When grandchildren are young, a sweet treat or new toy is enough to inspire their unconditional adoration. And then your grandchildren grow up. Suddenly they are teenagers and it's not so easy. With our differences in musical tastes, technology, formative events . . . one could say we are from different worlds. *Where Two Worlds Meet* starts with the teenage years, recognizing that your grandchildren are becoming independent beings. It's an action-focused guide to stay connected and even deepen your relationship with your grandchildren as you both age. Parents will love this book too, as it helps grandparents respect boundaries as the grandparent, not the parent, and teaches how to develop healthy interdependence. All these ideas work whether you are in the same city or connecting from afar. Each chapter includes hands-on tactics to put learning into action. It's peppered with letters from grandchildren of diverse ages and backgrounds, sharing personal stories about a grandparent's impact on their lives. Grandparents can have a transformative effect on their family when they unleash their creativity, share their skills, and give voice to the things they are passionate about. Creativity is about bringing your whole self, including your vulnerability, to the relationship with your grandchildren as you enter each other's world.

The purpose of this manual is to provide clear and helpful information for maintaining gravel roads. Very little technical help is available to small agencies that are responsible for managing these roads. Gravel road maintenance has traditionally been "more of an art than a science" and very few formal standards exist. This manual contains guidelines to help answer the questions that arise concerning gravel road maintenance such as: What is enough surface crown? What is too much? What causes corrugation? The information is as nontechnical as possible without sacrificing clear guidelines and instructions on how to do the job right.

This volume centers on three important theoretical concepts for the study of language change and the ways in which language structure emerges and turns into new structure: reanalysis, actualization, and indexicality. Reanalysis is a part of ongoing everyday language use, a process through which language is reproduced and changed. Actualization refers to the processes through which a reanalyzed structure spreads throughout single communities and society. Indexicality covers the way in which parts of a linguistic system can point to other parts of the system, both syntagmatically and paradigmatically. The inclusion of indexicality leads to fine-grained analysis in morphology, word order, and constructional syntax.
