Providing clinicians with a comprehensive, evidence-based summary of musculoskeletal health in pregnancy and postpartum, this is the first book of its kind to describe the physiologic changes, prevalence, etiology, diagnostic strategies, and effective treatments for the most common musculoskeletal clinical conditions encountered during this phase of life.

Lumbopelvic pain, upper and lower extremity diagnoses, labor and delivery considerations, including the impact on the pelvic floor, and medical therapeutics will be discussed. Additionally, the importance and influence of exercise in pregnancy, the long-term implications of musculoskeletal health in pregnancy and current and future directions for research will be addressed. The childbearing period is a time of remarkable reproductive and musculoskeletal change, predisposing women to potential injury, pain, and resultant disability. *Musculoskeletal Health in Pregnancy and Postpartum* offers musculoskeletal medicine specialists, obstetricians and any clinicians involved in the care of pregnant or postpartum women the tools necessary to prepare for, treat and prevent these concurrent injuries during an already challenging time.

"Working with Stories" is a textbook for people who want to use participatory narrative inquiry (PNI) in their communities and organizations. PNI methods help people discover insights, catch emerging trends, make decisions, generate ideas, resolve conflicts, and connect people. Participatory narrative inquiry draws on theory and practice in narrative inquiry, participatory action research, oral history, mixed-methods research, participatory theatre, narrative therapy, sensemaking, complexity theory, and decision support. Its focus is on the exploration of values, beliefs, feelings, and perspectives through collaborative sensemaking with stories of lived experience. Contents Introduction Fundamentals of Story Work What Is a Story? What Are Stories For? How Do Stories Work? It's an amazing piece of work, so simple (not the ideas, but the presentation) and unintimidating." "[Working With Stories]" is very thorough and helpful to me in exploring ways that I might capture the narrative of a project I am involved in." "Your detailed description of [the sensemaking] process is so useful and helpful. It makes seasoned facilitators like me yearn to try out the ideas." "Over the past few months I have been reading, reflecting, and feasting on your experiences working with stories. I am really excited to have found "Working With Stories" because it seems like a rich set of options for our needs." "Your terminology and explanation of participatory narrative inquiry have helped me greatly in understanding what I want from my practice and what I might be capable of achieving in social change." "I have been returning to Working With Stories time and again over the past six months to help support a community project, and my printed copy is underlined, noted and dog-eared."

The Girlfriends' Guide to Baby Gear Cornell University Press

Stranger Citizens examines how foreign migrants who resided in the United States gave shape to citizenship in the decades after American independence in 1783. During this formative time, lawmakers attempted to shape citizenship and the place of immigrants in the new nation, while granting the national government new powers such as deportation. John McNelis O'Keefe argues that despite the challenges of public and official hostility that they faced in the late 1700s and early 1800s, migrant groups worked through lobbying, engagement with government officials, and public protest to create forms of citizenship that worked for them. This push was made not only by white men immigrating from Europe; immigrants of color were able to secure footholds of rights and citizenship, while migrant women asserted legal independence, challenging traditional notions of women's subordination. Stranger Citizens emphasizes the making of citizenship from the perspectives of migrants themselves, and demonstrates the rich varieties and understandings of citizenship and personhood exercised by foreign migrants and refugees. O'Keefe boldly reverses the top-down model wherein citizenship was constructed only by political leaders and the courts. Thanks to generous funding from the Sustainable History Monograph Pilot and the Mellon Foundation the ebook editions of this book are available as Open Access (OA) volumes from Cornell Open (cornellopen.org) and other Open Access repositories.

As the Society for American Travel Writers Foundation declared, this guide is "...a must have even for families who only travel occasionally." Radar Instruction Manual Springer Nature

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Principles of Information Systems HarperCollins
This book covers the latest research on landmarks in GIS, including practical applications. It addresses perceptual and cognitive aspects of natural and artificial cognitive systems, computational aspects with respect to identifying or selecting landmarks for various purposes, and communication aspects of human-computer interaction for spatial information provision. Concise and organized, the book equips readers to handle complex conceptual aspects of trying to define and formally model these situations. The book provides a thorough review of the cognitive, conceptual, computational and communication aspects of GIS landmarks. This review is unique for comparing concepts across a spectrum of sub-disciplines in the field. Portions of the ideas discussed led to the world's first commercial navigation service using landmarks selected

with cognitive principles. Landmarks: GI Science for Intelligent Services targets practitioners and researchers working in geographic information science, computer science, information science, cognitive science, geography and psychology. Advanced-level students in computer science, geography and psychology will also find this book valuable as a secondary textbook or reference.

Dad's Guide to Twins Timber Press

This open access book investigates the link between income inequality and socio-economic residential segregation in 24 large urban regions in Africa, Asia, Australia, Europe, North America, and South America. It offers a unique global overview of segregation trends based on case studies by local author teams. The book shows important global trends in segregation, and proposes a Global Segregation Thesis. Rising inequalities lead to rising levels of socio-economic segregation almost everywhere in the world. Levels of inequality and segregation are higher in cities in lower income countries, but the growth in inequality and segregation is faster in cities in high-income countries. This is causing convergence of segregation trends. Professionalisation of the workforce is leading to changing residential patterns. High-income workers are moving to city centres or to attractive coastal areas and gated communities, while poverty is increasingly suburbanising. As a result, the urban geography of inequality changes faster and is more pronounced than changes in segregation levels. Rising levels of inequality and segregation pose huge challenges for the future social sustainability of cities, as cities are no longer places of opportunities for all.

Power is the essence of politics. Whoever seeks to understand and master it must understand its logic. Drawing on two decades of international experience in political consulting, Dominik Meier and Christian Blum give profound and honest insights into the inner workings of power. Introducing their Power Leadership Approach, the authors provide a conceptual analysis of power and present the tools to successfully exercise it in the political domain. "Power and its Logic" is a guidebook for politicians, business leaders, civil society pioneers, public affairs consultants and for every citizen who wants to understand the unwritten rules of politics.

Contemporary psychodynamic theory profoundly impacts our understanding of the development of psychopathology in children and adolescents. This book creates new concepts derived from contemporary psychodynamic theory that necessitate a revision to the principles underlying our understanding of and approach to young patients in psychotherapy. Moreover, this book reviews recent contributions from contemporary two-person relational psychodynamic theory and makes use of detailed case examples to bring to life this theory's practical applications in child and adolescent psychotherapy. Psychotherapists and students of psychotherapy will find this book a valuable source of information on contemporary psychodynamic theory and a useful resource for introducing a contemporary style into their practice, co-constructing with the patient a narrative to achieve the desired goals.
