CHAPTER X BANDAGES AND CARRIES The postman recently brought us a letter from a scoutmaster whose troop has lately become	famous for its good work in bandaging. We had written to him for advice, asking what his method of instruction was. Here is his letter: Dear Sirs: -- In reply to your recent letter asking how I teach bandaging to my troop, I want to tell you an experience that we had last May.	With twenty- four members of my troop and one assistant scoutmaster I was on a camping trip in the Black Hills. We had planned to follow what was said to be an old Indian trail and camp each day at the first good place we could find when the sun began to sink. On a Tuesday morning we started

The Small Wars

Manual is a manual on tactics and strategies for engaging in certain types of military operations created by the United States

Marine Corps. The purpose of this work is sharing experience and preserving the achievements of tactics and organization of small wars, or different military operations of the United States in countries where government is "unstable, inadequate, or unsatisfactory for the preservation of life and of such interests as are determined by the foreign policy" of the United States. The book starts with the definition of the term "small war" and continues into more than 500 pages on tactics, personnel structure, communication chain, transportation and logistics, military-civil relationship, psychological side of war, training, and

support of native armed organizations and much more. The book is extremely interesting as a manual on tactics, whether it is used for a military operation or any other sort of massive campaign involving a large part of population, like elections. For example, it contains a chapter telling how to plan and organize legally the disarmament of local population. It tells what laws should be issued and what organizations form, what sort of personnel should be involved and what should be their roles. A reader will find guidelines on how to distribute and spare resources needed for a campaign, and how to properly cross a river in a dangerous area.

Given the book's organization, structure and abundance of important information, covering different aspects of civil and military campaigns, this volume is a must-read for any person engaged in a state service or a student considering career in serving their country.

Please note This is NOT the current edition of the BSA Handbook. It is a reprint of an historical edition of the BSA Handbook. For the first time, we are pleased to present this facsimile copy of the 1910 Original Edition of the Boy Scouts of America Official Handbook!
Written primarily by Ernest Thompson Seton, with sections

added from Lieutenant General Sir Robert Baden-Powell's "Scouting for Boys" and "Aids to Scouting." The 1910 Original Edition is a milestone in the history of the Boy Scouts of America. Published only from July 1910 to March 1911, this short-lived BSA Handbook was cobbled together using material from Seton's earlier work "The Birch Bark Roll" and then fused with Baden-Powell's Boy Scouts concept. Always meant as a temporary

<p>handbook until a proper one could be written and published, the 1910 Original Edition is super interesting and contains a wealth of woodsman's lore and military scouting techniques and training which do not appear in later editions of the BSA Handbooks. Many experts consider this book to be quite a useful backwoods survival manual, and it definitely has appeal to the modern "classic camping" movement. The content of this edition is</p>	<p>presented exactly as per the original, with the same page count, illustrations and table of contents. It's the original text exactly as it was presented in 1910 without some modern "expert" analysis or introduction. Today's reader can make up their own mind by actually reading the book. A perfect gift for the classic camping enthusiast, old Eagle Scout or the young Indiana Jones in your life. With all original illustrations, this new paperback replica edition</p>	<p>brings this exceptionally rare book to a 21st Century audience. Chapter VIII DRILLS AND DEMONSTRATIONS MANUAL OF MARCHING. Preliminary note. For the proper handling of large groups of boys the	requisites are: 1, A simple but definite drill manual and 2, a corps of Scout Masters who not only thoroughly understand it but can teach it and use it practically. Drills and marching are valuable, because of the qualities they develop in the individual boy such as obedience to command, mental alertness and a good carriage. The boys must know how to carry out the few orders required, must be obedient to command, prompt and must maintain a good carriage. Care must be taken, however, not to limit the operations of the boys to those

<p>movements for which these orders are given. The Scout Master should remember that the manual of drill is but a means to an end, that the temporary obedience to command required is only to enable them to do larger things in the line of their physical and mental development. The obedience is not a surrender of individuality. It should not end in suppression but expression. Divisions. Scouting for Rural Boys

Excerpt from Cooper's Cavalry Tactics, for the Use of Volunteers: To Which Is Added, a Manual for Colt's Revolver It is not to be expected that the militia or volunteer Cavalry are to be instructed in all the minutiae practiced by the regular Cavalry. It will be sufficient that every man learns the rudiments of Infantry formations, to act occasionally on foot, and to

mount and dismount with ease, sit his horse naturally, and to have his stirrups sufficiently short to enable him to command his horse, and to rise in them to strike, when it may be necessary to use the sword or the lance. The man uvrés are simple and easy to be learned. The sword exercise is reduced to very few motions. It has not been thought necessary to enter into all the cuts usually practiced by Cavalry in the attack and defense; it is deemed sufficient that the militia or volunteer trooper should be able to draw and return his sword with agility, to pay the

compliments with grace, and for the attack, to come to the preparatory, of "raise sword," and dash at his adversary with cut, or point, as may be most effectual in the charge against horse or foot.
