“ A robustly researched and smoothly written overview of the many challenges confronting our devotion to fossil fuels ” from the author of *Tar Sands* (Quill & Quire). Ancient civilizations relied on shackled human muscle. It took the energy of slaves to plant crops, clothe emperors, and build cities. Nineteenth-century slaveholders viewed critics as hostilely as oil companies and governments now regard environmentalists.

Yet the abolition movement had an invisible ally: coal and oil. As the world ’ s most versatile workers, fossil fuels replenished slavery ’ s ranks with combustion engines and other labor-saving tools. Since then, cheap oil has transformed politics, economics, science, agriculture, and even our concept of happiness. Many North Americans today live as extravagantly as Caribbean plantation owners. We feel entitled to surplus energy and

rationalize inequality, even barbarity, to get it. But endless growth is an illusion. In this provocative book, Andrew Nikiforuk, winner of the Rachel Carson Environment Book Award, argues that what we need is a radical emancipation movement that ends our master-and-slave approach to energy. We must learn to use energy on a moral, just, and truly human scale. Published in Partnership with the David Suzuki Institute “ In his cautionary tale

---

about the evils of oil . . . Nikiforuk makes his case for impending doom if we don ' t mend our energy-spending ways. ”  
—The Star “ In this cogently argued book, Andrew Nikiforuk deploys a powerful metaphor. Oil dependency, he writes, is a modern form of slavery—and it ' s time for a global abolition movement. ”  
—Taras Grescoe, author of Shanghai Grand “ A startling critique that should rouse us from our pipe dream of endless plenty. ”

—Ronald Wright, author of *On Fiji Islands*  
*Advances in Geroscience*  
Peterson's *Design Recommendations for Intelligent Tutoring Systems (ITSs)* explores the impact of intelligent tutoring system design on education and training. Specifically, this volume examines “ *Authoring Tools and Expert Modeling Techniques* ” . The “ *Design Recommendations* ” book series examines tools and methods to reduce the time and skill required to develop *Intelligent Tutoring Systems* with the

goal of improving the *Generalized Intelligent Framework for Tutoring (GIFT)*. GIFT is a modular, service-oriented architecture developed to capture simplified authoring techniques, promote reuse and standardization of ITSs along with automated instructional techniques and effectiveness evaluation capabilities for adaptive tutoring tools and methods.

Called a "masterpiece" in a starred review from School Library Journal, award-winning author Chris

Crutcher's acclaimed *Staying Fat for Sarah Byrnes* is an enduring classic. This bestselling novel is about love, loyalty, and friendship in the face of adversity.

"Superb plotting,

---

extraordinary characters, and cracking narrative make this novel unforgettable. ” —Publishers Weekly Sarah Byrnes and Eric Calhoun have been friends for years. When they were children, his weight and her scars made them both outcasts. Now Sarah Byrnes—the smartest, toughest person Eric has ever known—sits silent in a hospital. Eric must uncover the terrible secret she’s hiding before its dark current

pulls them both under. Will appeal to fans of Marieke Nijkamp, Andrew Smith, and John Corey Whaley. “ Once again, Chris Crutcher plunges his readers into life's tough issues within a compelling story filled with human compassion . . . with his characteristic intelligence, humor, and empathy.”—ALA N Review An American Library Association Best Book for Young Adults A Love Story Simon and

Schuster  
This book provides the first comprehensive overview of a new scientific discipline termed Geroscience. Geroscience examines the molecular and cellular mechanisms that might explain why aging is the main risk factor for most chronic diseases affecting the elderly population. Over the past few decades, researchers have made impressive progress in understanding the genetics, biology and physiology of aging. This book presents vital research that can help readers to better understand

how aging is a critical malleable risk factor in most chronic diseases, which, in turn, could lead to interventions that can help increase a healthy lifespan, or 'healthspan.' The book begins with an analysis of the Geroscience hypothesis, as well as the epidemiological underpinnings that define aging as a candidate main risk factor for most chronic diseases. Next, each chapter focuses on one particular disease, or group of diseases, with an emphasis on how basic molecular and cellular biology might explain why aging is a major risk factor for it. Coverage in the book includes: cancer, cardiovascular disease, dementias, stroke, Parkinson's and Alzheimer's diseases, osteoporosis, arthritis, diabetes asthma, emphysema, kidney disease, vision impairment, and AIDS/HIV. It finishes with a chapter on pain in the elderly and an overview of future steps needed to bring the newly acquired knowledge into the clinic and the public at large.

Oil and the New Servitude Ct Department of Envir Protection Have a ball with Dr. Seuss and the Cat in the Hat in this classic picture book...but don't forget to clean up your mess! A dreary day turns into a wild romp when this beloved story introduces readers to the Cat in the Hat and his troublemaking friends, Thing 1 and Thing 2. A favorite among kids, parents and

teachers, this story uses simple words and basic ryme to encourage and delight beginning readers. Then he said "That is that." And then he was gone With a tip of his hat. Originally created by Dr. Seuss himself, Beginner Books are fun, funny, and easy to read. These unjacketed hardcover early readers encourage children to read all on their own, using simple words

---

and illustrations. Smaller than the classic large format Seuss picture books like *The Lorax* and *Oh, The Places You 'll Go!*, these portable packages are perfect for practicing readers ages 3-7, and lucky parents too! Living Language Korean McGraw Hill Professional Modern culture would have you believe that everyone has a soul mate; that romance is the most important part of a successful

marriage; that marriage does not mean 'til death do us part, but merely for as long as my needs are being met; and that when serious differences arise, divorce is the best solution. According to the Bible, all of these modern-day assumptions miss what marriage is all about. In this six-session video-based Bible study (DVD/digital video sold separately), Timothy Keller, along with Kathy, his wife of forty years,

draws a profound portrait of marriage from the pages of Scripture that neither idealizes nor rejects the institution but points us back to the relationship between God and man. The result is a vision for marriage that is refreshingly frank and unsentimental, yet hopeful and beautiful. This study is for anyone from singles to couples considering marriage to those who have been married recently or for a long time. Sessions

Perfect Phrases to stand out on the TOEFL-for the more than 800,000 people who take the test

To be accepted into most North American undergraduate and graduate programs, international students must take and pass the Test of English as a Foreign Language.

Perfect Phrases for the TOEFL Speaking and Writing Sections gives you all the phrases and most commonly used words you

---

need to excel on both the writing and speaking sections of the test. Presented in the easy-to-understand Perfect Phrases format, these phrases allow you to effectively communicate and express yourself in standard American English, and to score your very best on the test. Brush Pen Lettering Practice Book Springer While not all natural disasters can be avoided, their impact on a population can

be mitigated through effective planning and preparedness. These are the lessons to be learned from Japan's own megadisaster: the Great East Japan Earthquake of 2011, the first disaster ever recorded that included an earthquake, a tsunami, a nuclear power plant accident, a power supply failure, and a large-scale disruption of supply chains. It is a sad fact that poor communities are often hardest hit

and take the longest to recover from disaster. Disaster risk management (DRM) should therefore be taken into account as a major development challenge, and countries must shift from a tradition of response to a culture of prevention and resilience. Learning from Megadisasters: Lessons from the Great East Japan Earthquake consolidates a set of 36 Knowledge Notes, research

---

results of a joint study undertaken by the Government of Japan and the World Bank. These notes highlight key lessons learned in seven DRM thematic clusters—structural measures; nonstructural measures; emergency response; reconstruction planning; hazard and risk information and decision making; the economics of disaster risk, risk management, and risk financing; and recovery and relocation.

Aimed at sharing Japanese cutting-edge knowledge with practitioners and decision makers, this book provides valuable guidance to other disaster-prone countries for mainstreaming DRM in their development policies and weathering their own natural disasters. A Vision for Married and Single People Pearson College Division Candidate gene based studies have identified a handful of aberrant CpG DNA methylation

events in prostate cancer (Brooks et al. 1998; Yegnasubramanian et al. 2004). However, large scale DNA methylation profiles have not been examined for normal prostates or prostate tumors. Additionally, the mechanisms behind these DNA methylation alterations are unknown. In this thesis, I describe the results of my efforts to better understand these previously unexplored areas of biology. For the study presented in this thesis, I quantitatively profiled 95 primary prostate tumors and 86 healthy prostate

---

tissue samples for their DNA methylation levels at 26,333 CpGs representing 14,104 gene promoters by using the Illumina HumanMethylation27 platform. When the profiles of the prostate tissue samples were compared, I observed a substantial number of tumor-specific DNA methylation alterations. A 2-class Significance Analysis of this dataset revealed 5,912 CpG sites with increased DNA methylation and 2,151 CpG sites with decreased DNA methylation in tumors (FDR
