Let's face it, the job market is constantly changing. The influx of disruptive technologies like Artificial Intelligence, the Cloud, and Big data is shrinking opportunities for conventional office jobs. Hold on, all hope is not lost. The rise in technological innovations have given rise to freelancing - the freedom to choose your own working hours and to work from your own home - your comfort zone. Mobile technology has empowered so many people to accomplish tasks from home with limited supervision. For instance, IT analysts, statistical data analysts, graphic designers, and animators can practically work anywhere and with minimum supervision. The gig economy is booming. In fact, freelancing is fast gaining much ground across various workforces. For instance, Payoneer, a leading financial platform, has estimated that the American workforce will contain about 40 percent freelancers by 2020. Europe already boasts the largest number of freelancers, with Asia and Africa trailing closely behind. Working at home offers you flexibility - the ability to choose your working hours. It saves you the cost of commuting to and from your workplace. In addition to this, you also get to reduce your wardrobe allowance. What's more, working from home doesn't mean you have to lose out on high-paying jobs. According to Flexjobs, freelancing gigs are some of the highest paying jobs. Find out which jobs are paying over \$100,000 a year that you can do from home! You might expect that a person invited to contribute a foreword to a book on the 1 subject of professionalism would himself be a professional of exemplary standing. I am gladdened by that thought, but also disquieted. The disquieting part of it is that if I am a professional, I must be a professional something, but what? As someone who has tried his best for the last thirty years to avoid doing anything twice, I lack one of the most important characteristics of a professional, the dedicated and persistent pursuit of a single direction. For the purposes of this foreword, it would be handy if I could think of myself as a professional abstractor. That would allow me to offer up a few useful abstractions about professionalism, patterns that might illuminate the essays that follow. I shall try to do this by proposing three successively more complex models of professionalism, ending up with one that is discomfortingly soft, but still, the best approximation I can make of what the word means to me. The first of these models I shall designate Model Zero. I intend a pejorative sense to this name, since the attitude represented by Model Zero is retrograde and offensive ... but nonetheless common. In this model, the word "professionalism" is a simple surrogate for compliant uniformity.
