design of Part VI. Many of the Coastal Engineering Manual example problems use the same conditions given for the corresponding problems in the Shore Protection Manual. This allows side-by-side comparison to show how the new guidance of the Coastal Engineering Manual differs from the older Shore Protection Manual results. *Coastal Engineering Journal - World Scientific Publishing ...*

Methods for USACE design practice for navigation structures are described in the Coastal Engineering Manual (CEM). The design calculations use a storm of selected return periods from 10 to 100 years, associated wave heights and wave periods, storm surge, and wave setup. The combination of these design parameters is used in the calculation of rock
