The content of this manuscript is research investigated for the resilience and success of pastors in the Church of God in Christ, a Pentecostal denomination that has over six million members, to include over three-thousand pastors. The research is a phenomenological study designed to provide a narrative, interview of the participants to share their background, role, and day-to-day practices of the work of ministry as a senior pastor in this organization. The research will consist of seven to ten pastors selected from across the country, all African-American males, age groups ranging from 42 years to 72 years of age. The information will be gathered by personal interviews conducted by asking each of them the same questions to gather all the facts and data for this research design. The instrument used will be a recording device that will record all conversations that will be transcribed in writing verbatim. As the human instrument conducting this research, it will constitute travel, lodging, and scheduling of each participant that will give the researcher an intimate up and close contact with each participant. The information will be safeguarded, names will be protected and all information will be useful as a model example of what constitutes success for ministry and the tools and resources needed to maintain a healthy and productive state of mind to be resilient in leading the charge as clergymen in the field of ministry. It is with great joy and a privilege to conduct this interview with pastors serving in the Church of God in Christ.

American Music: An Introduction, Second Edition is a collection of seventeen essays surveying major African American musical genres, both sacred and secular, from slavery to the present. With contributions by leading scholars in the field, the work brings together analyses of African American music based on ethnographic fieldwork, which privileges the voices of the music-makers themselves, woven into a richly textured mosaic of history and culture. At the

same time, it incorporates musical treatments that bring clarity to the structural, melodic, and rhythmic characteristics that both distinguish and unify African American music. The second edition has been substantially revised and updated, and includes new essays on African and African American musical continuities, African-derived instrument construction and performance practice, techno, and quartet traditions. Musical transcriptions, photographs, illustrations, and a new audio CD bring the music to life.

Philanthropy is often associated with wealthy people giving large amounts of money to charitable organizations and indirectly to people they don't personally know. Ethnic philanthropy is almost totally different: it consists primarily of people sharing modest wealth with other people, most of whom the givers know well. Too often communities of color are portrayed as takers rather than givers -- this important study debunks that myth.

In this revised and enlarged edition of his classic work, Robert H. Bremner provides a social history of American philanthropy from colonial times to the present, showing the ways in which Americans have sought to do good in such fields as religion, education, humanitarian reform, social service, war relief, and foreign aid. Three new chapters have been added that concisely cover the course of philanthropy and voluntarism in the United States over the past twenty-five years, a period in which total giving by individuals, foundations, and corporations has more than doubled in real terms and in which major revisions of tax laws have changed patterns of giving. This new edition also includes an updated chronology of important dates, and a completely revised bibliographic essay to guide readers on literature in the field. "[This] book, as Bremner points out, is not encyclopedic. It is what he intended it to be, a pleasant narrative, seasoned with humorous comments, briefly but interestingly treating its principal persons and subjects. It should serve teacher and student as a springboard for further study of individuals, institutions and movements."--Karl De Schweinitz, American Historical Review "[American Philanthropy] is the starting point for both casual readers and academic scholars. . . . a readable book, important beyond its diminutive size."--Richard Magat, Foundation News

Exploring many aspects of Felix Mendelssohn's multi-faceted career as musician and how it intersects with his work as composer, contributors discuss practical issues of music making such as performance space, instruments, tempo markings, dynamics, phrasings, articulations, fingerings, and instrument techniques. They present the conceptual and ideological underpinnings of Mendelssohn's approach to performance, interpretation, and composing through the contextualization of specific performance events and through the theoretic actualization of performances of specific works. Contributors rely on manuscripts, marked or edited scores, and performance parts to convey a deeper understanding of musical expression in 19th-century Germany. This study of Mendelssohn's work as conductor, pianist, organist, violist, accompanist, music director, and editor of old and new music offers valuable perspectives on 19th-century performance practice issues.
