Cancer control is the term applied to the development of integrated population-based approaches to reduce the incidence and mortality from cancer and to minimize its impact on affected individuals and on the community. The integrated nature of cancer control is reflected in this multi-disciplinary text, the first in this rapidly developing field.

A little orphaned elephant is adopted by a lion, King of the Beasts, but grows bigger and more capable than the lion, caring for the king in the latter's old age.

Corse Orlando ; Toronto : Academic Press

‘KUMBA AFRICA’, is a compilation of African Short Stories written as fiction by Sampson Ejike Odum, nostalgically taking our memory back several thousands of years ago in Africa, reminding us about our past heritage. It digs deep into the traditional life style of the Africans of old, their beliefs, their leadership, their courage, their culture, their wars, their defeat and their victories long before the emergence of the white man on the soil of Africa. As a talented writer of rich resource and superior creativity, armed with in-depth knowledge of different cultures and traditions in Africa, the Author throws light on the rich cultural heritage of the people of Africa when civilization was yet unknown to the people. The book reminds the readers that the Africans of old kept their pride and still enjoyed their own lives. They celebrated victories when wars were won, enjoyed their New yam festivals and villages engaged themselves in seasonal wrestling contest etc; Early morning during harmattan season, they gathered firewood and made fire inside their small huts to hit up their bodies from the chilling cold of the harmattan. That was the Africa of old we will always remember. In Africa today, the story have changed. The people now enjoy civilized cultures made possible by the influence of the white man through his scientific and technological process. Yet there are some uncivilized places in Africa whose people haven’t tested or felt the impact of civilization. These people still maintain their ancient traditions and culture. In everything, we believe that days when people paraded barefooted in Africa to the swamp to tap palm wine and fetch firewood from there farms are almost fading away. The huts are now gradually been replaced with houses built of blocks and beautiful roofs. Thanks to modern civilization. Donkeys and camels are no longer used for carrying heavy loads for merchants.

They are now been replaced by heavy trucks and lorries. African traditional methods of healing are now been substituted by hospitals. In all these, I will always love and remember Africa, the home of my birth and must respect her cultures and traditions as an AFRICAN AUTHOR.

This study investigates the effects of unemployment on individuals' attitudes to work, their social relationships, and their psychological health.

Social Change and the Experience of Unemployment iUniverse

In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.

Male Hypogonadism Wentworth Press

This text is listed on the Course of Reading for SOA Exam P. Probability and Statistics with Applications is an introductory textbook designed to make the subject accessible to college freshmen and sophomores concurrent with Calc II and III, with a prerequisite of just one smester of calculus. It is organized specifically to meet the needs of students who are preparing for the Society of Actuaries qualifying Examination P and Casualty Actuarial Society's new Exam S. Sample actuarial exam problems are integrated throughout the text along with an abundance of illustrative examples and 870 exercises. The book provides the content to serve as

the primary text for a standard two-semester advanced undergraduate course in mathematical probability and statistics. 2nd Edition Highlights Expansion of statistics portion to cover CAS ST and all of the statistics portion of CAS SAbundance of examples and sample exam problems for both Exams SOA P and CAS SCombines best attributes of a solid text and an actuarial exam study manual in one volumeWidely used by college freshmen and sophomores to pass SOA Exam P early in their college careersMay be used concurrently with calculus coursesNew or rewritten sections cover topics such as discrete and continuous mixture distributions, non-homogeneous Poisson processes, conjugate pairs in Bayesian estimation, statistical sufficiency, non-parametric statistics, and other topics also relevant to SOA Exam C.

Christianity and the world order Oxford University Press

This valuable new title profiles more than twenty terrorist organizations operating in the Middle East and their affiliate groups worldwide. Designed as a complete, indispensable guide, the book's profiles describe essential characteristics, external relations and financial support and more.

You Big and Me Small International Agency for Research on Cancer

This report reviews current research on the menopause, including studies on its symptoms and their treatment, and its effects on the cardiovascular and skeletal systems. It also assesses the relevance of existing data to women in developing countries.

Cancer Control Penguin

This richly-illustrated atlas-like book provides a foundation for the biological and molecular understanding of how the mammary gland develops and how breast cancer originates. The main goal is to comprehensively review in ten chapters fundamental knowledge in breast cancer. New paradigms are described in which induction of differentiation in the mammary gland can promote prevention and cure of breast cancer. The text is extremely helpful both for clinicians treating patients and researchers looking for new avenues of development.

Digestive System Tumours is the first volume in the fifth edition of the WHO series on the classification of human tumors. This series (also known as the WHO Blue Books) is regarded as the gold standard for the diagnosis of tumors and comprises a unique synthesis of histopathological diagnosis with digital and molecular pathology. These authoritative and concise reference books provide indispensable international standards for anyone involved in the care of patients with cancer or in cancer research, underpinning individual patient treatment as well as research into all aspects of cancer causation, prevention, therapy, and education.

The Rejection of Consequentialism OUP Oxford

This second edition of Epidemiologic Methods offers a rigorous introduction to the concepts and tools of epidemiologic research. Aimed chiefly at future epidemiologists, the book offers clear descriptions, practical examples, and question/answer sections for each of the science's key concepts. Authored by two award-winning epidemiology instructors, this book is ideally suited for use as a text in a graduate-level course sequence in epidemiologic methods. The book's chapters are organized around three main themes: general concepts and tools of epidemiology; major study designs; and special topics, including screening, outbreak investigations, and use of epidemiology to evaluate policies and

programs. With additional exercises at the end of each chapter and expanded attention to topics such as confounding, this new edition of Epidemiologic Methods is an indispensable resource for the next generation of epidemiologic study.

The Extraordinary Gift Raven Press (ID)

A page-turning narrative about Marissa Mayer's efforts to remake Yahoo as well as her own rise from Stanford University undergrad to CEO of a \$30 billion corporation by the age of 38. When Yahoo hired star Google executive Mayer to be its CEO in 2012 employees rejoiced. They put posters on the walls throughout Yahoo's California headquarters. On them there was Mayer's face and one word: HOPE. But one year later, Mayer sat in front of those same employees in a huge cafeteria on Yahoo's campus and took the beating of her life. Her hair wet and her tone defensive, Mayer read and answered a series of employee-posed questions challenging the basic elements of her plan. There was anger in the room and, behind it, a question: Was Mayer actually going to be able to do this thing? Marissa Mayer and the Fight to Save Yahoo! is the inside story of how Yahoo got into such awful shape in the first place, Marissa Mayer's controversial rise at Google, and her desperate fight to save an Internet icon. In August 2011 hedge fund billionaire Daniel Loeb took a long look at Yahoo and decided to go to war with its management and board of directors. Loeb then bought a 5% stake and began a shareholder activist campaign that would cost the jobs of three CEOs before he finally settled on Google's golden girl Mayer to unlock the value lurking in the company. As Mayer began to remake Yahoo from a content company to a tech company, an internal civil war erupted. In author Nicholas Carlson's capable hands, this riveting book captures Mayer's rise and Yahoo's missteps as a dramatic illustration of what it takes to grab the brass ring in Silicon Valley. And it reveals whether it is possible for a big lumbering tech company to stay relevant in today's rapidly changing business landscape.

Brain Endocrinology OUP Oxford

This revised edition of The endocrine functions of the brain (1980) presents the most recent findings in the field, with particular emphasis on their clinical significance and applications. Each of the 17 chapters may be read separately to obtain information on specific areas. The primary goal is to provide a comprehensive view of modern basic and clinical neuroendocrinology. For a wide range of investigators, clinicians, and their students, in endocrinology and neuroscience. Annotation copyrighted by Book News, Inc., Portland, OR Truth Is a Woman Springer Science & Business Media Elmer, the patchwork elephant, plays an amusing trick on his grey elephant friends.

Probability and Statistics with Applications: A Problem Solving Text Oxford University Press

The book is the first major study to examine the implications of differences in welfare regimes for the experience of unemployment in Europe. It is concerned with three central questions about the way such regimes affect the experience of unemployment.

The first is how far they protect the quality of life of unemployed people with respect to living standards and the experience of financial hardship. The second is their role in mediating the impact of unemployment on the individual's longer-term position in the labour market, addressing the issue of how far they help to prevent progressive marginalization from the employment structure as a result of motivational change, skill loss or the growth of discriminatory barriers. The third is how far such regimes mediate the impact of unemployment on social integration in the community, for instance with respect to the maintenance (or rupture) of social networks and the degree of psychological distress experienced by the unemployed. The book is the product of a major cross-cultural research programme, funded by the European Union (TSER), bringing together teams from eight countries. The emphasis has been on rigorous comparison rather than the all-too-frequent separate country analyses, which usually provide data which differs in format from one country to another. In addition to a systematic comparison of national data sources, it has been able to make use of a new important data source (the European Community Household Panel) produced by Eurostat which provides directly comparable information for all EU countries. The study shows that institutional and cultural differences have vital implications for the experience of unemployment. While welfare policies affect in an important way the pervasiveness of poverty, it is above all the patterns of family structure and the culture of sociability in a society that affect vulnerability to social isolation. The book concludes by developing a new perspective for understanding the risk of social exclusion.

Childhood Under Siege Springer

In rhythmic text and striking pictures, Byron Barton retells the classic story of the wee little woman who lives in a wee little house with a very mischievous wee little cat. Mr. Barton's simple words, bold images, and imaginative use of color have made his many picture books perennial favorites with young children.

Interventions in Pulmonary Medicine HarperCollins

The definitive textbook on the subject, offering a core curriculum that addresses the epidemiology of major reproductive and perinatal outcomes.

Pathology of Tumours in Laboratory Animals Oxford University Press

Plucky Philomene turns the tables on a nasty witch by befriending her pet monster.

Marissa Mayer and the Fight to Save Yahoo! ACTEX Publications

Truth Is A Woman is a poetry collection by Loren Jakobov written in response to her friends tragic death in 2015 as a victim of rape and murder. The poems discuss the World from the eyes of a woman, the pain and the beauty that lies therein.
