compiler, we felt that emphasis on proofs could be misplaced. Many excellent theoretical texts already exist; our concern is reduction to practice. A compiler design is carried out in the context of a particular language/machine pair. Although the principles of compiler construction are largely independent of this context, the detailed ...

**Compiler Construction (??)**

Compiler Improvement: Principles and Practice accommodates an entire, palms-on case analysis problem for creating an exact, working compiler. This case analysis features a comparatively straightforward programming language which will expose

readers to the important concepts used (and potential pitfalls) in creating greater compilers.
