Includes Errata Sheet of Notice to Mariners (NTM) 22/13. This book contains a complete copy of the Inland and International Navigation Rules as presented by the United States Coast Guard. The Coast Guard requires that an up-to-date copy such as this one be carried on all vessels 12 meters (39 feet) or more in length at all times. In addition to a complete copy of the USCG edition (COMDTINST M16672.2D), Paradise Cay Publications has added the following features to make our book more useful and comprehensive. 1) We have created an Annotated Contents. This added feature will help guide the reader to a desired rule. The topic of each subsection of the rules has been noted for quick reference along with the page numbers for Inland and International Rules. 2) We have updated this edition for corrections presented in Notice to Mariners up through November 15, 2004. 3) We have included detailed instructions on how to log on to the NGA (National Geospatial-Intelligence Agency, formerly NIMA) website and update this Rules Publication.

The Marine Environment Protection Committee (MEPC) of IMO, at its sixty-second session in July 2011, adopted the Revised MARPOL Annex V, concerning Regulations for the prevention of pollution by garbage from ships, which enters into force on 1 January 2013. The associated guidelines which assist States and industry in the implementation of MARPOL Annex V have been reviewed and updated and two Guidelines were adopted in March 2012 at MEPC's sixty-third session. The 2012 edition of this publication contains: the 2012 Guidelines for the implementation of MARPOL Annex V (resolution MEPC.219(63)); the 2012 Guidelines for the development of garbage management plans (resolution MEPC.220(63)); and the Revised MARPOL Annex V (resolution MEPC.201(62)).

The Boat Crew Seamanship Manual presents the approved methods and procedures for the conduct of Coast Guard boat operations. The Coast Guard Auxiliary, for the conduct of vessel facility operations, also uses this Manual.

[Code for the Construction and Equipment of Mobile Offshore Drilling Units, 2009](#)

Navigation Rules International - Inland The Assembly, at its twenty-sixth session (23 November to 2 December 2009), adopted by resolution A.1023(26) the Code for the Construction and Equipment of Mobile Offshore Drilling Units, 2009 (2009 MODU Code), which had been developed following a thorough revision of the 1989 MODU Code adopted by resolution A.649(16). In adopting the 2009 MODU Code, the Assembly recalled in particular that, since the adoption of the 1989 MODU Code, the Organization had adopted a significant number of amendments to many of the regulations of the International Convention for the Safety of Life at Sea, 1974 (SOLAS) referenced in the Code, and also that the International Civil Aviation Organization (ICAO) had adopted amendments to the Convention on International Civil Aviation which impacted on the provisions for helicopter facilities as contained in the Code. The 2009 MODU Code provides an international standard for MODUs of new construction which will facilitate their international movement and operation and ensure a level of safety for such units and for personnel on board, equivalent to that required by the 1974 SOLAS Convention and the Protocol of 1988 relating to the International Convention on Load Lines, 1966, for conventional ships engaged on international voyages. The 2009 MODU Code supersedes the 1989 MODU Code for mobile offshore drilling units, the keels of which are laid or which are at a similar stage of construction on or after 1 January 2012. For MODUs constructed before that date, the provisions of the 1989 MODU Code still apply.

Accidents involving ships often result in deaths, loss of ships and damage to the marine environment, and they are a fact of modern times. Such accidents can be traced in part to the growth and changing nature of seaborne commerce. Equally significant, however, are the changes in labour conditions for seafarers and the problem of sub-standard ships. These guidelines are intended to assist those concerned with labour and social conditions on board ship, to help ensure that the relevant international labour standards are complied with, and to minimize the risk of accidents caused by not fulfilling these standards.

Imagine your best possible organization: a place where people strive for continuous improvement, communicate clearly and honestly, freely share information, respect their colleagues and leaders, make a difference -- and achieve truly extraordinary levels of performance, even in tough times. Using this book's powerful Work/Life Approach, you can build that organization. World-renowned performance consultants Dr. Gene Fusch and Richard Gillespie offer a step-by-step blueprint for developing a true performance

culture, where people bring a relentless focus and selfless collaboration to bear on the organization's most fundamental goals. A Practical Approach to Performance Interventions and Analysis walks through every step of the process: analyzing business problems, identifying performance gaps, selecting the best interventions, measuring results, and more. You'll learn how to integrate your organization's goals with the beliefs and needs of your people; foster unity without conformity, and diversity without division; how to overcome the fear and distrust that makes organizations dysfunctional; and how to build an organization where everyone really takes ownership of their "fraction of the action." Along the way, they present 50 dynamic models that tightly connect theory to real-world business practice, are ROI-driven, are fully measurable, and can be utilized by all leaders and practitioners in HR, organizational development, and training. With their guidance, you can choose and execute the performance initiatives that deliver the greatest positive impact on culture, business metrics, and the lives of all your people.

[Merchant Marine Safety Manual](#)

Port state control (PSC) involves the inspection of foreign ships in national port areas to verify that the condition and operation of a ship and its equipment comply with the requirements of international regulations. While IMO has always acknowledged that enforcement of global maritime standards is the responsibility of flag states, the organisation nevertheless recognises that exercising the right to carry out Psc makes an important contribution to ensuring those standards are implemented consistently on ships of different nationalities. The subcommittee on flag state implementation has developed and maintained a framework to promote the global harmonisation and co-ordination of Psc activities resulting in the adoption of resolution A.1052(27) by the assembly of November 2011. This resolution contains the Procedures for port state control, 2011, and revokes resolutions A.787(19) and A.882(21).
