Roadmap to the Grade 10 MCAS English Language Arts Common Core Grade 10 English Language Arts Secrets Study Guide Emma Gatewood was the first woman to hike the entire Appalachian Trail alone, as well as the first person—man or woman—to walk it twice and three times and she did it all after the age of 65. This is the first and only biography of Grandma Gatewood, as the reporters called her, who became a hiking celebrity in the 1950s and '60s. She appeared on TV with Groucho Marx and Art Linkletter, and on the pages of Sports Illustrated. The public attention she brought to the little-known footpath was unprecedented. Her vocal criticism of the lousy, difficult stretches led to bolstered maintenance, and very likely saved the trail from extinction. Author Ben Montgomery was given unprecedented access to Gatewood's own diaries, trail journals, and correspondence. He also unearthed historic newspaper and magazine articles and interviewed surviving family members and

hikers Gatewood met along the trail. The inspiring story of Emma Gatewood illustrates the full power of human spirit and determination.

This collection of innovative, thought-provoking papers discusses contemporary issues, practices and research related to the role and teaching of English in multilingual countries. The papers, written by experienced practitioners in the field from a number of different countries, examine how the English language can be more effectively taught to students in Asia who speak English as their second, third or fourth language. The book will be of interest not only to linguists, language teachers and educators but also to social science researchers involved in exploring the effects language policy can have on education and society at large. The eleven chapters in this book are divided into three sections: multilingual aspects in the teaching and learning of English, code-switching and code-mixing, and assessment. Their authors came to Karachi from different academic, cultural and geographic backgrounds and with diverse experiences of the world of English Language Teaching in order to participate in the Fifth International Seminar hosted by the Aga Khan University Centre of English Language. The contributors are all multi-linguals for whom the question of how best to teach languages is a challenge

they face on a daily basis. This small collection of papers is likely to become a powerful resource for English teachers, scholars, and researchers interested in the problems facing language educators in today ' s multilingual, multi-cultural world.

How do calendars and clocks influence considerations of school effectiveness? From the creation of compulsory education to the future of virtual schooling, Weiss and Brown trace two centuries of school practices, policies and research linking the concept of time with 'opportunity to learn'. School calendars and clocks are shaped by

---

both the physical and social worlds, and the ‘ clock of schooling ’ is shown to be one of the ‘ great clocks of society ’ that helps to frame school effectiveness. School time does not operate in a vacuum, but within curriculum, teaching and learning situations. The phrase ‘ chrono-curriculum ’ was devised by the authors as a metaphor for exploring issues of school effectiveness within the time dimension. Using American and Canadian sources, stories are created to illustrate four themes about time and school effectiveness. The first three stories utilize access, attendance and testing as criteria associated with these eras of schooling. How will the story read in the fourth era, the digital age, which forces us to a reconsideration of time and its influence on education? Quoting David Berliner in his Foreword: “ this is an opportune time for these authors to bring us insights into the reasons we in North America created our public school systems, and how the chrono-curriculum influences those systems. The authors ’ presentation of our educational past provides educators a chance to think anew about how we might do schooling in our own times. ”

“ This eloquent, elegant book thoughtfully plumbs the . . . consequences of our dependence on plastics ” (The Boston Globe, A Best Nonfiction Book of 2011). From pacemakers to disposable bags, plastic built the modern world. But a century into our love affair, we ’ re starting to realize it ’ s not such a healthy relationship. As journalist Susan Freinkel points out in this eye-opening book, we ’ re at a crisis point. Plastics draw

on dwindling fossil fuels, leach harmful chemicals, litter landscapes, and destroy marine life. We ’ re drowning in the stuff, and we need to start making some hard choices. Freinkel tells her story through eight familiar plastic objects: a comb, a chair, a Frisbee, an IV bag, a disposable lighter, a grocery bag, a soda bottle, and a credit card. With a blend of lively anecdotes and analysis, she sifts through scientific studies and economic data, reporting from China and across the United States to assess the real impact of plastic on our lives. Her conclusion is severe, but not without hope. Plastic points the way toward a new creative partnership with the material we love, hate, and can ’ t seem to live without. “ When you write about something so ubiquitous as plastic, you must be prepared to write in several modes, and Freinkel rises to this task. . . . She manages to render the most dull chemical reaction into vigorous, breathless sentences. ” —SF Gate  
“ Freinkel ’ s smart, well-written analysis of this love-hate relationship is likely to make plastic lovers take pause, plastic haters reluctantly realize its value, and all of us understand the importance of individual action, political will, and technological
