*Coleman The Outdoor Adventure Cookbook*  
Lulu Press, Inc  
Before the Computer fully explores the data processing industry in the United States from its nineteenth-century inception down to the period when the computer became its primary tool. As James Cortada describes what was once called the "office appliance industry," he challenges our view of the digital computer as a revolutionary technology. Cortada interprets reliance on computers as a development within an

important segment of the American economy that was earlier represented largely by such instruments as typewriters, tabulating machines, adding machines, and calculators. He also describes how many of the practices of the office appliance industry evolved into those of the computer world. Drawing on previously unavailable industry archives, the author adds to our understanding of IBM's early history and offers short corporate histories of firms that include NCR, Burroughs, and Remington Rand. Focusing on the United States but also including comparative material on Europe and Asia, Before the Computer will be a unique source of knowledge about the companies that built office equipment and

their enormous impact on economic life. Originally published in 1993. Here's what reviewers said about the first edition of The Essential Outdoor Gear Manual

"The trouble with outdoor equipment is that everyone has an opinion--one usually based on advertising hype, personal bias, or hearsay. Finally, here's a book that gives you all the information necessary to make objective buying decisions. This book, with its sound advice, will save you money and make you a better backcountry traveler."--Nancy Prichard, outdoor adventure journalist

"Think about something that we all need, yet we'd all hate to have to write a book about. After mouthwash, we'd probably settle on gear repair and maintenance.

Thank goodness Annie Getchell came along with her artist's sensitivity for detail, a flair for language, and best of all, her wit. From repairing zippers to selecting 'green' adhesives, she nails it and keeps us smiling the entire distance."--John Viehman, Publisher of Backpacker and Executive Producer and Series Host of Anyplace Wild

"The Essential Outdoor Gear Manual has set a new standard for books about gear."--Backcountry

"All of us should be grateful to Annie Getchell for creating what is the best book I have ever seen on caring for and repairing your outdoor gear. If you want to know how to make your gear last longer, you need this book. . . . This is the complete word on care and repair."--Adventure West

"The big challenge with this sort of book is to make what is essentially an instruction manual into something that's pleasant to read, functional, and authoritative. Annie Getchell pulls it off."--Alan Kesselheim, writer and noted long-distance paddler

**Glacier Girl: The Quest—The Prize** is a memoir based on the journals of seven expeditions co-led by Richard Taylor and Pat Epps. Taylor's journals cover eleven years of the search and retrieval of the P-38 Lightning, later called Glacier Girl. On her way to war in 1942, she and seven other planes in their squadron ran out of gas and crash-landed on the Greenland ice cap. After a two-week wait, all of the pilots and crew were rescued—no one left behind. They then went back to war, and the eight planes were abandoned. Eventually, they became known as the

Lost Squadron. Thirty-nine years later, in 1981, Pat and Richard heard about this aviation event and formed the Greenland Expedition Society (GES). They teamed up with a couple of other pilots and headed north to find the planes. Their ambitious plan was to put fresh gas in the tanks, attach skis, and fly as many of the fighters as they could back to the States. What greater way to store airplanes than in a giant deep freeze? As it turned out, the planes to find. The first four expeditions to the ice cap ended were conspicuous mission failures. In situ lessons in Arctic survival are not offered without startlingly high payments of personal sacrifice. On the upside, some thrilling and harrowing stories of Mother Nature exercising her unlimited fury are shared. The ice cap adage of “shovel or die” takes on new meaning. It was not until the fifth expedition, using

ground-penetrating radar of a discrete frequency, that the planes were finally located. At a glacial rate they had moved more than a mile from their original location. But that wasn't the big problem. The bad news was that they were now encased in solid-blue ice, 260 feet deep in the bowels of the glacier. To melt a shaft through the ice and down to the planes, the GES, invented and built a system they called the thermal meltdown generator (TMG). In its first field application, at seventy feet deep in the glacier, the melt head lost directional control (gravity) and started heading horizontally. Henceforth, the future TMGs were affectionately called gophers. In 1990, the team returned to the glacier with a new gopher, melted a four-foot diameter shaft down to the B-17 bomber Big Stoop. They then descended down the ice shaft, melted out a hangar area around the bomber and salvaged an array of

---

historical aviation paraphernalia—machine guns, throttle quadrants, instruments, the upper gun turret, and so on. The near impossible was accomplished. In 1992, now a little more seasoned, and with a few garlands of hard-earned achievement, they returned again with a new super gopher. Their sights were now set on retrieving at least one complete Lockheed, P-38 Lightning fighter plane. The mission started with melting five ice-shafts, closely in a row. The webs between the holes were then melted out to create a four-foot-by-twenty-foot slot in the glacier—260 feet deep. This was the right-sized opening through which they could lift large wings and fuselage sections to the surface. The airplane was then carefully deconstructed, hauled to the surface, and then delivered to the States for reassembly. It took ten years and two million dollars to put the plane back into flying

condition. They called her Glacier Girl. The renovation was performed by Roy Shoffner, a GES partner in the seventh expedition. In 2002, Glacier Girl flew again and was featured in the one-hour History Channel presentation *The Hunt for the Lost Squadron*. Glacier Girl now flies and is the feature star attraction in airshows all over the country. Citius, altius, fortius.

If, in fact, "Lizzie Borden took an axe and gave her [step]mother forty whacks," why (from a representational standpoint) did her stepmother deserve it? If older gay men in Internet chat rooms regularly provide much-needed acceptance and advice to younger gay males during the coming-out process, how is it that they continually reinforce racist ideologies and powerless subjectivities while doing so? What sorts of media images are commonly presented of individuals and groups that are regarded as being deviant in society, and whose interests do they ultimately serve? The answers to these important questions and many others are provided in the pages of *Mediated Deviance and Social Otherness: Interrogating Influential Representations*, which

explores provocative representations of deviance in various media forms—including books, films, musical offerings, news accounts, television programs, and Internet sites—and their substantial cultural, political, and social consequences for the lived realities of individuals of different backgrounds and lifestyles. The eye-opening chapters of this book enable readers to more fully realize the regularity with which media representations continuously contribute, in powerful ways, to the formation and perpetuation of influential social constructions of deviance and otherness as they pertain to delinquents, criminals, and individuals of all ages, classes, genders, races, sexual orientations, and health/(dis)ability statuses. "Mediated Deviance and Social Otherness: Interrogating Influential Representations" is a thought-provoking anthology that offers fresh insight and new approaches to critically analyzing social constructions of deviancy across a variety of media forms. While scholars have long examined the relationship between media and deviancy, this collection of essays features a range of theoretical perspectives through which to investigate deviancy and its various interpretations in original ways. In the process, it

---

deepens our understanding of how deviancy has been constructed across time and in differing social/cultural milieus. The essays in this anthology reflect the diverse disciplines of their contributing scholars. At the same time, the anthology does not waver from its clear focus on deviancy, lending it substantial coherence and readability. The book is expertly structured and edited. Each of the essays draws inspiration from a refreshing variety of sources and fields of study. The anthology is accordingly divided into six distinct yet related sections that mark its coherence and readability. Simultaneously, the essays within each section are quite different from one another, allowing the reader to make thought-provoking connections between representations of deviancy both within sections and among them. *Mediated Deviance and Social Otherness: Interrogating Influential Representations* is an important text. Considering the growth of new media forms, its investigation of both old and new media in relation to social constructions of deviancy represents a timely and topical contribution to the field of media and cultural studies. Given its breadth and scope, the anthology represents a highly significant scholarly

contribution that will greatly benefit scholars, students, and interested individuals of all levels. It offers eye-opening insights to anyone with an interest in cultural studies, disease and disability studies, film and television studies, LGBT studies, criminal justice, sociology, and related fields." Brief Reviewer Bio: Metasebia Woldemariam, Ph.D., is an associate professor of communication and media studies at Plymouth State University who specializes in media representations of deviancy and otherness. "*Mediated Deviance and Social Otherness: Interrogating Influential Representations* is an erudite collection offering critical and cultural analysis of media representations within various media forms, including journalism, film, documentary, television, fiction, music, and the Internet. The book is divided into six sections that highlight the categories of deviance and otherness the contributors emphasize: (1) Age; (2) Crime and Criminals; (3) Disease and Disability; (4) Gender, Race, and Class; (5) Sexual Orientation; and (6) "Other Forms of Deviance, which include masochism, carnival "spectaculars," and culture of violence. While some chapters feature links to topics common to media studies, such as the Motion Picture Production Code,

what is powerful about the collection is how varied the interpretive standpoints of the contributors are. An example of one such unique interpretive perspective comes from Linda K. Fuller, whose chapter examines the sexual-political aspects of African AIDS-related films based on her work in West Africa "with a sexologist collating and critiquing appropriate media for Life Skills." This interpretive variety inspires novel examination of media representations through the originality of varied genres of analysis: the collection offers analysis of classic as well as popular literature, popular as well as veiled news media, award-winning as well as obscure television series, and outlaw country music as well as rap music. Because "media" is so broadly interpreted within the collection, readers are encouraged to view mass media as a crucial cultural landscape for meaning making. Each contributor offers a timely perspective about past or contemporary society through the analysis of unique media genres and artifacts, or even through analysis of representations in multiple media forms. For example, Annette Holba examines multiple forms of the media representations of a less emphasized person in the Lizzie Borden case, Borden's stepmother. Editor Kylo-Patrick R.

---

Hart's own contribution examines multiple media representations of the visible physical signs of AIDS before focusing on their representation in two particularly noteworthy film melodramas. Rather than focusing on stereotypical categories of deviance and otherness, the contributors focus on less commonly acknowledged representations or challenge commonly acknowledged understandings of media. This is evident through Christopher J. Pérez's ethnographic observation of instant messages from Gay.com participants, which dispels the notion that such online communities allow for positive expressions of gay identity. Through its broad interpretation of media, the collection offers an ample array of less commonly acknowledged media genres, as evident in Margaret Weigel's class analysis of the electric-bulb advertising sign "spectaculars" in Manhattan from 1892 to 1917; Wendy Korwin's visual analysis of a set of four image plates used within prescriptive literature; and Amanda Klein's cinematic comparison of portrayed deviance in the 1950s juvenile delinquency teenpic and the 1990s ghetto action film. Incorporated also are unique perspectives on traditional news media representations, as in

Thomas Grochowski's interpretation of celebrity defendant perspectives of O.J. Simpson. Occasionally, common themes thread particular chapters together, allowing opportunities to understand how critics view the same or similar media differently. For example, David Sealy and Georges-Claude Guilbert as well as Valentin Locoge offer analysis of the HBO television series OZ. Additionally, contemporary moral dilemmas and societal issues are covered as they appear in various media representations, as when Barbara Barnett's discussion of journalistic representations of maternal infanticide and perfection appear alongside Robert Goff's analysis of the textured view of abortion provided by the film *Vera Drake*. Hart's collection is important to expanding the scholarly understanding of media representations because it provokes thinking about what makes media mean so much to humans in particular social, cultural, historical, and even technological contexts. The issue of the detrimental effects of "shared notions of deviance and social otherness" is evident in chapters that highlight original perspectives useful for either scholarly analysis or challenging, graduate-level classroom discussions. Also, because the collection includes literary analysis, it

could serve well those with interest in literary criticism." ELESHA RUMINSKI, Ph.D., is an assistant professor of English at Indiana University of Pennsylvania with experience teaching mass communication, film studies, and visual communication.
