Child Care--a Comprehensive Guide Redleaf Press

From the Preface: This manual, *Child Protective Services: A Guide for Caseworkers*, examines the roles and responsibilities of child protective services (CPS) workers, who are at the forefront of every community's

---

child protection efforts. The manual describes the basic stages of the CPS process and the steps necessary to accomplish each stage: intake, initial assessment or investigation, family assessment, case planning, service provision, evaluation of family progress, and case closure. Best practices and critical issues in casework practice are underscored throughout. The primary audience for this manual includes CPS caseworkers, supervisors, and administrators. State and local CPS agency trainers may use the manual for preservice or inservice training of CPS caseworkers, while schools of social work may add it to class reading lists to orient students to the field of child protection. In addition, other professionals and concerned community members may consult the manual for a greater understanding of the child protection process. This manual builds on the information presented in *A Coordinated Response to Child Abuse and Neglect: The Foundation for Practice*. Readers are encouraged to begin with that manual as it addresses important information on which CPS practice is based—including definitions of child maltreatment, risk factors, consequences, and the Federal and State basis for intervention. Some manuals in the series also may be of interest in understanding the roles of other professional groups in responding to child abuse and neglect, including: Substance abuse treatment providers; Domestic violence victim advocates; Educators; Law enforcement personnel. Other manuals address special issues, such as building partnerships and

Child Care: A Comprehensive Guide Fleming H Revell Company

An increasing number of people in our country today acknowledge the fact that there is an enormous crisis in the field of early child care. The first chapter of this book examines the major reasons for the crisis and why the economic reality for most American households will cause the problem to continue to grow in the coming years. Following this, the second chapter discusses the criteria of a good early child care setup, based on professional literature in the field and

the author's experience. The remainder of the book addresses the serious problem that most day-care workers are very poorly trained for their jobs. Six chapters are devoted to providing a practical guide for people who work with young children. They discuss, from current research in the field but without using technical language, current practical methods of working with children-at-risk or those who may potentially be at-risk. The focus is on working with children in groups, helping day-care workers and substitute parents to minimize or remediate the at-risk factor in the children in their care. The book also addresses parents of these children and emphasizes the need for cooperation between day-care workers and them so that child care providers can effectively convey the skills presented here. There is also a chapter on approaches to working with special children, such as children with autism, and those with physical or neurological impairments. This informative and sensitive book will be useful in advancing the training of workers in infant and early
