YOU CAN'T MAKE THIS STUFF UP!

Here is a hilarious collection that catches real-life knuckleheads in outrageous acts of brazen stupidity, giving new meaning to that famous four-letter word: "DUH"! *

The Oregon resident who was waxing his 1984 Pontiac--and somehow managed to shove the antenna up his nose . . .

GRANDMOTHER OF EIGHT MAKES

HOLE IN ONE * The Atlanta Braves

pitcher who was treated for five-inch-long welts after he tried to iron his polo shirt while wearing it . . . MINERS REFUSE TO

WORK AFTER DEATH * The inmate at a

Chesapeake Correctional Facility who filed a five million dollar lawsuit against himself . . . DRUNK GETS NINE

MONTHS IN VIOLIN CASE * The woman who couldn't stand the discomfort of

having a callus on her right foot, so she blew off her big toe with a shotgun . . .

Radio personality John "Kato" Machay's lively compilation of news stories,

headlines, and courtroom gaffes proves hands down that truth is dumber than

fiction! REMEMBER: To err may be human, but to laugh out loud is divine.

"Staff from smaller airports typically lack specialized expertise in the negotiation and development of airport property or the resources to hire consultants. ACRP Research Report 213 provides airport management, policymakers, and staff a resource for developing and leasing airport land and improvements, methodologies for determining market value and appropriate rents, and best practices for negotiating and re-evaluating current lease agreements. There are many factors that can go into the analysis, and this report reviews best practices in property development."--Foreword.

The line began forming after eight o'clock.

Sal, short and heavy-set, kept everyone busy. Neat, in a white shirt and sports jacket, with his grey fedora cocked to the side, his crooked grin made you smile. Without warning the heavy door would swing open and the waiters would come outside to join him. They were dressed in pajamas or prison garb, with hats and horns, and were there to warm up the crowd. Some in line expected this, others were shocked. The pink polka dot building should have been a warning. Complete strangers in line became chummy, exchanging stories they had heard; toilet seat covers to serve drinks on, microphones in the ladies room, toilet paper for napkins. Most had brought their friends there to be roasted. The line of people varied in age. They all dressed casually because they'd heard you could get a pie in the face or a squirt in the eye. The club's routines were blue in color, but harmless. If you were lucky you might see a "Balls for the Queen" or a "Singing beer." The price was always right for a good time and Warm Beer and Lousy Food was the place to be.

Expand Raspberry Pi capabilities with
fundamental engineering principles
Exploring Raspberry Pi is the innovators
guide to bringing Raspberry Pi to life.
This book favors engineering principles
over a 'recipe' approach to give you the
skills you need to design and build your

own projects. You'll understand the fundamental principles in a way that transfers to any type of electronics, electronic modules, or external peripherals, using a "learning by doing" approach that caters to both beginners and experts. The book begins with basic Linux and programming skills, and helps you stock your inventory with common parts and supplies. Next, you'll learn how to make parts work together to achieve the goals of your project, no matter what type of components you use. The companion website provides a full repository that structures all of the code and scripts, along with links to video tutorials and supplementary content that takes you deeper into your project. The Raspberry Pi's most famous feature is its adaptability. It can be used for thousands of electronic applications, and using the Linux OS expands the functionality even more. This book helps you get the most from your Raspberry Pi, but it also gives you the fundamental engineering skills you need to incorporate any electronics into any project. Develop the Linux and programming skills you need to build basic applications Build your inventory of parts so you can always "make it work" Understand interfacing, controlling, and communicating with almost any component Explore advanced applications with video, audio, real-world interactions, and more Be free to adapt and create with Exploring Raspberry Pi.
