Volume 2 of the book ‘ Sand Dunes of the Northern Hemisphere ’ is sub-titled Characteristics, Dynamics and Provenance of Sand Dunes in the Northern Hemisphere. It brings together a vast body of information and insight into sand dune and desert systems from North Asia, Central Asia, North Africa and the Middle East. Chapters from the Russian Federation include studies on dune systems within the permafrost zone and there is a case study from temperate zone dune system in coastal Japan. Volume 2: Characteristics, Dynamics and Provenance of Sand Dunes in the Northern Hemisphere of 16 chapters in three Parts, focusses on Saharan Africa, Egypt, and Middle East and gives attention to sand mobility and encroachment with case studies from a number of countries where these matters are of concern. We also include chapters on the remote dunes in the permafrost zone and in the hyper-arid deserts of Iran. Case studies are used to highlight the characteristics of dunes and their interaction with humans in several widely divergent settings. Volume 2 concludes with some musing on the value of study of the past as key to the future and speculates on what the future might hold in the light of a warmer and drier Earth and a rise in sea level that threaten large tracts of low-lying land with marine incursions and destruction from storm surge. PART 4 Sand Mobility and Encroachment The seven chapters in this Part examine the real-world impact of sand encroachment and dune migration on people and their economic activities and the health, welfare and financial implications related to destruction of infrastructure, including human habitations. PART 5 Sand Dune Landscapes Distribution, Formation and Management Seven Case studies from several geographic regions in Africa, the Middle East, north-east Asia are presented here to demonstrate the underlying mechanisms in dune formation and the diverse approaches to their management. Human impacts such as sand mining, tourism development, combine with natural forces like climate variability to challenge the realization of an optimum management strategy. PART 6 Concluding Thoughts: Coping with an Unknown Future from a Little-known Past The two chapters in Part 6 have special roles. We are privileged to publish new research findings that are summarized here in Chapter 38 from extensive and detailed work conducted in the Kyzyl Kum, and Karakum sand seas of Central Asia. There is a strong belief that further study of the little-known past such as revealed in this study could unlock clues as to what a future Earth might look like. This leads on to speculation in Chapter 39 about the implications of what we already know about global change (not only climate change) and the impact of the Anthropocene on the dune systems, both inland and coastal. Sea level rise, marine incursions and an increase in extreme weather events will affect dune systems and sand seas on the Northern Hemisphere (and beyond).

The line began forming after eight o'clock. Sal, short and heavy-set, kept everyone busy. Neat, in a white shirt and sports jacket, with his grey fedora cocked to the side, his crooked grin made you smile. Without warning the heavy door would swing open and the waiters would come outside to join him. They were dressed in pajamas or prison garb, with hats and horns, and were there to warm up the crowd. Some in line expected this, others were shocked. The pink polka dot building should have been a warning. Complete strangers in line became chummy, exchanging stories they had heard; toilet seat covers to serve drinks on, microphones in the ladies room, toilet paper for napkins. Most had brought their friends there to be roasted. The line of people varied in age. They all dressed casually because they'd heard you could get a pie in the face or a squirt in the eye. The club's routines were blue in color, but harmless. If you were lucky you might see a "Balls for the Queen" or a "Singing beer." The price was always right for a good time and Warm Beer and Lousy Food was the place to be.

Innovation Management and New Product Development, 3/e The main aim of this book, however, is to bring together the areas of innovation management and new product development and to keep a strong emphasis on innovation as a management process. Written in an accessible style, this third edition brings a change in structure to clearly set out three key areas for the student: Innovation management, managing technology and knowledge and new product development. Brand Management: A Theoretical and Practical Approach, 1/e Brand Management: A theoretical and practical approach gives insight into this phenomenon, moving from the history of the brand to how to develop, manage and protect brands. The book takes a decision-making approach to the subject, structured around the decisions a brand or product manager would face when considering their own brand strategy, covering topics such as design, judicial protection, adverse publicity and financial-brand valuation.

The Future Embodied - An anthology of speculative stories exploring how science and technology might change our bodies and what it means to be human. Imagine what our ancestors a mere hundred years ago would have thought of the modern world. Think of the medical marvels we experience on a daily basis that would have seemed impossible. Recent medical advances have dramatically extended the human life-span to unthinkable lengths. Science has changed how we live in this world. Technology has allowed humanity to dramatically alter our environment, how we communicate, and how we experience life. Imagine now what our descendants might experience. What new trials or tribulations will the future of humanity suffer, or overcome? The final frontier won't be out in space but inside our own bodies. Experience the future as imagined via nineteen powerful voices envisioning what we might become. Including stories from: William F. Nolan, David Gerrold, Ree Soesbee, Jennifer Brozek, Katrina Nicholson, Nghi Vo, Jennifer R. Povey, Sarah Pinsker, Thomas Brennan, Miles Britton, Megan Lee Beals, Lauren C. Teffeau, Shane Robinson, John Skylar, Preston Dennett, Alexandra Grunberg, Wayne Helge, and Holly Schofield.

Concurrency is an integral part of everyday life. The concept is so ingrained in our existence that we benefit from it without realizing. When faced with a taxing problem, we automatically involve others to solve it more easily. Such concurrent solutions to a complex problem may, however, not be quite straightforward and communication becomes crucial to ensure the successful solution of the problem.
