accomplished effectively, efficiently, and safely, but also address conflicts in the workplace and in the public sphere. Thoughtfully exploring connections between communication studies and conflict studies, this collection engages with research and practice on topics including the potential of social media during revolution, the role of gender during mediation, and the importance of critical genre usage during industrial crisis. Political Violence,

Armed Conflict, and Youth Adjustment SAGE Publications This edited volume offers useful resources for researchers conducting fieldwork in various global conflict contexts, bringing together a range of international voices to relay important methodological challenges and opportunities from their experiences. The book provides an extensive account of how people do conflict research in difficult contexts, critically

evaluating what it means to do research in the field and what the role of the researcher is in that context. Among the topics discussed: Conceptualizing the interpreter in field interviews in post-conflict settings Data collection with indigenous people Challenges to implementation of social psychological interventions Researching children and young people 's identity and social attitudes Insider and outsider dynamics when

doing research in difficult contexts Working with practitioners and local organizations Researching Peace, Conflict, and Power in the Field is a valuable guide for students and scholars interested in conflict research, social psychologists, and peace psychologists engaged in conflict-related fieldwork. Organizational Conflict Peter Lang This volume by international authors deals with the role of gender dynamics in the development of post-conflict societies. The authors describe

and analyze diverse aspects of the intertwining of gender and other social and cultural relations from an interdisciplinary perspective. They analyze gendered post-conflict dynamics in diverse contexts asking for the consequences these developments have in the settings under investigation, such as Eastern and Southeastern Europe, Palestine and Afghanistan. Gender Dynamics and Post-conflict Reconstruction IAP Die Studie beschäftigt sich mit Konflikten und Spannungsfeldern, die in interreligiösen B

ildungsprozessen im deutschsprachigen Kontext (Österreich) in schulischen und universitären Kontexten auftreten können. Dies ist zugleich eine Neuheit und ein Wagnis. Eine Neuheit deshalb, weil zwar gegenwärtig viel über Interreligiosität gesprochen wird, es aber an Forschung zu interreligiösen Kooperationen in der religionspädagogischen und religionsdidaktischen Praxis sowie insbesondere an empirischen Studien mangelt. Ein Wagnis ist das Buch deshalb, da Konflikte, Probleme, Meinun

gsverschiedenheiten oder Unstimmigkeiten, die in interreligiösen Bildungssettings auftreten, nur selten in den Mittelpunkt gerückt werden. Es scheint vielmehr eine Art Unbehagen oder Zögerlichkeit zu bestehen, sich mit diesen Fragen auseinanderzusetzen. Unsere empirische Analyse widmet sich daher explizit auftretenden Konflikten und Konfliktodynamiken in interreligiösen Bildungsprozessen und berücksichtigt die Perspektiven von etablierten Religionslehrer/-innen,

Schüler/-innen, angehenden Religionslehrer/-innen (Studierende) sowie Universitätsdozent/-innen. Auf dieser Basis werden wegweisende religionspädagogische Einsichten und praktische Perspektiven in unterschiedlichen Bildungssettings formuliert, um die interreligiöse Zusammenarbeit in Zukunft zu stärken und zu verbessern.

Designing and Managing a Research Project: A Business

Student's Guide is a practical, step-by-step guide that shows business students how to successfully conduct a research project, from choosing the topic to presenting the results. The authors have applied their many years of experience in supervising student projects to provide examples of actual research problems and to offer practical solutions. The

inclusion of topics such as supervision, group work and ethics, and both qualitative and quantitative data analysis, along with examples from real student research provide a unique perspective. The new Fourth Edition includes broader types of student project examples, such as an Economics thesis, additional international business cases,

increased coverage of Questionnaire Design and Institutional Review Boards, and an integrated case throughout the book on "High Performance Shoes" with supporting materials and data. Additional resources including case studies, PowerPoint slides, and test bank are available on the authors' website at <http://polonskywaller.com>! The Big Book of Conflict

Resolution Games: Quick, Effective Activities to Improve Communication, Trust and Collaboration
John Wiley & Sons
Through an in-depth analysis of the multifaceted manifestations of gender and conflict, this book shows how cognition and behaviour, agency and victimization, are gendered beyond the popular stereotypes.
Conflict not only

reconfirms social hierarchies and power relations, but also motivates people to transgress cultural boundaries and redefine their self-images and identities. The contributions are a mix of classical ethnography, performance studies and embodiment studies, showing 'emotions and feelings' often denied in scientific social research. Strong in their

constructivist approach and unorthodox in theory, the articles touch upon the dynamic relation between the discourses, embodiments and symbolic practices that constitute the gendered world of conflict. The localities and research sites vary from institutional settings such as a school, rebel movements, public toilets and the military to more artistic domains of

gendered conflicts such as prison theatre classes and the capoeira ring. At the same time, these conflicts and domains appropriate wider discourses and practices of a global nature, demonstrating the globalised and institutionalised nature of the nexus gender-conflict. A first set of chapters deals with 'breaking the gender taboos' and renegotiating

the stereotypical gender roles - masculinities or femininities - during conflict. A second set of chapters focuses more explicitly on the bodily experience of conflict either physically or symbolically, while the last set straddle body and narrative. The inductive quality of the work leads to unexpected insights and does give access to worlds that are new, and often

surprising and unconventional. Simon and Schuster Understanding Peace Research hTaylor & Francis Political Mediation in Modern Conflict Resolution: Emerging Research and Opportunities Taylor & Francis This book is an analysis and exploration of the relationship between peasants and policies within the process of reform in China. After examining the long term rural policies,

either before or after the reform, it was found that all these polices have been expected to promote peasants ' interests and claimed to take enhancing peasants ' happiness as their goal. Nonetheless, the history and current reality of rural development have demonstrated that the same policy starting point had lead to very different policy designs. Even today, quite a few institutional arrangements

with good intentions have ended up with opposite results and have even become bad policies that do harm to people. This book argues that the reason for such serious deviation, between political intentions and institutional arrangements, as well as between policy goals and its results is: as a political force, the peasantry itself has not effectively engaged with the political process of the country. During the first half of the twentieth century, the international system was largely dominated by the USA and the colonial powers of western Europe. After the two world wars, the political and economic dominance of these states guaranteed them and their allies an almost complete control of world politics. However, as it is the norm in the international system, power structures are not immutable. After the end of the Cold War, rapid changes to the existing

international hierarchies took place, as new countries from the so-called ‘ ‘ developing world ’ ’ began to emerge as crucial actors capable of questioning and altering the power dynamics of the world. It is therefore unthinkable to ignore emerging countries such as Russia, the People ’ s Republic of China, India, Brazil or South Africa in the decision-making process in today ’ s world order. In addition, there is a group of smaller, yet increasingly important countries that, while acknowledging

their inability radically to change the rules of the international system, are still eager to shift power relations and enhance their influence in the world. Argentina, Colombia, Egypt, Indonesia, Iran, South Korea, Mexico, Nigeria, Pakistan, Saudi Arabia, Turkey and Vietnam are generally recognised as part of this grouping of emerging powers from the Global South. While there is a consensus amongst academics that emerging powers from the Global South must have a stabilising role within their own

regions, previous analyses have focused primarily on the impact that emerging powers have had in their own regions ' conflict resolution initiatives. This volume, instead, aims to go beyond these analyses and provide new insights regarding the effect that this stabilising role has on the continental and global positioning of emerging powers. In other words, this book explores the relation between a country ' s involvement in conflict resolution initiatives and its positioning in the international system. The volume will contribute to this

approach using the perspective of academics and practitioners from countries of the Global South, particularly from states that have strengthened - or weakened - their position in the international hierarchy of power through a leading role in regional conflict resolution initiatives. **How Prides of Lion Researchers are Evolving to be Interdisciplinary BoD – Books on Demand** This unique book draws together current

thoughts and research in conflict management. conflict research in legal, institutional and relational contexts. Each chapter represents a summary of the existing quantitative social science research using meta-analysis, with contexts ranging from jury selection to peer mediation to homophobia reduction. The contributors provide connections between cutting-edge scholarship about abstract

theoretical arguments, the needs of instructional and training pedagogy, and practical applications of information. The meta-analysis approach produces a unique informational resource, offering answers to key research questions addressing conflict. This volume serves as an invaluable resource for studying conflict, mediation,

negotiation and facilitation in coursework; implementing and planning training programs; designing interventions; creating workshops; and conducting studies of conflict. The SAGE Handbook of Conflict Communication Taylor & Francis This book reviews and critiques the growing literature on youth development under conditions of political

violence and armed conflict. It presents a robust framework, based in developmental psychopathology , for evaluating current research on this topic for strength of design, methodology, and documentation. Cross-sectional and longitudinal studies from diverse regions and conflicts as well as across disciplines examine risks and challenges as well as resilience and coping as youth develop in unstable and

threatening environments. In addition, this book provides strategies for designing and implementing prevention and intervention programs as well as further opportunities for expanding applied research for youth exposed to political violence and armed conflict. Topics featured in this book include: Analysis of major research on youths ' normative and pathological development during political violence and war. Guidelines

for assessing research studies on the impact of political violence and armed conflict on youth. The effects of social ecology factors (e.g., family, school, and community) on youth functioning. Post-traumatic stress disorder. Trauma-Focused Cognitive-Behavioral Therapy. Political Violence, Armed Conflict, and Youth Adjustment is a must-have resource for researchers, professors, clinicians/profession

als, and graduate students in the fields of child and school psychology, family studies, and public health as well as developmental psychology, child and adolescent psychiatry, political science, anthropology, social and peace psychology, sociology, and ethnic studies. The SAGE Handbook of Conflict Communication Edward Elgar Publishing In this book, we learn about organizational conflict,

highlighting different perspectives of conflict resolution and conflict management in different settings and areas, as well as different theoretical views on this subject. The authors from Norway, Estonia, Nigeria, Israel, USA, Slovakia, Turkey, Finland, Uruguay, and Italy bring ideas, studies, findings, and experiences to enhance our knowledge in

the field of organizational conflict. The book is divided into two sections, and their respective chapters refer to two different perspectives of study. The first section covers Conceptual Frameworks on Organizational Conflict, considering management and conflict resolution, conflict in organizations as an indicator for organizational values, organizational trust as a

conflict management tool, conflicts and social capital, and team conflict in complex adaptive systems. The second section deals with Empirical Studies on Organizational Conflict, emphasizing research on conflict resolution from the perspective of managers and project teams, resistance to change and conflict of interest, conflicts as a

springboard for Metallica's success, drivers of innovation deployment affecting marketing relationships, and impacts of national culture on the use of bonuses for teamwork. Thus, we consider this book will be of interest to readers with a diverse group of interests in different specialties such as management, social psychology, education, law,

and sociology.

Getting to Yes Springer Nature Introducing students to the scientific study of peace and war, Conflict, War, and Peace: An Introduction to Scientific Research, edited by Sara McLaughlin Mitchell and John A. Vasquez, provides an overview of current scholarship in this dynamic area of study. Focusing on the factors that shape relationships

between countries and that make war or peace more likely, this collection of articles by top scholars explores such key topics as dangerous dyads, alliances, territorial disputes, rivalry, arms races, democracy peace, trade, international organizations, territorial peace, and nuclear weapons. Each article is followed by the editors' commentary: a "Major Contributions" section highlights the article's theoretical advances and relates each study to the broader literature, while a "Methodological

Notes ” section carefully walks students through the techniques used in the analysis. Methodological topics include research design, percentages, probabilities, odds ratios, statistical significance, levels of analysis, selection bias, logic, duration models, and game theory models. Where the Conflict Really Lies Wadsworth "Filippo Aureli and Frans De Waal have succeeded in cross-fertilizing fields as disparate as

ethology and medieval law to create a rich new field of research -- natural conflict resolution. It makes one see conflict resolution among humans through a new and fascinating lens. Press This edited book is a new and valuable resource for students, teachers, and practitioners, providing a detailed exploration of how qualitative research can be applied in the field of peace and conflict studies. This book explores considerations and components of designing, conducting, and reporting qualitative research in this field, and

also provide exemplars of recent empirical research in peace and conflict studies that employed qualitative methods.

Scholars and researchers in peace and conflict studies and peace education face unique challenges in teaching, designing, and conducting qualitative research in these fields. This edited book discusses tips in designing

qualitative studies in this area and for teaching emerging peace researchers best practices of qualitative inquiry. In addition, the book discusses some of the trends, challenges, and opportunities associated with research in peace and conflict studies and peace education. Written at a level appropriate for both graduate students and active researchers,

the primary audience for this book is those teaching and learning about the application of qualitative methods to peace and conflict studies, as well as those conducting research in this field. There are currently approximately 230 graduate programs in peace and conflict studies. This book also provides a useful tool for researchers and students in other academic

disciplines who are interested in qualitative research. Such disciplines might include education, sociology, criminology, gender studies, psychology, political science, and others.

NAMED ONE OF

THE TEN BEST BOOKS OF THE YEAR BY THE NEW YORK TIMES BOOK REVIEW AND THE EAST HAMPTON STAR
“Margaret MacMillan has produced another seminal work. . . . She is right that we must, more than ever, think about war. And she has shown us how in this brilliant, elegantly written book.” —H.R. McMaster, author of *Dereliction of Duty* and *Battlefields: The Fight to Defend the Free World* The instinct to fight may be innate in human nature, but war—organized violence—comes

with organized society. War has shaped humanity’s history, its social and political institutions, its values and ideas. Our very language, our public spaces, our private memories, and some of our greatest cultural treasures reflect the glory and the misery of war. War is an uncomfortable and challenging subject not least because it brings out both the vilest and the noblest aspects of humanity. Margaret MacMillan looks at the ways in which war has influenced human society and how, in turn, changes in

political organization, technology, or ideologies have affected how and why we fight. War: How Conflict Shaped Us explores such much-debated and controversial questions as: When did war first start? Does human nature doom us to fight one another? Why has war been described as the most organized of all human activities? Why are warriors almost always men? Is war ever within our control? Drawing on lessons from wars throughout the past, from classical history to the present day, MacMillan

reveals the many faces of war—the way it has determined our past, our future, our views of the world, and our very conception of ourselves. The Routledge Handbook of Global Historical Archaeology SAGE Publications This second edition of the award-winning The SAGE Handbook of Conflict Communication emphasizes constructive conflict management from a communication

perspective, identifying the message as the focus of conflict research and practice. Editors John G.
