Introduction - CSAPP-3e-Solutions

Students should be introduced to computer systems from the perspective of a programmer, rather from the more traditional perspective of a system implementer. What does this mean? Students should get a view of the complete system, comprising the hardware, operating system, compiler, and network.

A Programmer's Perspective - Carnegie Mellon University

A Programmer's Perspective Most books on systems—computer architecture, compilers, operating systems, and networking—are written as if the reader were going to design and implement such a system. We call this the “ builder's persepective. ”
