Geocriticism provides a theoretical foundation and a critical exploration of geocriticism, an interdisciplinary approach to understanding literature in relation to space and place. Drawing on diverse thinkers, Westphal argues that a geocritical approach enables novel ways of seeing literary texts and of conducting literary studies.

A serial killer is loose on the streets of New York, chased by a detective whose mutated eyes see things only she can ... Shutter Island meets Jacob 's Ladder in the new near-future crime thriller from million-copy bestseller Matthew Mather, with books translated in over twenty languages worldwide. "Relentless pacing, well-developed main characters, and plethora of bombshell plot twists." —Publishers Weekly After a near-fatal car crash, Royce wakes up to find he 's one of the first patients to undergo a radical new procedure: a full-body transplant. Convalescing and suffering from waking nightmares, he answers the door at his Long Island home and meets Delta Devlin, a New York detective. She sees things nobody else can, visions created by a mutation to her eyes. Royce becomes Devlin 's prime suspect in a string of grisly murders. Desperate for answers, he tracks down the grieving widow of the man whose body he now inhabits. Out of time, and perhaps his mind, he tumbles through a hallucinogenic underworld of black-market body parts and billionaires where nothing can stand in the way of living forever—not even death itself.

Innerhalb der USA gilt New Orleans seit jeher als die „ unamerikanischste “ Stadt, als exotisch und anders, gar als „ sozio-geographischer Unfall “. Hier ü berkreuzen sich nicht nur die Einfl ü sse verschiedener Kolonialkulturen, sondern auch die Routen des atlantischen Sklavenhandels und der asiatischen Arbeitsmigration und nicht zuletzt die ideellen wie materiellen Transferbewegungen zwischen den beiden Amerikas. Der vorliegende Band macht es sich zur Aufgabe, diese vielf ä ltigen transrealen Zirkulationsprozesse zu analysieren und das Potential New Orleans' zur paradigmatischen Metropole des Globalen S ü dens auszuloten. Im Fokus stehen verschiedene Formen der kulturellen Kreolisierung, wie sie sich in der Sprache, der Literatur, der Musik, aber auch in Alltagsph ä nomen wie dem Karneval oder Computerspielen manifestieren. Within the USA, New Orleans has long been considered the ' un-American ' city, seen as exotic and different, even as a ' socio-geographical accident '. It is a crossroads not only for the influences of different colonial cultures but also for the routes of the Atlantic slave trade and immigration of Asian workers, and not least for material and non-material transfer between the two Americas. This volume seeks to analyse these manifold transareal circulation processes and to explore New Orleans 's potential as a paradigmatic metropolis of the Global South. The focus is on different forms of creolisation as manifested in language, literature and music, but also in everyday phenomena such as Carnival or computer games.

Imperialism as we knew it may be no more, but Empire is alive and well. It is, as Michael Hardt and Antonio Negri demonstrate in this bold work, the new political order of globalization. Their book shows how this emerging Empire is fundamentally different from the imperialism of European dominance and capitalist expansion in previous eras. Rather, today's Empire draws on elements of U.S. constitutionalism, with its tradition of hybrid identities and expanding frontiers. More than analysis, Empire is also an unabashedly utopian work of political philosophy.

Twenty-three intelligent species. One ancient mystery. And two humans thrust into the middle. Daniel Rice hasn't felt right since his return from a dystopian future now extinguished. Curious dreams repeat with detailed precision. A voice - or something - seems to be calling him. His problem isn't medical, it's not even scientific, and it's driving his wife crazy. Nala is worried, and she's not the type to pace the halls while her overly analytic husband procrastinates. Earth's scientific power couple is soon halfway around the world to consult with alien android, Aastazin. Zin is no doctor, but he has friends in high places. Very high. Next stop, a thousand light years from home where an alien megacity shaped in a six-petaled flower hosts species from dozens of worlds. An inexplicable

attack leaves Daniel wandering across an inhospitable planet and Nala alone among a confusing mashup of sentient beings. With little hope of finding each other, they learn there is more going on at this alien gathering place than they knew - aggressive security bots, an ancient mystery, and a pending vote that could shun humanity from the greatest collection of civilizations the galaxy has ever known. In book #4 of the series, Daniel and Nala will need to make friends, avoid enemies, and leverage newfound knowledge to reconnect with each other and boost humanity's chance of galactic membership. *Czesław Miłosz in Postwar America* Createspace Independent Publishing Platform Sharma's fourth poetry collection explores the American frontier and its relationship to themes of otherness, outsidership, and extreme personal experience.

Recent years have witnessed a rapid rise in engagement with emotion and affect across a broad range of disciplines in the humanities and social sciences, with geographers among others making a significant contribution by examining the emotional intersections between people and places. Building on the achievements of *Emotional Geographies* (2005), the editors have brought together leading scholars such as Nigel Thrift, Alphonso Lingis and Frances Dyson as well as young, up and coming academics from a diverse range of disciplines to investigate feelings and affect in various spatial and social contexts, environments and landscapes. The book is divided into five sections covering the themes of remembering, understanding, mourning, belonging, and enchanting.

"Jason Gurley will be a household name one day." - Hugh Howey Book 1 of The Movement Trilogy Earth is on the brink of ruin. Great storms destroy cities. Rising seas reshape the continents. Afraid for its survival, mankind constructs a fleet of space stations in orbit, and steps off-world. Among the humans fighting for their future are Micah Sparrow, a widower who uncovers a plot to return mankind to the dark ages; Tasneem Kyoh, who undergoes life-extension treatments and begins the search for humanity's next home; and David Dewbury, a prodigy who believes he knows where that home might be. But in space, the rules aren't the only things that have changed. Man himself has changed, and with the Earth in tatters behind him, man turns his attention to the one thing left to destroy: himself. The Settlers is the explosive first book in Jason Gurley's Movement Trilogy, the epic story of man's small step into space, and the great leaps humanity must make to save its own future.

The early modern and modern cultural world in the West would be unthinkable without Petrarch and Boccaccio. Despite this fact, there is still no scholarly contribution entirely devoted to analysing their intellectual revolution. Internationally renowned scholars are invited to discuss and rethink the historical, intellectual, and literary roles of Petrarch and Boccaccio between the great model of Dante's encyclopedia and the ideas of a double or multifaceted culture in the era of Italian Renaissance Humanism. In his lyrical poems and Latin treatises, Petrarch created a cultural pattern that was both Christian and Classical, exercising immense influence on the Western World in the centuries to come. Boccaccio translated this pattern into his own vernacular narratives and erudite works, ultimately claiming as his own

achievement the reconstructed unity of the Ancient Greek and Latin world in his contemporary age. The volume reconsiders Petrarch's and Boccaccio's heritages from different perspectives (philosophy, theology, history, philology, paleography, literature, theory), and investigates how these heritages shaped the cultural transition between the end of the Middle Ages and the early modern era, as well as European identity.

"The exciting conclusion to the two-part Nomad series." A new world arises from the ashes of the old... But the fight for survival has only begun. In the Day of the Nomad, oceans flooded the continents, the earth split open and poured darkness into the skies. A mass extinction event as the Earth hadn't witnessed in more than two hundred and fifty million years, the planet flung into a radical new orbit around the Sun. Jessica Rollins survived, hidden away in a mountaintop in Italy, and has made radio contact with other survivor groups scattered around the wrecked globe--but the destruction is only just beginning. The key to humanity's survival may lie in a backpack she recovered from her father, in the data he collected more than thirty years before as Harvard's preeminent astrophysicist. Information he died trying to protect. His final words to her circle around and around in her head..."survive, no matter what." But at what cost? And what is...Sanctuary?

This book examines the phenomenon of the "digital city" in the US by looking at three case studies: New York City, San Antonio, and Seattle. Kristin Scott considers how digital technologies are increasingly built into the logic and organization of urban spaces and argues that while each city articulates ideals such as those of open democracy, civic engagement, efficient governance, and enhanced security, competing capitalist interests attached to many of these digital technological programs make the "digital city" problematic.

In this prescient thriller about an all-too-possible scenario, a man fights to keep his family alive when a cyberworld meltdown and fierce storms cut New York City off from the world. Mike Mitchell is an average New Yorker living in an apartment in Chelsea, struggling to keep his family together. When the Internet goes down, he suddenly finds himself fighting just to keep them alive. The electricity and power supplies fade in and out, and the explanations offered by the authorities are vague and untrustworthy. A string of increasingly bizarre disasters starts appearing on the world's news networks, and a monster snowstorm hits New York City before Christmas. Mike and his close friends and family hunker down in their apartment building for safety, organizing and rationing food and water. Outside, the boundaries between lawful and criminal behaviour break down as resources become scarce. With the threat to their safety growing, Mike and his family pin their hopes on fleeing the city for the countryside. But as the world and cyberworld come crashing down, New York is suddenly cut off, turning the city into a wintry tomb where nothing is what it seems, and where no one can be trusted . . .
