The Ownership of the News Harvard University Press

This report examines the impact that media ownership can have on the news and the effect of consolidation on the newspaper, television and radio industries. The newspaper industry is facing severe problems as readership levels fall; young people turn to other sources of news; and advertising moves to the internet. Newspaper companies are having to make savings and this is having a particular impact on investment in news gathering and investigative journalism. In television news the same trends are evident. Most news programmes have smaller audiences than they had ten years ago; younger people in particular are watching less television news; commercial television channels are losing advertising revenue to the internet. New media, in

particular the internet, are having a major impact on the way news is produced and consumed, but the traditional forms of news are likely to be the most popular sources of news for the foreseeable future. The proliferation of news sources has not been matched by a corresponding expansion in professional and investigative journalism. Owners can and do influence the news in a variety of ways. They are in a position to have significant political impact. The consolidation of media ownership adds to the risk of disproportionate influence. The Committee recommends reform of the public interest test criteria for newspaper mergers and also believes that reforming cross-media ownership restrictions on regional and local newspaper and radio mergers is necessary. The Committee does not consider changes in ownership regulation

and competition law to be enough if the aim is to ensure a range of voices and high quality news. The public service broadcasting system in the United Kingdom provides an invaluable news service for the citizen and it is crucial that the contribution of all the public service broadcasters is maintained. Microeconomics Prentice Hall Professional Television had, until recently, a social and cultural purpose. The BBC, and to a lesser extent ITV and Channel 4, were committed by the legal instruments establishing them to develop and maintain these purposes. With the enlargement of the range of choices for viewers by digital television and the provision of access to cable and satellite TV and the Internet, the role of the terrestrial television channels is being diluted. The authors examine the effects of this and consider whether anything can be done to maintain the

standards and quality of television at a time of unlimited competition.

Media Programming: Strategies and Practices John Wiley & Sons
The collision of new technologies, changing business strategies, and innovative storytelling that produced a new golden age of TV. Cable television channels were once the backwater of American television, programming recent and not-so-recent movies and reruns of network shows. Then came *La Femme Nikita*, *OZ*, *The Sopranos*, *Mad Men*, *Game of Thrones*, and *The Walking Dead*. And then, just as "prestige cable" became a category, came

House of Cards and Netflix, Hulu, Amazon Video, and other Internet distributors of television content. What happened? In *We Now Disrupt This Broadcast*, Amanda Lotz chronicles the collision of new technologies, changing business strategies, and innovative storytelling that produced an era termed "peak TV." Lotz explains that changes in the business of television expanded the creative possibilities of television. She describes the costly infrastructure rebuilding undertaken by cable service providers in the late 1990s and the struggles of cable channels to produce (and pay for) original, scripted programming in order to stand out from the competition. These new programs defied television conventions and made viewers adjust their expectations of what television could be. *Le Femme Nikita* offered cable's first antihero, *Mad Men* cost more than advertisers paid, *The Walking Dead* became the first mass cable hit, and *Game of Thrones* was the first global television blockbuster. Internet streaming didn't kill cable, Lotz tells us. Rather, it revolutionized how we watch television. Cable and network television quickly

established their own streaming portals. Meanwhile, cable service providers had quietly transformed themselves into Internet providers, able to profit from both prestige cable and streaming services. Far from being dead, television continues to transform.

Moral decision-making made easier From Internet access to lottery tickets, from pet ownership to R-rated entertainment, we're faced with more ethical decisions than we might realize, every single day. What's a person to do - especially when there is no definitive Catholic teaching on a subject? Do we just brush off these pesky moral dilemmas? Do we happily live in the gray areas of life and simply go along with conventional wisdom? Or do we make an honest attempt to face these moral questions head on? The way we deal with these seemingly small ethical decisions can have a huge impact on our own lives as well as those of our children and families. This book is an

ethical toolbox, providing you with a process for making confident choices, asking yourself challenging questions, developing moral virtue, and discovering deeper happiness. "A bracing wake-up call to those of us who often overlook the moral dimensions of the decisions we make in everyday life. Mark Latkovic gently guides us through the ethical minefield of contemporary society." - Mary Ann Glendon, Learned Hand Professor of Law at Harvard Law School "The book will be particularly welcome to parents and catechists, as they fulfill their responsibilities for giving moral guidance to the next generation of believers." - Archbishop Allen H. Vigneron, Detroit "Not only a reliable guide to resolving some of the ethical questions we face in our everyday lives, it is a guidebook to thinking well about decisions that shape our characters." - Robert P. George, McCormick Professor of

Jurisprudence, Princeton University About the Author Dr. Mark S. Latkovic is professor of moral and systematic theology at Sacred Heart Major Seminary in Detroit, Michigan, and the author of numerous articles, essays, and other writings on moral theology. He is also a nationally known speaker, panelist, reviewer, and consultant. Dr. Latkovic and his wife, Christine, have four children.

Communication Technology Update and Fundamentals Federal Regulatory Guide
"The closer the new media future gets, the further victory appears." --Michael Wolff
This is a book about what happens when the smartest people in the room decide something

is inevitable, and yet it doesn't come to pass. What happens when omens have been misread, tea leaves misinterpreted, gurus embarrassed? Twenty years after the Netscape IPO, ten years after the birth of YouTube, and five years after the first iPad, the Internet has still not destroyed the giants of old media. CBS, News Corp, Disney, Comcast, Time Warner, and their peers are still alive, kicking, and making big bucks. The New York Times still earns far more from print ads than from digital ads. Super Bowl commercials are more valuable than ever. Banner ad space on Yahoo can be bought for a relative pittance. Sure, the darlings of new media—Buzzfeed, HuffPo, Politico, and many more—keep attracting ever more traffic, in some cases truly phenomenal traffic. But as Michael Wolff shows in this fascinating and sure-to-be-controversial book, their buzz and venture

financing rounds are based on assumptions that were wrong from the start, and become more wrong with each passing year. The consequences of this folly are far reaching for anyone who cares about good journalism, enjoys bingeing on Netflix, works with advertising, or plans to have a role in the future of the Internet. Wolff set out to write an honest guide to the changing media landscape, based on a clear-eyed evaluation of who really makes money and how. His conclusion: The Web, social media, and various mobile platforms are not the new television. Television is the new television. We all know that Google and Facebook are thriving by selling online ads—but they ’ re aggregators, not content creators. As major brands conclude that banner ads next to text basically don ’ t work, the value of digital traffic to content-driven sites has plummeted, while the value of a television audience continues to rise. Even if millions now watch television on their phones via their Netflix, Hulu, and HBO GO apps, that doesn ’ t change the balance of power. Television by any other name is the game everybody is trying to win—including outlets like The Wall Street Journal that never used to play the game at all. Drawing on his unparalleled sources in corner offices from Rockefeller Center to Beverly Hills, Wolff tells us what ’ s really going on, which emperors have no clothes, and which supposed geniuses are due for a major fall. Whether he riles you or makes you cheer, his book will change how you think about media, technology, and the way we live now.
