Cnor Exam Prep Book 2020 and 2021 - Cnor Study Guide Secrets, Full-Length Practice Test, Detailed Answer Explanations Springer Publishing Company

Functioning as both a graduate textbook and a professional resource, *Role Development for Doctoral Advanced Nursing Practice* explores the historical and evolving role of the doctorally-prepared Advanced Practice Registered Nurse (APRN). Because the role of the DNP graduate is evolving, the primary authors and contributing authors of this text present positions and reflective responses that represent a diverse range of current views on the DNP role and the diverse 'ideals' of what the role of the doctorally-prepared APRN should be. This is also the first text to market that exclusively

examines the evolving and expanding role functions of the DNP graduate. Too often, nursing texts offer the sole view of the author. This one uniquely does not. The highlight of this text is the two-part chapter organization that presents the chapter content followed by a Reflective Response, which is commentary that may counter or support the opinions of the chapter author. Each Reflective Response is written by well-known DNP leaders representing the diverse roles and experience of academics, administrators and practitioners. This innovative chapter presentation is bound to provide for more stimulating classroom discussion. This work is stimulating and possibly provocative, but in the end is a well-rounded, landmark presentation of a wide range of topics surrounding education of the DNP, the core competencies and the unfolding DNP role development. It is a 'must have' text for use in all DNP role development courses and courses covering contemporary DNP degree issues! Each of the textbook's sections thoroughly covers important aspects of role development: Section I: provides background information on the evolution of the DNP degree; essential content on role theory; what nursing "roles" are and how they evolved; and a discussion of how masters versus doctoral level advanced nursing practices differ Section II: focuses on the four basic roles of the DNP graduate which currently predominate: practitioner, clinical executive, educator, and clinical trials research scientist, as well as the role of the clinical scholar which each graduate is expected to be Section III: covers the diverse skills that comprise the doctoral APRN role; including leadership content, negotiation skills, and leveraging technology to support doctoral advanced level practice; debate over the DNP Exam; discussion of DNP grads using the title "Dr"; and how the doctoral APRN can use their new competencies to function at a higher level

"Essentials of Correctional Nursing is the first new and comprehensive text about this growing field to be published in the last decade.

Fortunately, the editors have done a great job in all respects...This book should be required reading for all medical practitioners and administrators working in jails or prisons. It certainly belongs on the shelf of every nurse, physician, ancillary healthcare professional and corrections administrator."

--Corhealth (The Newsletter of the American Correctional Health Services Association) "I highly recommend Essentials of Correctional Nursing, by Lorry Schoenly, PhD, RN, CCHP-RN and Catherine M. Knox, MN, RN, CCHP-RN, editors. This long-awaited book, dedicated to the professional specialty of correctional nursing, is not just a good read, it is one of those books that stays on your desk and may never make it to the bookshelf."--American Jails "Correctional nursing has minimal published texts to support, educate, and provide ongoing best practices in this specialty. Schoenly and Knox have successfully met those needs with Essentials of Correctional Nursing."--Journal of Correctional Health Care Nurses have been described as the backbone of correctional health care. Yet the complex challenges of caring for this disenfranchised population are many. Ethical dilemmas around issues of patient privacy and self-determination abound, and the ability to adhere to the central tenet of nursing, the concept of caring, is often compromised. Essentials of Correctional Nursing supports correctional nurses by providing a comprehensive body of current, evidence-based knowledge about the best practices to deliver optimal nursing care to this population. It describes how nurses can apply their knowledge and skills to assess the full range of health conditions presented by incarcerated individuals and determine the urgency and priority of

requisite care. The book describes the unique health needs and corresponding care for juveniles, women, and individuals at the end of life. Chapters are devoted to nursing care for patients with chronic disease, infectious disease, mental illness, or pain, or who are in withdrawal from drugs or alcohol. Chapters addressing health screening, medical emergencies, sick call, and dental care describe how nurses identify, respond to, and manage these health care concerns in the correctional setting. The Essentials of Correctional Nursing was written and reviewed by experienced correctional nurses with thousands of hours of experience. American Nurses Association standards are woven throughout the text, which provide the information needed by nurses studying for certification exams in correctional nursing. The text will also be of value to nurses working in such settings as emergency departments, specialty clinics, hospitals, psychiatric treatment units, community health clinics, substance abuse treatment programs, and long-term care settings, where they may encounter patients who are currently or have previously been incarcerated. Key Features:

- Addresses legal and ethical issues surrounding correctional nursing
- Covers common inmate-patient health care concerns and diseases
- Discusses the unique health needs of juveniles, women, and individuals at the end of life
- Describes how nurses can safely navigate the correctional environment to create a therapeutic alliance with patients
- Provides information about health screening, medical emergencies, sick call, and dental care
