Although science may claim to be "objective," scientists cannot avoid the influence of their own values on their research. In *The State of Nature*, Gregg Mitman examines the relationship between issues in early twentieth-century American society and the sciences of evolution and ecology to reveal how explicit social and political concerns influenced the scientific agenda of biologists at the University of Chicago and throughout the United States during the first half of this century. Reacting against the view of nature "red in tooth and claw," ecologists and behavioral biologists such as Warder Clyde Allee, Alfred Emerson, and their colleagues developed research programs they hoped would validate and promote an image of human society as essentially cooperative rather than competitive. Mitman argues that Allee's religious training and pacifist convictions shaped his pioneering studies of animal communities in a way that could be generalized to denounce the view that war is in our genes.

NATIONAL BESTSELLER • From the acclaimed Nobel Prize winner—a powerful examination of our obsession with beauty and conformity that asks questions about race, class, and gender with characteristic subtlety and grace. In Morrison's acclaimed first novel, *Pecola Breedlove*—an 11-year-old Black girl in an America whose love for its blond, blue-eyed children can devastate all others—prays for her eyes to turn blue: so that she will be beautiful, so that people will look at her, so that her world will be different. This is the story of the nightmare at the heart of her yearning, and the tragedy of its fulfillment. Here, Morrison's writing is "so precise, so faithful to speech and so charged with pain and wonder that the novel becomes poetry" (The New York Times).

Writing, for most of us, is bound up with anxiety. It's even worse when it feels like your whole future—or at least where you'll spend the next four years in college—is on the line. It's easy to understand why so many high school seniors put off working on their applications until the last minute or end up with a generic and clichéd essay. The good news? You already have the "secret sauce" for crafting a compelling personal essay: your own experiences and your unique voice. The best essays rarely catalog how students have succeeded or achieved. Good writing shows the reader how you've struggled and describes mistakes you've made. Excellent essays express what you're fired up about, illustrate how you think, and illuminate the ways you've grown. More than twenty million students apply to college every year; many of them look similar in terms of test scores, grades, courses taken, extracurricular

activities. Admissions officers wade through piles of files. As an applicant, you need to think about what will interest an exhausted reader. What can you write that will make her argue to admit you instead of the thousands of other applicants? A good essay will be conversational and rich in vivid details, and it could only be written by one person—you. This book will help you figure out how to find and present the best in yourself. You'll acquire some useful tools for writing well—and may even have fun—in the process.
