Algorithms specify the way computers process information and how they execute tasks. Many recent technological innovations and achievements rely on algorithmic ideas – they facilitate new applications in science, medicine, production, logistics, traffic, communication and entertainment. Efficient algorithms not only enable your personal computer to execute the newest generation of games with features unimaginable only a few years ago, they are also key to several recent scientific breakthroughs – for example, the sequencing of the human genome would not have been possible without the invention of new algorithmic ideas that speed up computations by several orders of magnitude. The greatest improvements in the area of algorithms rely on beautiful ideas for tackling computational tasks

more efficiently. The problems solved are not restricted to arithmetic tasks in a narrow sense but often relate to exciting questions of nonmathematical flavor, such as: How can I find the exit out of a maze? How can I partition a treasure map so that the treasure can only be found if all parts of the map are recombined? How should I plan my trip to minimize cost? Solving these challenging problems requires logical reasoning, geometric and combinatorial imagination, and, last but not least, creativity – the skills needed for the design and analysis of algorithms. In this book we present some of the most beautiful algorithmic ideas in 41 articles written in colloquial, nontechnical language. Most of the articles arose out of an initiative among German-language universities to communicate

the fascination of algorithms and computer science to high-school students. The book can be understood without any prior knowledge of algorithms and computing, and it will be an enlightening and fun read for students and interested adults.

"Brian McGilloway blends timeless values with ripped-from-the-headlines issues to produce some of the very best crime fiction being written today." —Lee Child, #1 New York Times bestselling author
A young man is found in a riverside park, his head

bashed in with a rock. One clue is left behind to uncover his identity—an admission stamp for the local gay club. DS Lucy Black is called in to investigate. As Lucy delves into the community, tensions begin to rise as the man's death draws the attention of the local Gay Rights group to a hate-speech Pastor who, days earlier, had advocated the stoning of gay people and who refuses to retract his statement. Things become further complicated with the emergence of a far-right group targeting immigrants in a local working-class estate. As their attacks escalate, Lucy and her boss, Tom Fleming, must also deal with the building power struggle between an old paramilitary commander and his deputy that threatens to further enflame an already volatile situation. Hatred and complicity abound in McGilloway's new Lucy Black thriller. Compelling and current, Bad Blood is an expertly crafted and acutely observed page-turner,

delivering the punch that readers of Little Lost Girl have grown to expect.
