Wherever we look today, popular culture greets us with “ texts ” that make implicit arguments; this book helps students to think and write critically about these texts. The World Is a Text teaches critical reading, writing, and argument in the context of pop-culture and visual examples, showing students how to “ read ” everyday objects and visual texts with basic semiotics. The book shows how texts of all kinds, from a painting to a university building to a pair of sneakers, make complex arguments through their use of signs and symbols, and shows students how to make these arguments in their own essays. This new edition is rich with images, real-world examples, writing and discussion prompts, and examples of academic and student writing. The first part of the book is a rhetoric covering argumentation, research, the writing process, and adapting from high-school to college writing, while the second part explores writing about specific cultural topics. Notes, instruction, and advice about research are woven into the text, with research instruction closely tied to the topic being discussed. New to the updated compact edition are chapters on fashion, sports, and nature and the environment.

Classic Books Library presents this brand new edition of “The Federalist Papers”, a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. “The Federalist”, as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyse the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755–1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1799-1800 and founded the Federalist Party, the system that governed the nation's finances. His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the United States.

While a common goal of higher education is to improve student learning to prepare young adults for the professional, civic and personal challenges of their lives, few institutions have a model to facilitate these outcomes. Learning Partnerships offers a grounded theory and practical examples of how these objectives can be achieved at the college course, program, and institutional levels. The book takes as its foundation Marcia Baxter Magolda's "Learning Partnerships Model" based on her seventeen-year longitudinal study of young adults' learning and development from their undergraduate years through their thirties. Based on nearly a thousand participant narratives, the model offers an empirically grounded yet flexible approach to promote "self-authorship." Marcia Baxter Magolda describes the nature of self-authorship--its centrality to the learning goals of cognitive maturity, an integrated identity, mature relationships, and effective citizenship--and the Model. The book then documents examples of actual practice and the learning outcomes they have yielded. The settings include community college and undergraduate courses, exchange and internship programs, residential life, a Masters' program, faculty development and student affairs organization. Learning Partnerships

offers models for all educators--faculty and student affairs staff alike--who work to balance guidance and learner responsibility to prepare students for the complexity of the twenty-first century.

*Essential Actions for Academic Writers* is a writing textbook for all novice academic students, undergraduate or graduate, to help them understand how to write effectively throughout their academic and professional careers. While these novice writers may use English as a second or additional language, this book is also intended for students who have done little writing in their prior education or who are not yet confident in their academic writing. *Essential Actions* combines genre research, proven pedagogical practices, and short readings to help students develop their rhetorical flexibility by exploring and practicing the key actions that will appear in academic assignments, such as explaining, summarizing, synthesizing, and arguing. Part I introduces students to rhetorical situation, genre, register, source use, and a framework for understanding how to approach any new writing task. The genre approach recognizes that all writing responds to a context that includes the writer's identity, the reader's expectations, the purpose of the text, and the conventions that shape it. Part II explores each essential action and provides examples of the genres and language that support it. Part III leads students in combining the actions in different genres and contexts, culminating in the project of writing a personal statement for a university or scholarship application.

This practical booklet can help you write a compare and contrast essay by showing you the complete process of writing this type of paper. This systematic method will start with your assignment and end with a final proofreading. In between that first and last step, this writing method relies upon templates to help you build a well-organized compare-and-contrast paper. These templates show you exactly what to include in different places within the paper. You will no longer need to guess what to write and where to write it. By using the templates, the various pieces of the paper will work together to create a coherent draft. Follow the steps in order, from the first to the last, and do not skip any along the way. Each step builds on the previous steps. Assignment analysis turns into a table of factors, the table of factors turns into a working outline and topic sentences, and so on. By completing each step before moving on to the next, the next step will be easier. And so will the one after that. This booklet not only helps you write a complete paper, but it shows you a method to apply in any similar paper that relies on the compare-and-contrast model.
