Writing an amazing college admission essay is easier than you think! So you're a high school senior given the task of writing a 650-word personal statement for your college application. Do you tell the story of your life, or a story from your life? Do you choose a single moment? If so, which one? The options seem endless. Lucky for you, they're not. College counselor Ethan Sawyer (aka The College Essay Guy) will show you that there are only four (really, four!) types of college admission essays. And all you have to do to figure out which type is best for you is answer two simple questions: 1. Have you experienced significant challenges in your life? 2. Do you know what you want to be or do in the future? With these questions providing the building blocks for your essay, Sawyer guides you through the rest of the process, from choosing a structure to revising your essay, and answers the big questions that have probably been keeping you up at night: How do I brag in a way that doesn't sound like bragging? and How do I make my essay, like, deep? Packed with tips, tricks, exercises, and sample essays from real students who got into their dream schools, *College Essay Essentials* is the only college essay guide to make this complicated process logical, simple, and (dare we say it?) a little bit fun.

Writing Assignments Across the University Curriculum as a whole asks and answers these questions: What kinds of documents do students write in a wide range of university degree

programs in Canada? How do instructors structure those writing assignments? That is, who is the audience for the assignments? Do students get formative feedback as they develop their documents? Do the patterns we found in a small liberal arts college (Graves, Hyland, and Samuels 2010) occur in other kinds of universities? We took our cue from an article by Anson and Dannels (2009) who pointed us toward the idea that students experience a curriculum through their degree progress in an academic program. Consequently, we needed to map the writing assignments according to how different departments organized these degree programs. Results that were organized by curricular unit (departments, faculties or colleges, or programs/units) were more significant than general statistics because students would progress through these courses to a degree. Several chapters in the book describe how this kind of curricular mapping provided a spark for curricular reform in Engineering, Education, and an entire small university. The last two chapters report on the instructors perspective on their assignments: what they were intending to do, and why they both resisted and engaged in curricular discussions.

Concepts and Models for Service-learning in History Cengage Learning
While transnational conglomerates consolidate their control of the global mediascape, local communities struggle to create democratic media systems. This groundbreaking study of community media, first published in 2005, combines original research with comparative and theoretical analysis in an engaging and accessible style. Kevin Howley explores the different ways in which local communities come to make use of various technologies such as radio, television, print and computer networks for purposes of community communication and considers the ways these technologies shape, and are shaped by, the everyday lived experience of local populations. He also addresses broader theoretical and philosophical issues surrounding the relationship between communication and community, media systems and the public sphere. Case studies illustrate the pivotal role community media play in promoting cultural production and communicative democracy within and between local communities. This book will make a significant contribution to existing scholarship in media and cultural studies on alternative, participatory and community-based media.

What does it mean to be Reformed Christians in the world today? and in Africa and South Africa? What does it mean to commemorate the legacy of John Calvin (1509-1564) after 500 years? in a modern world characterised by democracy, by popular notions of human dignity and human rights, by worldwide struggles for individual freedoms and for social justice, by a global economy in crisis? when social historians argue about the lasting contribution of Calvin and his followers precisely with respect to all these modern phenomena? The 28 essays by Dirkie Smit selected for this volume deal with such questions.

Composition research consistently demonstrates that the social context of writing determines the majority of conventions any writer must observe. Still, most universities organize the required first-year composition course as if there were an intuitive set of general writing "skills" usable across academic and work-world settings. In *College Writing and Beyond: A New Framework for University Writing Instruction*, Anne Beaufort reports on a longitudinal study comparing one student's experience in FYC, in history, in engineering, and in his post-college writing. Her data illuminate the struggle of college students to transfer what they learn about "general writing" from one context to another. Her findings suggest ultimately not that we must abolish FYC, but that we must go beyond even genre theory in reconceiving it. Accordingly, Beaufort would argue that the FYC course should abandon its hope to teach a sort of general academic discourse, and instead should systematically teach strategies of responding to contextual elements that impinge on the writing situation. Her data urge attention to issues of learning transfer, and to developmentally sound linkages in writing instruction within and across disciplines. Beaufort advocates special attention to discourse community theory, for its power to help students perceive and understand the context of writing.
