Coaching is an essential skill for leaders. But for most busy, overworked managers, coaching employees is done badly, or not at all. They're just too busy, and it's too hard to change. But what if managers could coach their people in 10 minutes or less? In Michael Bungay Stanier's The Coaching Habit, coaching becomes a regular, informal part of your day so managers and their teams can work less hard and have more impact. Coaching is an art and it's far easier said than done. It takes courage to ask a question rather than offer up advice, provide an answer, or unleash a solution. Giving another person the opportunity to find their own way, make their own mistakes, and create their own wisdom is both brave and vulnerable. It can also mean unlearning our ''fix it'' habits. In this practical and inspiring book, Michael shares seven transformative questions that can make a difference in how we lead and support. And, he guides us through the tricky part - how to take this new information and turn it into habits and a daily practice. -Brené Brown, author of Rising Strong and Daring Greatly Drawing on years of experience training more than 10,000 busy managers from around the globe in practical, everyday coaching skills, Bungay Stanier reveals how to unlock your peoples' potential. He unpacks seven essential coaching questions to demonstrate how---by saying less and asking more--you can develop coaching methods that produce great results. - Get straight to the point in any conversation with The Kickstart Question - Stay on track during any interaction with The AWE Question - Save hours of time for yourself with The Lazy Question, and hours of time for others with The Strategic Question - Get to the heart of any interpersonal or external challenge with The Focus Question and The Foundation Question - Finally, ensure others find your coaching as beneficial as you do with The Learning Question A fresh, innovative take on the traditional how-to manual, the book combines insider information with research based in neuroscience and behavioural economics, together with interactive training tools to turn practical advice into practiced habits. Dynamic question-and-answer sections help identify old habits and kick-start new behaviour, making sure you get the most out of all seven chapters. Witty and conversational, The Coaching Habit takes your work--and your workplace--from good to great.

"The captain class" draws on a lifetime of sports spectatorship and two decades of sports reporting to tell the surprising story of what makes teams exceptional. Sam Walker had been searching for the sporting holy grail, a unifying theory of what makes teams win when he discovered certain similarities in cases of sustained greatness in teams across a number of sports. They were all lead by a certain

type of captain, but not one with the characteristics you might expect. They were unorthodox outliers - disagreeable, marginally skilled, hot-headed, occasionally unhinged, athletically sub-par, poor verbal communicators, while off the field they were private loners who avoided the limelight [Math, Grade 5](#) McGraw Hill Professional
It's not what students know, but what they do with what they know that is important Schools are changing in response to this reality, and in Transforming Schools Using Project-Based Learning, Performance Assessment, and Common Core Standards, Bob Lenz, Justin Wells, and Sally Kingston draw on the example of the Envision Education schools, as well as other leading schools around the country, to show how the concept of deeper learning can meet the need for students who are both college and career ready and engaged in their own education. In this book, the authors explain how project-based learning can blend with Common Core-aligned performance assessment for deeper learning. You'll discover how many schools have successfully made the transition from traditional, teacher-centered learning to project-based, deeper learning and find many practical ideas for implementation. Companion DVD and website include videos showing how to implement deeper learning strategies in the classroom Evidence-based descriptions show why deeper learning is right for students Performance assessment experts explain how to align assessments with Common Core by shifting the emphasis from knowing to doing Extensive game plan section provides step-by-step guidance for change Schools are complex organizations, and transformation involves all of the stakeholders, from students to superintendents. NLP (Neuro-Linguistic Programming) is believed by many to be a powerful set of tools for facilitating change and enhancing performance. Yet, despite the success stories and proliferation of courses, there is still much skepticism about the validity and effectiveness of NLP. In NLP Coaching Susie Linder-Pelz brings, for the first time, an evidence-based perspective to this coaching methodology. She explains how and where NLP coaching is used, examines its links to established principles and practices, and questions aspects of NLP where the empirical evidence is missing. She reviews recent developments in NLP-based coaching practice and proposes a specific research agenda that will move NLP coaching towards an evidence-based approach. NLP Coaching provides numerous case studies and real-life examples which show how NLP assists personal, professional, team, leadership and organizational development. The book includes contributions from leaders in the field: Andrew Bryant, Michelle Duval, Joseph O'Connor, Paul Tosey and Lisa Wake. [The Wim Hof Method](#) Evan-Moor Corporation

Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.
