A major 2007 study of the impact of Home Rule on liberalism and popular radicalism in Britain and Ireland. Eugenio Biagini argues that between 1876 and 1906 the crisis of public conscience caused by the Home Rule debate acted as the main catalyst

in the remaking of popular radicalism. This was not only because of Ireland's intrinsic importance but also because the 'Irish cause' came to be identified with democracy, constitutional freedoms and humanitarianism. The related politics of emotionalism did not aid in finding a solution to either the Home Rule or the Ulster problem but it did create a popular culture of human rights based on the conviction that, ultimately, politics should be guided by non-negotiable moral imperatives. Adopting a comparative perspective, this

book explores the common ground between Irish and British democracy and makes a significant contribution to the history of human rights, imperialism and Victorian political culture. **Bob and Tom Get a Dog** Manning Publications
This is not a book about algorithms. This is not a book about architecture. This is not a book about frameworks. This is not even a book about project management, agile or otherwise. This is a book about "the other things" that are important

to writing and maintaining a sustainable code base. It's also a book about automation of parts of the programming process. If you're a CTO, the economic case for "code quality plus automation" is already strong, and getting stronger with each new iteration of hardware. If you're a programmer (maybe aspiring to be a CTO), it's about being able to concentrate on the stimulating, interesting, and creative parts of the craft, and getting the tedious

parts done for you. Much of the book is about the general craft of programming and helping programmers become more productive, and should be useful no matter what programming language(s) you've chosen. However, I find it works better to illustrate principles with examples. And this edition of the book picks examples from the PHP programming language.

happiness, serenity, and fulfillment in one's life and bring true peace to the world around. **A Record of Your Model's First Year** Author House Mobile agent computing is being used in fields as diverse as artificial intelligence, computational economics and robotics. Agents' ability to adapt dynamically and execute asynchronously and autonomously brings potential advantages in terms of fault-tolerance, flexibility and simplicity. This monograph focuses on studying mobile agents as modelled in distributed

systems research and in particular within the framework of research performed in the distributed algorithms community. It studies the fundamental question of how to achieve rendezvous, the gathering of two or more agents at the same node of a network. Like leader election, such an operation is a useful subroutine in more general computations that may require the agents to synchronize, share information, divide up chores, etc. The work provides an introduction to the algorithmic issues raised by the rendezvous problem

in the distributed computing setting. For the most part our investigation concentrates on the simplest case of two agents attempting to rendezvous on a ring network. Other situations including multiple agents, faulty nodes and other topologies are also examined. An extensive bibliography provides many pointers to related work not covered in the text. The presentation has a distinctly algorithmic, rigorous, distributed computing flavor and most results should be easily accessible to advanced undergraduate and

graduate students in computer science and mathematics departments. reports on the Korean War in a revolutionary way in this thoroughly researched and riveting book. Toland pored over military archives and was the first person to gain access to previously undisclosed Chinese records, which allowed him to investigate Chairman Mao's direct involvement in the conflict. Toland supplements his captivating history with in-depth interviews with more than two hundred American soldiers, as well as North Korean, South Korean, and Chinese combatants, plus dozens of poignant

photographs, bringing those who fought to vivid life and honoring the memory of those lost. In *Mortal Combat* is comprehensive in its discussion of events deemed controversial, such as American brutality against Korean civilians and allegations of American use of biological warfare. Toland tells the dramatic account of the Korean War from start to finish, from the appalling experience of its POWs to Mao's prediction of MacArthur's Inchon invasion. Toland's account of the "forgotten war" is a must-read for any

history aficionado. *The Mobile Agent Rendezvous Problem in the Ring* Cengage Learning Shopper Technology consists of tactics and applications that engage and motivate shoppers, analyze their behavior, and enable trading partners to improve their operations. Retailers and consumer packaged goods (CPG) marketers are embracing these new solutions more than ever. This book builds on the foundation of The

Manual with Study Guide Pearson Education Mid Ocean is a Novel of fiction by Author T. Rafael Cimino and is about the war on drugs as it occurs in South Florida in the year 1984. Joel Kenyon has lived in his father's shadow for most of his life. Even after his Dad's death, the man's powerful legacy still haunts him at every turn. As he graduates from the U. S. Custom's Academy, Joel is assigned strategic duty in the 'bad-lands' of U. S. drug enforcement, the Florida Keys. Set in 1984, Mid Ocean shows the lives of the sometimes

violent drug smugglers and the men and women sworn to uphold the law in this Caribbean 'wild west'. In the end, Joel Kenyon will question everyone, including himself in a quest for what's right and true. It is here that he will find out the sea holds many secrets.

boys get what they wish for? Everything. . . New York Times Bestselling Author Lori Foster Playing Doctor Attitude makes a huge difference in bed. It could be Axel Dean's motto. The sexy physician likes his women with sensual moxie, and Libby Preston definitely seems to fit that bill. There's that naughty grin. That hot bod. Her eager kisses and cheeky insults. Her. . . admitted virginity. Whoa. Okay, cue cold shower. Axel may not be an honorable man, but he has his limits. Except Libby won't take no for an answer. She's

determined to have someone show her what she's been missing, and suddenly, Axel can't bear to think of Libby playing doctor with anyone else. . . USA Today Bestselling Author Erin McCarthy The Lady of the Lake Pro baseball player Dylan Diaz is pretty sure he's going to hell. When you rescue a drowning woman from a lake your first thought should be, "Are you okay?" not, "Can I make mad, passionate love to you?" But the minute sputtering kindergarten teacher Violet Caruthers is on Dylan's boat, that's all he can think about. Maybe it's the potent combo of a nun's personality inside a stripper's body. Maybe it's the way she drives him crazy with desire and laughter. Or maybe, Dylan's finally found what's been missing in his life, and he's not about to let go. . .
