Crack the code to college admissions and help students craft the ultimate statement of self-identity and get into their school of choice with this groundbreaking guide from America's College Counselor. On average, an admissions committee takes seconds to decide whether to admit a student. They must sum up the student in one sentence that will tell them if a student is going to be a good fit for their program. What is the best way to transform this admissions process from a stressful, pressure-cooker arms race into an empowering journey that paves the way to the best individual outcome? Written by a college admissions insider turned consultant, Soundbite guides parents and students through the admissions process from start to finish. Armed with her knowledge of how the system works, Sara Harberson shares tried-and-tested exercises that have helped thousands of students gain admission to their school of choice. The soundbite, her signature tool, presents an opportunity for students to take the reins to craft their ultimate statement of self-identity and formulate their own personal definition of what is best. With this soundbite in place as their foundation, students achieve maximum impact when they present themselves to colleges. In doing so, the tables are turned: the student's fate no longer rests on a soundbite composed by an admissions officer. Instead, the student employs their own soundbite to define themselves on their own terms. Soundbite shifts the way we talk about the admissions process—from "Getting You In" to "Getting the Best You In."
