USACE Publications - Engineer Manuals

Unlike many engineering disciplines, the complexities of the coastal and marine environment require specialist design skill sets. Fortunately, at IWC, we maintain the right skill sets to creatively develop solutions that address the design standards and conditions, function and performance, constructability, costs, and aesthetics.

This collection of publications is the single official repository for official Engineering Regulations (ERs), Engineering Circulars (ECs), Engineering Manuals (EMs) and other official public documents originating from Headquarters U.S. Army Corps of Engineers
