The primary focus of this book is on a specific outcome of the rule of law: the practical enforcement of laws and policies, and the determinants of this enforcement, or lack thereof. Are there significant and persistent differences in implementation across countries? Why are some laws and policies more systematically enforced than others? Are “good” laws likely to be enacted, and if not, what stands in the way? We answer these questions using a theoretical framework and detailed empirical data and illustrate with case studies from Morocco, Tunisia and Jordan. We believe that the best way to understand the variation in the drafting and implementation of laws and policies is to examine the interests and incentives of those responsible for these tasks – policymakers and bureaucrats. If laws and their enforcement offer concrete benefits to these ruling elites, they are more likely to be systematically enforced. If they don't, implementation is selective, discretionary, if not nil. Our first contribution is in extending the application of the concept of the rule of law beyond its traditional focus on specific organizations like the courts and the police, to economic sectors such as customs, taxation and land inheritance, in a search for a direct causal relationship with economic development outcomes. Instead of limiting ourselves to a particular type of organization or a legalistic approach to the rule of law, we present a broader theory of how laws are made and implemented across different types of sectors and organizations. Our second contribution is in demonstrating how powerful interests affect implementation outcomes. The incentives elites have to build and support

rule-of-law institutions derive from the distribution of power in society, which is partly a historical given. The point we make is that it is not deterministic. Realigning the incentive structures for reform among key actors and organizations, through accountability and competition, can dramatically improve the chances that rule-of-law institutions will take root. On the other hand, building the capacity of organizations without first changing institutional incentives is likely to lead to perverse outcomes.

Diplomatic White Paper 2015 Bloomsbury Publishing In *English Language Learners and the New Standards*, three leading scholars present a clear vision and practical suggestions for helping teachers engage ELL students in simultaneously learning subject-area content, analytical practices, and language. This process requires three important shifts in our perspective on language and language learning—from an individual activity to a socially engaged activity; from a linear process aimed at correctness and fluency, to a developmental process, focused on comprehension and communication; and from a separate area of instruction to an approach that embeds language development in subject-area activities. In *English Language Learners and the New Standards*, the authors: Clarify the skills and knowledge teachers need to integrate content knowledge and language development Show how teachers can integrate formative assessment in ongoing teaching and learning Discuss key leverage points and stress points in using interim and summative assessments with ELLs Provide classroom vignettes illustrating key practices Finally, the authors explain the theories and research that underlie their vision and examine the role of policy in shaping pedagogy and assessment for ELL students.

29 Online JEE-Main Year Wise Solved Papers (2019-2012) with Solution and Detailed Analysis Cambridge University Press

The post-independence integration endeavor of the East African Community has been punctuated with challenges, culminating into the collapse of the 1967-1977 regional organization. The renaissance of the integration agenda since the re-establishment of the regional organization in 1999 has rekindled epistemological debate among scholars and practitioners on the East African Community

raison d'etre and integration process. This volume is the first of its kind in this ongoing debate that puts into proper context the nexus between the East African citizens and the integration agenda. Focusing on the Partner States case studies, the authors of the chapters operationalize the concepts of popular participation, eastafricanity, eastafricanization, democratization, and integration. Using political, national constitutions and EAC treaty, communication and awareness dimensions the authors of the chapters have analyzed the nexus between the EAC citizens and the integration process. The study generally proceeds from the premise that the exclusion of the EAC citizens from exercising their sovereign rights through popular participation undermines the prospects for the institutionalization and consolidation of the EAC identity, eastafricanity, eastafricanization, democratization and integration.

The Handbook provides a supporting guide to key aspects and applications of landscape ecology to underpin its research and teaching. A wide range of contributions written by expert researchers in the field summarize the latest knowledge on landscape ecology theory and concepts, landscape processes, methods and tools, and emerging frontiers. Landscape ecology is an interdisciplinary and holistic discipline, and this is reflected in the chapters contained in this Handbook. Authors from varying disciplinary backgrounds tackle key concepts such as landscape structure and function, scale and connectivity; landscape processes such as disturbance, flows, and fragmentation; methods such as remote sensing and mapping, fieldwork, pattern analysis, modelling, and participation and engagement in landscape planning; and emerging frontiers such as ecosystem services, landscape approaches to biodiversity conservation, and climate change. Each chapter provides a blend of the latest scientific understanding of its focal topics along with considerations and examples of their application from around the world. An invaluable guide to the concepts, methods, and applications of landscape ecology, this book will be an important reference text for a wide range of students and academics in ecology, geography, biology, and interdisciplinary environmental studies.

Handbook on Cohesion Policy in the EU UGC NET Paper I Chapter Wise Notebook | Common For All | Complete Preparation Guide
This book explores the relationship of mutual trust and fundamental rights in the Area of Freedom, Security and Justice (AFSJ) of the European Union and asks whether there is any role for proportionality. Mutual trust among Member States has long been presumed by the Court in a manner that mutual recognition was prioritised in regard to, but to the detriment of, the protection of fundamental rights. After thoroughly reviewing this relationship, this book offers a comprehensive framework of proportionality and explores its impact on the protection of fundamental rights in a mutual trust environment. It applies a theoretical and a normative framework of proportionality to two case studies (EU criminal and asylum law) by reference to several fundamental rights, enabling a carefully constructed analysis with useful parallels. The book argues that such analysis, based on proportionality, is not always desirable and helpful for the protection of fundamental rights in this area and thoroughly explores

its impact on the protection of fundamental rights vis-à-vis mutual trust.

CTET and TET Science and Pedagogy for Class 6 to 8 for 2021 Exams Oxford University Press

This volume book brings together nine background papers prepared for an evaluation by the IMF Independent Evaluation Office of "the IMF and the crises in Greece, Ireland, and Portugal." It presents an authoritative work on the evolving relationship between the IMF and the euro area, a common currency area founded in 1999 consisting of advanced, highly integrated economies in Europe. The euro area, or any common currency area for that matter, has posed challenges to the IMF's operational activities as its Articles of Agreement contain no provision for joint membership. The challenges became intense when a series of crises erupted in Greece, Ireland, and Portugal from 2009 to 2011, and the Fund was called upon to help intervene by offering its financing and crisis management expertise. The IMF found itself in uncharted territory where there was no precedent or established procedure. The chapters, many of which are prepared by prominent academics and former senior IMF officials who are thoroughly familiar with internal procedures, discuss various aspects of the IMF's engagement with the euro area, including precrisis surveillance, how key decisions were made, how the IMF collaborated with European institutions, and how it designed and implemented its lending programs with the three crisis countries. The book gives prominence to governance-related issues, given the large voting share (of more than 20 percent) within the IMF of euro area members and the subsequent public perception that the IMF treated the euro area more favorably than it does developing and emerging market members. The approaches are both cross-cutting and country-based. Some chapters deal with issues related to the euro area as a whole, while others focus on how the Fund engaged with individual euro area countries. The book contains a statement on the IEO evaluation by the IMF Managing Director and a Summing Up of the Executive Board discussion held in July 2016.

Concept Paper for the Implementation of Assembly Bill 2196 for the Renewables Portfolio Standard Edward Elgar Publishing

Revolutionary ideas on how to use markets to achieve fairness and prosperity for all Many blame today's economic inequality, stagnation, and political instability on the free market. The solution is to rein in the market, right? Radical Markets turns this thinking on its head. With a new foreword by Ethereum creator Vitalik Buterin and virtual reality pioneer Jaron Lanier as well as a new afterword by Eric Posner and Glen Weyl, this provocative book reveals bold new ways to organize markets for the good of everyone. It shows how the emancipatory force of genuinely open, free, and competitive markets can reawaken the dormant nineteenth-century spirit of liberal reform and lead to greater equality, prosperity, and cooperation. Only by radically expanding the scope of markets can we reduce inequality, restore robust economic growth, and resolve political conflicts. But to do that, we must replace our most sacred institutions with truly free and open competition—Radical Markets shows how. Arihant Publications India limited Pain Medicine, a relatively new specialty, has proven increasingly relevant to medical practitioners in every field. The specialism of pain has emerged over the past 50 years, largely due to the persistence of experts and new medical evidence that points to its necessity. Today, it is a distinct and integral part of global medical practice. Landmark Papers in Pain offers a comprehensive inventory of over 80 key studies in pain medicine from the last 100 years. Each paper is accompanied by a concise commentary on the significance of the original findings written by an expert in pain. The reviews discuss how the paper influenced the development of the speciality, and how the findings have advanced our global comprehension of pain. Together, the selected papers and reviews chart the

growth of an embryonic field into the modern speciality of pain medicine. Compiled by leading specialists in the field, the papers included in this book are significant for any student, researcher, clinical practitioner, or medical historian interested in pain medicine. Organised into eight distinct topics and cross-referenced by topics and author of original paper, the book is comprehensive in its coverage and easy to use. A review of the contemporary and historical research that shaped the speciality of pain, Landmark Papers in Pain is essential reading for all medical practitioners with an interest in pain medicine.
