In elementary schools across the United States, many teachers tasked with teaching health

education or physical education have not had training in these areas. Health and Physical Education for Elementary Classroom Teachers: An Integrated Approach, Second Edition, is the perfect resource for these educators. It covers both health and physical education while giving current and preservice teachers the skills to deliver appropriate lessons to their young students. In this second edition, Retta Evans and Sandra Sims, respected

educators and physical education advocates, provide everything teachers need in order to seamlessly incorporate health education and physical education into an integrated curriculum. Based on national health education, physical education, and state-specific academic standards, this is a guide that will help teachers empower elementary students to become healthy and active. A new chapter dedicated to contextual considerations of the learner will guide teachers to

Canadian adaptation of the Fifth Edition of the AJN award-winning Community as Partner text. Focusing on public health promotion practices in Canada, this text examines the contemporary public health nurse's role as a hands-on caregiver, community detective, and epidemiologist. Part One provides a Canadian perspective on community nursing practice and legal, ethical, and sociocultural considerations. Part Two presents the Community as Partner Model, and Part Three contains case studies with Canadian examples.

This edition places more emphasis on supportive environments for health, the five strategies of the Ottawa Charter, primary health care, and rural communities. **Community Equity Audits** Addison-Wesley Fully updated and greatly enhanced, the Third Edition of Urban Forestry addresses current issues in planning, establishing, and managing trees, forests, and other elements of nature in urban and community ecosystems. The authors discuss why we have trees in cities and how we use them, clarify the appraisal and inventory of urban vegetation, and

extensively delve into the planning and management of public as well as private vegetation. As urban forestry continues to evolve as a profession, foresters and arborists can expect many challenges as well as opportunities. The continuing development of cities has become linked to a much greater emphasis on urban vegetation, the growing demand for recreation amenities within the urban environment, and the careful and successful management of vegetation in an urban ecosystem. New ways to incorporate the highly versatile urban forest resource into the urban fabric will undoubtedly benefit the lives of its residents.
