On February 1, 2021, Myanmar's military coup abruptly ended a decade of a civilian-military hybrid regime – a massive setback for the democratisation process. Citizens from all walks of life took to the streets and protests erupted over the following weeks, and Myanmar became the centre of global attention. This book brings up to date how the story of Myanmar's experiment with democracy unravelled over the last few years. This second edition: ? Traces the political transition of Myanmar from a military rule of nearly five decades to a short-lived democratic experiment; ? Outlines the factors that contributed to this transition and the circumstances in which it took place; ? Shows how political groups – especially Aung San Suu Kyi's National League for Democracy (NLD) – and the military worked together and paved the way for democratisation and what led to the failure of the NLD government; ? Examines the 2020 general election and the declaration of national emergency following the NLD landslide electoral win. Bringing together a balance of primary ethnographic fieldwork and nuanced analysis, this book will be of great interest to scholars and researchers of Asian and Southeast Asian Studies, politics and political processes, democratisation process and democratic transitions, international relations and peace and conflict

studies, especially those concerned with Myanmar.

This volume argues that districts are important as a lever for change given the limited success of school-by-school efforts. Policies that focus on skill development, recognize and support performance, create opportunities for collaboration, build leader capacity, and create networks of knowledge sharing hold great potential for improving districts but it will require a paradigm shift in the way we view our public school system and those who work within it - away from blame and toward complex systems change.

This is a book about the internal dimension of the rule of law in the European Union (EU). The EU is a community based on law which adheres to and promotes a set of common values between the Member States. The preservation of these values (such as legality, legal certainty, prohibition of arbitrariness, respect for fundamental rights) is pivotal to the success of European integration and the well-being of the individuals within it. Yet, the EU rule of law suffers from an imposter syndrome and has been the subject of criticism: ie that it is only part of the EU agenda in order to legitimise sweeping new powers and policies, and that it plays little or no role in promoting a culture of compliance for either deviant EU Institutions or for Member States. This book will examine whether the EU rule of law deserves those criticisms. It will offer an analytical guide to the EU rule of law by conceptualising it and locating it within the sources of EU law. It will then ask whether the EU is based on the rule of law - a question which is answered in the affirmative, but one which has to be considered in the context of compliance and the overall effectiveness of the EU enforcement acquis. It is argued that while the EU means well in its aim to preserve unity in an increasingly diversified Europe, the extent to which it can pave the way to a better world (based on a transnational rule of law concept akin to good governance and improvement of citizens' lives) is dependent on the commitment of all European integration stakeholders to the EU project.

International trade policy, including the trade policies of the European Union (EU), has become controversial in recent years. This book illuminates the politicised process of the EU's contemporary trade negotiations. The book uses the notion of 'contentious market regulation' to examine contemporary EU Free-Trade Agreements (FTAs) with industrialised countries: the Transatlantic Trade and Investment Partnership with the USA (TTIP), the Comprehensive Economic and Trade Agreement with Canada (CETA), the EU-South Korea Agreement (KOREU), and the EU's agreement with Japan (EU-Japan). It also analyses cross-cutting issues affecting trade policy, such as business dimensions, social mobilisation, parliamentary assertion, and investment. This book was originally published as a special issue of the Journal of European Integration.

Market and competition authorities operate in a complex environment with conflicting stakeholder demands.

Balancing the various interests of the authority and stakeholder in an objective and impartial manner is strategic to achieving the goals of the legislation imposed. In a fresh approach examining the actions of an authority when a regulation is applied, Annetje Ottow argues the vital importance of the behaviour of authorities, focusing on five

fundamental good agency principles: legality, independence, transparency, effectiveness, and responsibility, or, LITER.

These principles provide agencies and those reviewing their actions with a framework for agency design and action.

Combining theory and practice to provide insight into agencies' organization and behaviour, this book outlines and analyses behavioural issues using an ecosystemic method, addressing how independent agencies should be assessed, and which principles should apply. Using cases from the Netherlands and the UK, Ottow examines the key processes of authorities against the LITER principles, and opens the debate on 'how to regulate the agency'.

North Korea's human rights violations are unparalleled in the contemporary world. In *Dying for Rights*, Sandra Fahy provides the definitive account of the abuses committed by the North Korean state, domestically and internationally, from its founding to the present. *Dying for Rights* scrutinizes North Korea's treatment of its own people as well as foreign nationals, how violations committed by the state spread into the international realm, and how North Korea uses its state media and presence at the United Nations. Fahy meticulously documents the extent of arbitrary detention, torture, executions, and the network of prison camps throughout the country. The book details systematic and widespread violations of freedom of speech and of movement, freedom from discrimination, and the rights to food and to life. Fahy weaves together public and private testimonies from North Koreans resettled abroad, as well as NGO reports, the stories and facts brought to light by the United Nations Commission of Inquiry into North Korea, and North Korea's own state media, to share powerful personal narratives of human rights abuses. A compassionate yet

objective investigation into the factors that sustain and perpetuate the flouting of basic rights, *Dying for Rights* reveals the profound culpability of the North Korean state in the systematic denial of human dignity.

The EU's emergence as an international security provider, under the first Common Security and Defence Policy (CSDP) operations in the Balkans in 2003, is a critical development in European integration. In this book, which relies on extensive interviews with CSDP officials, Michael E. Smith investigates how the challenge of launching new CSDP operations causes the EU to adapt itself in order to improve its performance in this realm, through the mechanism of experiential institutional learning. However, although this learning has helped to expand the overall

range and complexity of the CSDP, the effectiveness of this policy tool still varies widely depending on the nature of individual operations. The analysis also calls in to question whether the CSDP, and the EU's broader structures under the 2009 Treaty of Lisbon, are fit for purpose in light of the EU's growing strategic ambitions and the various security challenges facing Europe in recent years.

Most Americans had no idea what Common Core was in 2013, according to polls. But it had been creeping into schools nationwide over the previous three years, and children were feeling its effects. They cried over math homework so mystifying their parents could not help them, even in elementary school. They read motley assortments of "informational text" instead of classic literature. They dreaded the high-stakes tests, in unfamiliar formats, that were increasingly controlling their classrooms. How did this latest and most sweeping "reform" of American education come in mostly under the radar? Joy Pullmann started tugging on a thread of reports from worried parents and frustrated teachers, and it led to a big tangle of history and politics, intrigue and arrogance. She unwound it to discover how a cabal of private foundation honchos and unelected public officials cooked up a set of rules for what American children must learn in core K-12 classes, and how the Obama administration pressured states to adopt them. Thus a federalized education scheme took root, despite legal prohibitions against federal involvement in curriculum. Common Core and its testing regime were touted as "an absolute game-changer in public education," yet the evidence so far suggests that kids are actually learning less under it. Why, then, was such a costly and disruptive agenda imposed on the nation's schools? Who benefits? And how can citizens regain local self-governance in education, so their children's minds will be fed a more nourishing intellectual diet and be protected from the experiments of emboldened bureaucrats? *The Education Invasion* offers answers and remedies.
