Joblessness is the root cause of the global unrest threatening American security. Fostering entrepreneurship is the remedy. The combined weight of American diplomacy and military power cannot end unrest and extremism in the Middle East and other troubled regions of the world, Steven Koltai argues. Koltai says an alternative approach would work: investing in entrepreneurship and reaping the benefits of the jobs created through entrepreneurial startups. From 9/11 and the Arab Spring to the self-proclaimed Islamic caliphate, instability and terror breed where young people cannot find jobs. Koltai marshals evidence to show that joblessness—not religious or cultural conflict—is the root cause of the unrest that vexes American

foreign policy and threatens international security. Drawing on Koltai's stint as senior adviser for Entrepreneurship in Secretary Hillary Clinton's State Department, and his thirty-year career as a successful entrepreneur and business executive, Peace through Entrepreneurship argues for the significant elevation of entrepreneurship in the service of foreign policy; not rural microfinance or mercantile trading but the scalable stuff of Silicon Valley and Sam Walton, generating the vast majority of new jobs in economies large and small. Peace through Entrepreneurship offers a nonmilitary, long-term solution at a time of disillusionment with Washington's "big development" approach to unstable and underdeveloped parts of the world—and when the new normal is fear of terrorist attacks against Western targets, beheadings in Syria, and jihad. Extremism will not be resolved by a war on terror. The answer, Koltai shows, is stimulating entrepreneurial economic opportunities for the virtually limitless supply of desperate, unemployed young men and women leading lives of endless economic frustration.

Objective Question Commerce - Corporate Accounting Springer
Starting in the early 1990s many emerging and developing economies (EDEs) liberalized their capital accounts, allowing greater freedom for international lenders and investors to enter their markets

as well as for their residents to borrow and invest in international financial markets. Despite recurrent crises, liberalization has continued and in fact accelerated in the new millennium. Integration has been greatly facilitated by progressively looser monetary policy in the United States, notably the policies that culminated in debt crises in the United States and Europe and the ultra-easy monetary policy adopted in response. Not only have their traditional cross-border linkages been deepened and external balance sheets expanded rapidly, but also foreign presence in their domestic financial markets and the presence of their nationals in foreign markets have reached unprecedented levels. As a result new channels have emerged for the transmission of financial shocks from global boom-bust cycles. Almost all EDEs are now vulnerable irrespective of their balance-of-payments, external debt, net foreign assets and international reserve positions although these play an important role in the way such shocks could impinge on them. This is a matter for concern since the multilateral system still lacks mechanisms for orderly resolution of financial crises with international dimensions. Playing with Fire provides an empirical account of deeper integration of EDEs into the global financial system and discusses its implications for stability and growth, focusing on the role of policies in the new millennium in both EDEs and the United States and Europe.

challenges widespread notions of sex work in India by examining solicitation in three spaces within the city of Mumbai that are seldom placed within the same analytic frame—brothels, streets, and public day-wage labor markets (nakas), where sexual commerce may be solicited discretely alongside other income-generating activities. Focusing on women who migrated to Mumbai from

rural, economically underdeveloped areas within India, Svati P. Shah argues that selling sexual services is one of a number of ways women working as laborers may earn a living, demonstrating that sex work, like day labor, is a part of India's vast informal economy. Here, various means of earning—legitimized or stigmatized, legal or illegal—overlap or exist in close proximity to one another, shaping a narrow field of livelihood options that women navigate daily. In the course of this rich ethnography, Shah discusses policing practices, migrants' access to housing and water, the idea of public space, critiques of states and citizenship, and the discursive location of violence within debates on sexual commerce. Throughout, the book analyzes the epistemology of prostitution, and the silences and secrets that constitute the discourse of sexual commerce on Mumbai's streets.

Commerce Reports Petrogav International

In addition to conflicts and related security disruptions in the Arab region, a significant fall in oil prices and their uncertain prospects have become a predominant economic concern, with prices plunging by more than 50 per cent in the second half of 2014. Nevertheless, member countries of the Gulf Cooperation Council (GCC) have continued to lead growth in the Arab region. This edition of the Survey of Economic and Social Developments in the Arab Region looks at the continued expansion of the non-oil sector as it maintains GCC economic growth. Lower oil prices have not yet negatively affected the GCC economically, although confidence has dropped with weakening stock markets and real estate transactions. Furthermore, lower oil prices have benefited oil-importing Arab countries by easing their balance-of-payment and fiscal constraints. With conflict and violence in the region, one of the main channels for economic stabilization has been intraregional flows of capital and remittances from the GCC countries.

This is a complete update of the best-selling undergraduate textbook on Electronic Commerce (EC). New to this 4th Edition is the addition of material on Social Commerce (two chapters); a new tutorial on the major EC support technologies, including cloud computing, RFID, and EDI; ten new learning outcomes; and video exercises added to most chapters. Wherever appropriate, material on Social Commerce has been added to existing chapters. Supplementary material includes an Instructor's Manual; Test Bank questions for each chapter; Powerpoint Lecture Notes; and a Companion Website that includes EC support technologies as well as online files. The book is organized into 12 chapters grouped into 6 parts. Part 1 is an Introduction to E-Commerce and E-Marketplaces. Part 2 focuses on EC Applications, while Part 3 looks at Emerging EC Platforms, with two new chapters on Social Commerce and Enterprise Social Networks. Part 4 examines EC Support Services, and Part 5 looks at E-Commerce Strategy and Implementation. Part 6 is a collection of online tutorials on Launching Online Businesses and EC Projects, with tutorials focusing on e-CRM; EC Technology; Business Intelligence, including Data-, Text-, and Web Mining;

E-Collaboration; and Competition in Cyberspace. the following="" tutorials="" are="" not="" related="" to="" any="" specific="" chapter.="" they="" cover="" the="" essentials="" ec="" technologies="" and="" provide="" a="" guide="" relevant="" resources.="" p

External powers commonly play a major role in efforts to break patterns of conflict and to instal stable and durable peace settlements. They do this not just by underwriting security arrangements, but also by being available to intervene at critical moments. This book considers the special (but by no means unique) case where the conflict is located in a region of one state over which a neighbouring state has had a territorial claim, itself part of the legacy of a quasi-colonial relationship: Northern Ireland. This book focuses on the changes in the British state, whose writ of course extends over Northern Ireland, but also the Irish state, which surrendered a strong formal but ineffective claim to jurisdiction over Northern Ireland for the reality of a significant voice in its political future. These were ultimately to facilitate the process of settlement leading to the 1998 Good Friday Agreement, and the later transformation of institutions and political relations in Northern Ireland and in these islands more generally. It innovates by using a new oral archive built up over the past decade. The book explores the interrelations of different levels of state and institutional change. These interrelations range from the broadest concepts of sovereignty and ideology to the actual impact of large changes on particular institutions and laws. They also extend over elite political assumptions and strategies, and inter-state coordination practices. This book was published as a special

issue of Irish Political
Studies.
