Algebra is essential knowledge for a high school student trying to meet Common Core Standards.

Algebra is a branch of mathematics that uses letters and other symbols in equations to represent unknown values and then uses what is known to figure out what is unknown. For example, if $5x = 40$ (that is, 5 multiplied by x equals 40), you know that $x = 8$ because given what we've been told — the known information — 5 is the only number that makes the number sentence true ($5 \times 8 = 40$).
