Compilers: Principles, Techniques, and Tools (2nd Edition

...

Compilers: Principles, Techniques, and Tools is a computer science textbook by Alfred V. Aho, Monica S. Lam, Ravi Sethi, and

Jeffrey D. Ullman about compiler construction. First published in 1986, it is widely regarded as the classic definitive compiler technology text. It is affectionately known as the Dragon Book to generations of computer scientists as its cover depicts a knight and a dragon in battle, a metaphor for conquering complexity. This name can also refer to Aho and Ullman's older Pr

Exercises for Section 2.2 | Compilers Principles ...

This introduction to compilers is the direct descendant of the well-known book by Aho and Ullman, Principles

of Compiler Design. The authors present updated coverage of compilers based on research and techniques that have been developed in the field over the past few years.
