Emotion, Place and Culture New Earth Camping is perhaps the quintessential American activity. We camp to escape, to retreat, to "find" ourselves. The camp serves as a home-away-from-home where we might rethink a deliberate life. We also camp to find a new collective space where family and society converge. Many of us attended summer camps, and the legacies of these childhood havens form part of American culture. In *Campsite*, Charlie Hailey provides a highly original and artfully composed interpretation of the cultural significance and inherently paradoxical nature of camps and camping in contemporary American society. Offering a new understanding of the complex relationship between place, time, and architecture in an increasingly mobile culture, Hailey explores campsites as places that necessitate a unique combination of contrasting qualities, such as locality and foreignness, mobility and fixity, temporality and permanence, and public domesticity. Camping methods

reflect the rigid flexibility of the process: leaving home, arriving at a site, clearing an area, making and then finally breaking camp. The phases of this sequence are both separate and indistinct. To understand this paradox, Hailey emphasizes the role of process. He constructs a philosophical framework to elucidate the "placefulness" -- or sense of place -- of such temporary constructions and provides alternative understandings of how we think of the home and of public versus private dwelling spaces. Historically, camps have been used as places for scouting out future towns, for clearing provisional spaces, and for making semipermanent homes-away-from-home. To understand how "cultures of camping" develop and accommodate this dynamic mix of permanence and flexibility, Hailey looks at three basic qualities of the camp: as a site for place-making, as a populist precursor for modern built environments, and as a "method." Hailey's creative and philosophical approach to camps and camping allows him to construct links between such diverse projects as the "philosophers' camps" of the mid-nineteenth century, the idiosyncratic camping clubs that arose with the automobile culture in the early 1920s, and more recent uses of campsites as temporary housing for those displaced by Hurricane Katrina. In *Campsite*, Hailey makes a singular and significant

contribution to current studies of place and vernacular architecture while also reconfiguring methods of research in cultural studies, architectural theory, and geography.

A flight disappears over the North Pole. No distress calls. Vanished into thin air. Mitch Matthews is a writer struggling to make ends meet when his wife's brother Josh offers them a first-class seat on a flight from Hong Kong to New York. When his wife needs to stay behind, it becomes an opportunity for some quality daddy-daughter time with his five-year-old Lilly. At check-in, they run into a strange Norwegian arguing with a huge Russian. A mysterious redhead is guarding a package in the business lounge. But everything is fine... Right up until... Within hours of Allied Airlines 695 disappearing, a massive international search is launched. Aircraft and ships are dispatched from Russia, America, Canada and Norway... How can a modern airliner simply vanish in one of the most heavily monitored places on Earth? Right in the middle of an area overflowed by dozens of satellites from as many nations, ringed by Cold War-era radar and missile installations? Global tensions rise. The media and grieving families whip into a frenzy. The armed forces of America and Russia tip the world toward the brink of apocalyptic war. Weeks later. Found on the ice. A chance discovery. The journal of Mitch Matthews reveals the incredible truth behind the disappearance of Allied 695, and what really happened in... ..the Polar Vortex.

Czesław Miłosz is at times called an American poet. This means one thing in Poland, and something else in the United States. To Polish readers, this description is mainly related to the moment of his departure from Europe to take up employment at the University of California in Berkeley, and his settlement for many years in California, where his new poems and essays were written. Miłosz is to them an American poet, in a biographical sense, from the time he started living at Grizzly Peak until his return to Krakow, and in a symbolic sense, for as long as he cooperated with the publishing market, participated in literary life, and was an ambassador of Polish literature across the ocean. He is an American poet to the extent that his work was influenced by the thought and work of those cultural circles. However, one has to return to the landmark year of 1960, when Miłosz had only set off for Berkeley, and ask about the awareness with which he discovered America, where he spent those consequential five years fifteen years before, and where he apparently took refuge from the consequences of the Sovietization of his native part of Europe. He returned to America as someone familiar with its realities and its lifestyle, with the

reasoning and actions of its people, aware of many local customs and problems, well versed in various circulations of culture and information, fluent in English, with a rich and current knowledge of the literature of the linguistic circles that permeated it. Little is known about the postwar period, when Miłosz built this extensive awareness. For various reasons, it has not been the subject of investigations and research. Not only because the question of the poet's American traits, posed ever more eagerly today, hides the assumption that it refers to his California period treated as a phase of life and creativity which is closed both temporally and intellectually. Such a formulation of this question also results partly from the Polish understanding of the label of an American poet. However, this question gains its full meaning only when its scope includes, firstly, the realization that 1960 was not the initial year in Miłosz's learning about America - it only marked a renewal of this process in a more complex way. Secondly, the question should include our awareness of the baggage of Miłosz's experiences accumulated in the 1940s, with which he reentered the New World. In other words, understanding the process of taking root in California after 1960 is possible when we, as Miłosz himself did, take into account his American postwar period, thought-out, problematized and reassessed in Europe after 1950. This book aims to show how Czesław Miłosz assimilated America from 1945 to 1950, how he expanded his cultural horizon there, incorporating various

components within it. The subject of my interest has been, on the one hand, the sphere of his activities in many areas at the time, and on the other, the ways of making use of the intellectual opportunities that his stay in America created for him. The book consists of four parts, each dedicated to a different aspect of Miłosz's five years in America and based on archival research. The first part is a biographical reconstruction of his diplomatic and literary activities, the second discusses his lectures, articles and opinion journalism, the third recreates the process of his study of English-language literature, and the fourth examines the ways in which he assessed the postwar experience in his poetry, essays, and correspondence. While the last part concerns the period when Miłosz, residing in France, looks back on the American years, which to a large extent influenced the new way of interpreting them, the three previous ones concern the common five-year period and constitute a mutual reference system.

When Steven Glass's third grade teacher asked his class what they wanted to be when they grew up, Steven's classmates shouted the usual answers: "A fireman!" "A teacher!" "The President!" When his turn came, Steven said, "When I grow up I'm going to be the last man on Earth." Warning signs don't come much clearer than that.

The early modern and modern cultural world in the West would be unthinkable without Petrarch and Boccaccio. Despite this fact, there is still no scholarly contribution entirely devoted to analysing their intellectual revolution. Internationally

renowned scholars are invited to discuss and rethink the historical, intellectual, and literary roles of Petrarch and Boccaccio between the great model of Dante's encyclopedia and the ideas of a double or multifaceted culture in the era of Italian Renaissance Humanism. In his lyrical poems and Latin treatises, Petrarch created a cultural pattern that was both Christian and Classical, exercising immense influence on the Western World in the centuries to come. Boccaccio translated this pattern into his own vernacular narratives and erudite works, ultimately claiming as his own achievement the reconstructed unity of the Ancient Greek and Latin world in his contemporary age. The volume reconsiders Petrarch's and Boccaccio's heritages from different perspectives (philosophy, theology, history, philology, paleography, literature, theory), and investigates how these heritages shaped the cultural transition between the end of the Middle Ages and the early modern era, as well as European identity.

Mike Mosher's "Some Aspects of Californian Cyberpunk" vividly reminds us of the influence of West Coast counterculture on cyberpunks, with special emphasis on 1960s theoretical gurus such as Timothy Leary and Marshall McLuhan, who explored the frontiers of inner space as well as the global village.

Frenchy Lunning's "Cyberpunk Redux: Dé rives in the Rich Sight of Post-Anthropocentric Visuality" examines how the heritage of Ridley Scott's techno-noir film *Blade Runner* (1982) that preceded Gibson's *Neuromancer* (1984) keeps revolutionizing the art of visuality, even in the age of the Anthropocene. If you read Lunning's essay along with Lidia Meras's "European Cyberpunk Cinema," which closely analyzes major European cyberpunkish dystopian films *Renaissance* (2006) and *Metropia* (2009) and Elana Gomel's "Recycled Dystopias: Cyberpunk and the End of History," your understanding of the cinematic and post-utopian possibility of cyberpunk will become more comprehensive. For a cutting-edge

critique of cyberpunk manga, let me recommend Martin de la Iglesia's "Has Akira Always Been a Cyberpunk Comic?" which radically redefines the status of *Akira* (1982 – 1993) as trans-generic, paying attention to the genre consciousness of the contemporary readers of its Euro-American editions. Next, Denis Taillandier's "New Spaces for Old Motifs? The Virtual Worlds of Japanese Cyberpunk" interprets the significance of Japanese hardcore cyberpunk novels such as Goro Masaki's *Venus City* (1995) and Hirotaka Tobi's *Grandes Vacances* (2002; translated as *The Thousand Year Beach*, 2018) and *Ragged Girl* (2006), paying special attention to how the authors created their virtual landscape in a Japanese way. For a full discussion of William Gibson's works, please read Janine Tobek and Donald Jellerson's "Caring About the Past, Present, and Future in William Gibson's Pattern Recognition and Guerilla Games' Horizon: Zero Dawn" along with my own "Transpacific Cyberpunk: Transgeneric Interactions between Prose, Cinema, and Manga". The former reconsiders the first novel of Gibson's new trilogy in the 21st century not as realistic but as participatory, whereas the latter relocates Gibson's essence not in cyberspace but in a junkyard, making the most of his post-Dada/Surrealistic aesthetics and "Lo-Tek" way of life, as is clear in the 1990s "Bridge" trilogy.

Imperialism as we knew it may be no more, but Empire is alive and well. It is, as Michael Hardt and Antonio Negri demonstrate in this bold work, the new political order of globalization. Their book shows how this emerging Empire is fundamentally different from the imperialism of European dominance and capitalist expansion in previous eras. Rather, today's Empire draws on elements of U.S. constitutionalism, with its tradition of hybrid identities and expanding frontiers. More than analysis, Empire is also an unabashedly utopian work of political philosophy.

Innerhalb der USA gilt New Orleans seit jeher als die „ unamerikanischste “ Stadt, als exotisch und anders, gar als „ sozio-geographischer Unfall “ . Hier ü berkreuzen sich nicht nur die Einfl ü sse verschiedener Kolonialkulturen, sondern auch die Routen des atlantischen Sklavenhandels und der asiatischen Arbeitsmigration und nicht zuletzt die ideellen wie materiellen Transferbewegungen zwischen den beiden Amerikas. Der vorliegende Band macht es sich zur Aufgabe, diese vielf ä ltigen transarealen Zirkulationsprozesse zu analysieren und das Potential New Orleans' zur paradigmatischen Metropole des Globalen S ü dens auszuloten. Im Fokus stehen verschiedene Formen der kulturellen Kreolisierung, wie sie sich in der Sprache, der Literatur, der Musik, aber auch in Alltagsph ä nomenen wie dem Karneval oder Computerspielen manifestieren. Within the USA, New Orleans has long been considered the ‘ un-American ’ city, seen as exotic and different, even as a ‘ socio-geographical accident ’ . It is a crossroads not only for the influences of different colonial cultures but also for the routes of the Atlantic slave trade and immigration of Asian workers, and not least for material and non-material transfer between the two Americas. This volume seeks to analyse these manifold transareal circulation processes and to explore New Orleans ’ s potential as a paradigmatic metropolis of the Global South. The focus is on different forms of creolisation as manifested in language, literature and music, but also in everyday phenomena such as Carnival or computer games.

How have we thought “ the body ” ? How can we think it anew? The body of mortal creatures, the body politic, the body of letters and of laws, the “ mystical body of Christ ” —all these (and others) are incorporated in the word Corpus, the title and topic of Jean-Luc Nancy ’ s masterwork. Corpus is a work of literary force at once phenomenological, sociological, theological, and philosophical in its multiple orientations and approaches. In thirty-six brief sections, Nancy offers us at once an encyclopedia and a polemical program—reviewing classical takes on the “ corpus ” from Plato, Aristotle, and Saint Paul to Descartes, Hegel, Husserl, and Freud, while demonstrating that the mutations (technological, biological, and political)

of our own culture have given rise to the need for a new understanding of the body. He not only tells the story of this cultural change but also explores the promise and responsibilities that such a new understanding entails. The long-awaited English translation is a bold, bravura rendering. To the title essay are added five closely related recent pieces—including a commentary by Antonia Birnbaum—dedicated in large part to the legacy of the “ mind-body problem ” formulated by Descartes and the challenge it poses to rethinking the ancient problems of the corpus. The last and most poignant of these essays is “ The Intruder, ” Nancy ’ s philosophical meditation on his heart transplant. The book also serves as the opening move in Nancy ’ s larger project called “ The deconstruction of Christianity. ”

Robert Baxter once reveled in the intoxicating delights of Atopia—the man-made island where humans lose themselves in a world of boundless virtual realities. Now, Bob has returned to immerse himself in this mind-altering, consciousness-sharing refuge from the eroding Earth. But something is very wrong. Bob feels a tidal wave of doom cresting above the pleasure dome that is Atopia. As alternate universes perish, the salvation of all he loves—and all that exists—rests with Bob alone. To save the future, he must journey to the farthest edge of the past, where existence itself began and Atopia ’ s deepest secrets may lie. Yet even the knowledge Bob ultimately gains may not be a match for an enemy as powerful as a god, and as all-consuming as death . . .

Twenty-three intelligent species. One ancient mystery. And two humans thrust into the middle. Daniel Rice hasn't felt right since his return from a dystopian future now extinguished. Curious dreams repeat with

detailed precision. A voice - or something - seems to be calling him. His problem isn't medical, it's not even scientific, and it's driving his wife crazy. Nala is worried, and she's not the type to pace the halls while her overly analytic husband procrastinates. Earth's scientific power couple is soon halfway around the world to consult with alien android, Aastazin. Zin is no doctor, but he has friends in high places. Very high. Next stop, a thousand light years from home where an alien megacity shaped in a six-petaled flower hosts species from dozens of worlds. An inexplicable attack leaves Daniel wandering across an inhospitable planet and Nala alone among a confusing mashup of sentient beings. With little hope of finding each other, they learn there is more going on at this alien gathering place than they knew - aggressive security bots, an ancient mystery, and a pending vote that could shun humanity from the greatest collection of civilizations the galaxy has ever known. In book #4 of the series, Daniel and Nala will need to make friends, avoid enemies, and leverage newfound knowledge to reconnect with each other and boost humanity's chance of galactic membership.
