Effective and practical coaching strategies for new educators plus valuable online coaching tools Many teachers are only observed one or two times per year on average—and, even among those who are observed, scarcely any are given feedback as to how they could improve. The bottom line is clear: teachers do not need to be evaluated so much as they need to be developed and coached. In *Get Better Faster: A 90-Day Plan for Coaching New Teachers*, Paul Bambrick-Santoyo shares instructive tools of how school leaders can effectively guide new teachers to success. Over the course of the book, he breaks down the most critical actions

leaders and teachers must take to achieve exemplary results. Designed for coaches as well as beginning teachers, *Get Better Faster* is an integral coaching tool for any school leader eager to help their teachers succeed. *Get Better Faster* focuses on what's practical and actionable which makes the book's approach to coaching so effective. By practicing the concrete actions and micro-skills listed in *Get Better Faster*, teachers will markedly improve their ability to lead a class, producing a steady chain reaction of future teaching success. Though focused heavily on the first 90 days of teacher development, it's possible to implement this work at any time. Junior and experienced teachers alike can benefit from the guidance of *Get Better Faster* while at the same time closing existing instructional gaps. "Prove It With Figures" displays some of the tools of the social and statistical sciences that have been applied to the proof of facts in the

courtroom and to the jury selection, study of questions of employment legal importance. It explains how researchers can extract the most valuable and reliable data that can conveniently be made available, and how these efforts sometimes go awry. In the tradition of Zeisel's "Say It with Figures," a standard in the field of social statistics since 1947, it clarifies, in non-technical language, some of the basic problems common to all efforts to discern cause-and-effect relationships. Designed as a textbook for law students who seek an appreciation of the power and limits of empirical methods, the work also is a useful reference for lawyers, policymakers, and members of the public who would like to improve their critical understanding of the statistics presented to them. The many case histories include analyses of the death penalty,

discrimination, mass torts, and DNA profiling. Hans Zeisel was Professor of Law and Sociology Emeritus at the University of Chicago, where he pioneered the application of social science to the law. Earlier, he had a distinguished career in public opinion and market research. He has written on a wide variety of topics, ranging from research methodology and history to law enforcement, juries, and Shakespeare. He was elected Fellow of the American Statistical Association and the American Association for the Advancement of Science, and in 1980 he was inducted into the Market Research Hall of Fame. David Kaye is Regents Professor at the Arizona State University, where he teaches evidence and related topics. An author of several law textbooks and treatises, his work also has appeared in journals of

She's off limits. He has none. There's a girl. Beautiful. Popular. Fake. And my obsession. My fall. Probably my damnation. Did that stop me? Do I care? No and no. There's a line between right and wrong. Moral and immoral. And then there's her. I cross every limit with blood-coated fingers. She says she hates me. I say I hate her too as I trap her, own her. An illustrated exploration of  
fandom that combines academic  
essays with artist pages and  
experimental texts. Fandom as  
Methodology examines fandom

---

as a set of practices for approaching and writing about art. The collection includes experimental texts, autobiography, fiction, and new academic perspectives on fandom in and as art. Key to the idea of “fandom as methodology” is a focus on the potential for fandom in art to create oppositional spaces, communities, and practices, particularly from queer perspectives, but also through transnational, feminist and artist-of-color fandoms. The book provides a range of examples of artists and writers working in this vein, as well as academic essays that explore the ways in which fandom can be theorized as a methodology for art practice and art history. Fandom as Methodology proposes that many artists and art writers already draw on affective strategies found in fandom. With the current focus in many areas of art history, art writing, and performance studies around affective engagement with artworks and imaginative potentials, fandom is a key methodology that has yet to be explored. Interwoven into the academic essays are lavishly designed artist pages in which artists offer an introduction to their use of fandom as methodology. Contributors Taylor J. Acosta, Catherine Grant, Dominic Johnson, Kate Random Love, Maud Lavin, Owen G. Parry, Alice Butler, SooJin Lee, Jenny Lin, Judy Batalion, Ika Willis. Artists featured in the artist pages Jeremy Deller, Ego Ahaïwe Sowinski, Anna Bunting-Branch, Maria Fusco, Cathy Lomax, Kamau Amu Patton, Holly Pester, Dawn Mellor, Michelle Williams

Originally presented at the second annual Whole Language Umbrella Conference, the 18 essays in this book address the three related themes of identity, responsibility, and practice. The essays in the book discuss how whole language is defined, and how its practitioners come to define themselves; how whole

language teachers act upon their identities through being informed, responsive, and accountable; and how identity and responsibility work together to inform daily practice in the classroom. After "Introduction: Three Themes" (Richard J. Meyer and Alan D. Flurkey), the essays in the book are: (1) "Many Cultures, Many Voices" (Dorothy Watson); (2) "I Hear Voices" (Judith Wells Lindfors); (3) "Whole Language Assessment and Evaluation: Connecting with Parents" (Norma Mickelson); (4) "Research about Whole Language; Research for Whole Language" (Carole Edelsky); (5) "Patriotic Literacy: The Intersection of Whole Language Philosophy and the Bill of Rights" (Patrick Shannon); (6) "The Bible and Whole Language" (Adrian Peetoom); (7) "The Myths and Realities of Whole Language: An Educational Movement at Risk" (David B. Freeing the Spirit of Enquiry  
The Science Delusion is the belief that science already understands the nature of reality. The fundamental questions are answered, leaving only the details to be filled in. In this book (published in the US as *Science Set Free*), Dr Rupert Sheldrake, one of the world's most innovative scientists, shows that science is being constricted

---

by assumptions that have hardened into dogmas. The 'scientific worldview' has become a belief system. All reality is material or physical. The world is a machine, made up of dead matter. Nature is purposeless. Consciousness is nothing but the physical activity of the brain. Free will is an illusion. God exists only as an idea in human minds, imprisoned within our skulls. Sheldrake examines these dogmas scientifically, and shows persuasively that science would be better off without them: freer, more interesting, and more fun. In *The God Delusion* Richard Dawkins used science to bash God, but here Rupert Sheldrake shows that Dawkins' understanding of what science can do is old-fashioned and itself a delusion.
