Active Grammar Level 3 Without Answers and CD-ROM

Cambridge University Press

In a long dead language isolate such as Hurrian, grammatical studies are replete with difficulties.

The paucity of

material and our inability to compare it to modern, well-documented languages typically results in more questions than answers. Many posited answers to these questions lead inevitably to dead ends. Studies in languages such as Hurrian run the risk of either stagnating due to an adherence to the status quo by scholars or fragmenting when no two scholars can (or will) agree on any point. In this book, Campbell has in many ways broken with tradition in an

attempt to go beneath the surface and reveal further complexities in Hurrian grammar. This work, the first English-language monograph on Hurrian since 1941, is not a dogmatic treatise meant to counter the status quo but an exploration of the complexities of the Hurrian language from a new perspective. His conclusions may challenge present perceptions, but the hope is that they will in turn inspire challenges, for it is only in this way that our understanding of this wonderful language and the

people who spoke it can be furthered. Mood and Modality in Hurrian provides a formal and functional analysis of the Hurrian modal morphemes. Unlike the better-known Semitic and Indo-European languages of the ancient Near East, Hurrian has a rich complement of modal endings. This at-times bewildering variety in form and function of modal morphemes in Hurrian has been a largely unstudied topic. Although it has been touched upon in a number of studies, it has not

received a detailed treatment until now. Beyond a philological treatment of a dead language, Campbell also adds to the accumulated knowledge of ergativity. This book explores the interplay between ergativity and modality in Hurrian. Furthermore, Campbell explores the issue of voice in Hurrian and its relation to modality. A Comprehensive Reference Dictionary of Linguistics, A-D Penn State Press Conditional constructions have

long fascinated linguists, grammarians and philosophers. In this pioneering new study, Barbara Dancygier and Eve Sweetser offer a new descriptive framework for the study of conditionality, broadening the range of richly described conditional constructions. They explore theoretical issues such as the mental-space-building processes underlying conditional thinking and the form-meaning relationship involved in expressing conditionality. Using a broad range of attested English conditional constructions, the

book examines inter-
constructional
relationships. Within
the framework of
Mental Spaces
Theory, shared

A Comprehensive
Empirical Analysis

"

"

This book offers a
distinct approach

to the analysis of the
multiple meanings
of English modals,
conjunctions,
conditionals and
perception verbs.
Although such
ambiguities cannot
easily be accounted
for by feature-
analyses of word
meaning, Eve
Sweetser's
argument shows
that they can be
analysed both
readily and
systematically.
Meaning
relationships in
general cannot be
understood
independently of
human cognitive
structure, including
the metaphorical
and cultural aspects
of that structure.

Sweetser shows that
both lexical
polysemy and
pragmatic
ambiguity are
shaped by our
metaphorical folk
understanding of
epistemic processes
and of speech
interaction. Similar
regularities can be
shown to structure
the contrast
between root,
epistemic and
'speech-act' uses of
modal verbs,
multiple uses of
conjunctions and
conditionals, and
certain processes of
historical change
observed in Indo-
European
languages. Since
polysemy is
typically the

intermediate step in semantic change, the same regularities observable in polysemy can be extended to an analysis of semantic change. This book will attract students and researchers in linguistics, philosophy, the cognitive sciences, and all those interested in metaphor.

The volume on Semantics and Pragmatics presents a collection of studies on linguistic meaning in Japanese, either as conventionally encoded in linguistic form (the field of semantics) or as generated by the

interaction of form with context (the field of pragmatics), representing a range of ideas and approaches that are currently most influential in these fields. The studies are organized around a model that has long currency in traditional Japanese grammar, whereby the linguistic clause consists of a multiply nested structure centered in a propositional core of objective meaning around which forms are deployed that express progressively more subjective meaning as one moves away from the core toward the periphery of the clause. The volume seeks to achieve a balance in highlighting both insights that semantic and pragmatic theory has to offer to the study of Japanese as a

particular language and, conversely, contributions that Japanese has to make to semantic and pragmatic theory in areas of meaning that are either uniquely encoded, or encoded to a higher degree of specificity, in Japanese by comparison to other languages, such as conditional forms, forms expressing varying types of speaker modality, and social deixis.

examines conditionals in the Greek Pentateuch from the point of view of the study of translation syntax. It takes seriously into account the double character of Septuagintal Greek, both as a translation from Hebrew and as vernacular Greek. Methodologically, the underlying Hebrew is taken as the point of departure in close comparison with the resultant translation, with the purpose of examining major features in the translators' handling of this complex construction. These include the rendering of verbal and non-verbal forms in the protasis and apodosis, the question of sense-division between the two constituent clauses, the influence of genre or discourse type and interference from the underlying form or structure. Detailed analyses of the resultant translation displays features that are natural Greek, on the one hand, and features that betray the character of "translation-language", on the other hand, owing to interference from the source text. The latter manifests itself most conspicuously in renderings that are ungrammatical or unnatural, and, in a more subtle way, through equivalents which are grammatically acceptable but occur with a strikingly high frequency in the Septuagint as compared with original Greek compositions contemporary with the Septuagint.
