Cognitive Rehabilitation Attention And Neglect

Cognitive neuroscience can make a significant contribution towards the development of a scientific basis for the practice of brain rehabilitation. Though rehabilitation is a vast worldwide industry, there is little scientific basis for the training and therapy that are designed to help damaged brain circuits to recover.

Cognitive rehabilitation for spatial neglect following ...

A behavioural technique—more appropriate for treating sustained attention deficits in clinical settings—has also been developed.
129 Neglect patients were required to carry out a variety of tasks that required sustained attention,

for example sorting
coins or cards.

Unilateral neglect is a particularly appropriate disorder when attempting to build rehabilitation strategies closely tied to theoretical models derived from cognitive neuroscience. This is in part because of the rich theoretical work that has been carried out on this condition

Hemispatial neglect
| Journal of
Neurology,
Neurosurgery ...

The benefit of cognitive rehabilitation for attention problems following stroke is unclear. Study characteristics. We identified six studies that

compared cognitive rehabilitation with a control group who received their usual care (but not cognitive rehabilitation) for people with attention problems following stroke.

We did not consider listening to music, meditation, yoga, or mindfulness to be a form of cognitive rehabilitation.
