to come. Combine this with a slumped economy, mounds of student loans, and dubious examples from reality TV stars to politicians to your own parents, and it's no wonder so many twenty-somethings are struggling. Twenty-three-year-old Zac Bissonnette—the author of *Debt-Free U*—knows exactly what you're going through. He demystifies the many traps young people fall victim to in their post-college years. He offers fresh insights on everything from job hunting to buying a car to saving for retirement that will give you a foundation for a secure, stable, and happy life. In the process, he reveals why FICO scores are overrated, online job applications are a waste of time, car loans are for suckers, and credit card rewards are a scam. With detours

to discuss wine connoisseurs, Really Broke Housewives, and Lenny Dykstra, Zac shows you how to make better choices today so you can be richer, smarter (and better-looking!) for years to come.

In a world flooded and irradiated by a nearly forgotten cataclysm from generations passed, all that remains of civilization clings to life in two war-torn, city-sized submarines. For fifty years, the only peace between them had come from separation. Now, young council woman Ralla Gattley has uncovered mysteries that will bring these two factions face-to-face, initiating a series of events that will forever change their undersea world. She didn't expect to meet Thom Vargas, a bored fisherman and aspiring drunk who merely wants to climb one rung on the social ladder. Little did he know that single step may

well put the fate of the world in his hands.

WALL STREET JOURNAL  
BESTSELLER From Michael Dell, renowned founder and chief executive of one of America's largest technology companies, the inside story of the battles that defined him as a leader In 1984, soon-to-be college dropout Michael Dell hid signs of his fledgling PC business in the bathroom of his

University of Texas dorm room.

Almost 30 years later, at the pinnacle of his success as founder and leader of Dell Technologies, he found himself embroiled in a battle for his company's survival. What he'd do next could ensure its legacy—or destroy it completely. *Play Nice But Win* is a riveting account of the three battles waged for Dell Technologies: one to launch it, one to keep it, and one to transform it. For the first time, Dell reveals the highs and lows of the company's evolution amidst a rapidly changing industry—and his own, as he matured into the CEO it needed. With humor and humility, he recalls the mentors who showed him how to turn his passion into a business; the competitors who became friends, foes, or both; and the sharks that circled, looking for weakness. What emerges is the long-term vision underpinning his success: that technology is ultimately about people and their potential. More than an honest portrait of a leader at a crossroads, *Play Nice But Win* is a survival story proving that while anyone with technological insight and entrepreneurial zeal might build something great—it takes a leader to build something that lasts.

A great silence has settled upon a drowned world. In the final battle of their final war, the massive citysubs Universalis and Population reduced each other to ruins. One lays wrecked on the seafloor. The other, beached and lifeless, litters the island of pristine polar ice it tried to destroy. Pockets of survivors huddle together. On the frigid surface, Ralla Gattley and Thom Vargas cling to life and each other. Below, the soldier Geran Lo fights relentlessly to free trapped and drowning civilians. As they struggle against a world determined to kill them, a new and even more dangerous menace approaches. Undersea Atrophia is the second book in the Undersea Saga.
