THE INSTANT NEW YORK TIMES BESTSELLER! A powerful, vibrantly illustrated story about the first day of school--and two sisters on one's first day of hijab--by Olympic medalist and social justice activist Ibtihaj Muhammad. With her new backpack and light-up shoes, Faizah knows the first day of school is going to be special. It's the start of a brand new year and, best of all, it's her older sister Asiya's first day of hijab--a hijab of beautiful blue fabric, like the ocean waving to the sky. But not everyone sees hijab as beautiful, and in the face of hurtful, confusing words, Faizah will find new ways to be strong. Paired with Hatem Aly's beautiful, whimsical art, Olympic medalist Ibtihaj Muhammad and Morris Award finalist S.K. Ali bring readers an uplifting, universal story of new experiences, the unbreakable bond between siblings, and of being proud of who you are.

All of us like to think for ourselves. And so do children - if they have the skills to do it. That's why award-winning psychologist Dr. Myrna Shure decided to create a program to give them those skills. It's called I Can Problem Solve (ICPS) and for twenty-five years it has benefited thousands nationwide. Raising a Thinking Child, a book that will change your family dynamics forever - and help your child develop in ways you never thought possible - brings this positive parenting program directly into your home. Unlike other methods of child rearing, the ICPS approach teaches youngsters as young as four not what to think or do, but how to think - and the results are astounding. Through the program's specially designed and fun-to-do dialogues, games, and activities - easily incorporated into everyday family life - a young child learns how to solve problems and resolve conflicts with friends, teachers, and family; explore alternative solutions and their consequences; and understand the feelings of others. With ICPS, shy children become more assertive and impulsive children are less likely to act out when things don't go their way. Most important the ICPS-competent child is better equipped to avoid early destructive behaviors that later can lead to delinquency, substance abuse, violence, and depression. Helping your child become a thinking, feeling individual and grow up to be a socially adjusted, self-confident adult is what Raising a Thinking Child is all about. Based on years of research and evaluation, clinically proven, and child-tested, it may be the most important gift you can share with your child today...for tomorrow.

The untold story of the root cause of America's education crisis--and the seemingly endless cycle of multigenerational poverty. It was only after years within the education reform movement that Natalie Wexler stumbled across a hidden explanation for our country's frustrating lack of progress when it comes to providing every child with a quality education. The problem wasn't one of the usual scapegoats: lazy teachers, shoddy facilities, lack of accountability. It was something no one was talking about: the elementary school curriculum's intense focus on decontextualized reading comprehension "skills" at the expense of actual knowledge. In the tradition of Dale Russakoff's *The Prize* and Dana Goldstein's *The Teacher Wars*, Wexler brings together history, research, and compelling characters to pull back the curtain on this fundamental flaw in our education system--one that fellow reformers, journalists, and policymakers have long

overlooked, and of which the general public, including many parents, remains unaware. But *The Knowledge Gap* isn't just a story of what schools have gotten so wrong--it also follows innovative educators who are in the process of shedding their deeply ingrained habits, and describes the rewards that have come along: students who are not only excited to learn but are also acquiring the knowledge and vocabulary that will enable them to succeed. If we truly want to fix our education system and unlock the potential of our neediest children, we have no choice but to pay attention.

The Legend of Rock Paper Scissors Scholastic Teaching Resources

The newly reformatted Young Peacemaker Set The Young Peacemaker Set includes a 200 page Teacher Manual designed in a workbook format, and the appendices can be photocopied for child or student use. Divided into three sections: Understanding, Responding and Preventing Conflict, each lesson has a goal, objectives, principle, and needs clearly outlined at the beginning, and is followed by teacher's notes on setting the stage and questions to ask. Reproducible student activity sheets for all twelve lessons are included on an enclosed CD for ease of duplication. Help illustrate the conflicts and talk about possible solutions--good and bad--and what's wrong with the "bad" solutions. A lesson summary reaffirms the lesson's main points. Recommended for grades 3-7, but can be adapted for younger or older students.

With all the parenting information out there and the constant pressure to be the "perfect" parent, it seems as if many parents have lost track of one very important piece of the parenting puzzle: raising happy kids. Parenting today has gotten far too complicated. It's never been the easiest job in the world, but with all the "parenting advice" parents are met with at every corner, it's hard not to become bewildered. It seems that in the past it was a good deal simpler. You made sure there was dinner on the table and the kids got to school on time and no one set anything on fire, and you called it a success. But today everybody has a different method for dealing with the madness--attachment parenting, free-range parenting, mindful parenting. And who is to say one is more right or better than another? How do you choose? The truth is that

whatever drumbeat you march to, all parents would agree that we just want our kids to be happy. It seems like a no-brainer, right? But in the face of all the many parenting theories out there, happiness feels like it has become incidental. That's where *The Happy Kid Handbook* by child and adolescent psychotherapist and parenting expert Katie Hurley comes in. She shows parents how happiness is the key to raising confident, capable children. It's not about giving in every time your child wants something so they won't feel bad when you say no, or making sure that they're taking that art class, and the ballet class, and the soccer class (to help with their creativity and their coordination and all that excess energy). Happiness is about parenting the individual, because not every child is the same, and not every child will respond to parenting the same way. By exploring the differences among introverts, extroverts, and everything in between, this definitive guide to parenting offers parents the specific strategies they need to meet their child exactly where he or she needs to be met from a social-emotional perspective. A back-to-basics guide to parenting, *The Happy Kid Handbook* is a must-have for any parent hoping to be the best parent they can be.

Negotiating the Nonnegotiable Smart Tools for Life

Kids need help learning how to manage their anger. Blending solid information and sound advice with humor and lively illustrations, these anger-management tips guide kids to understand that anger is normal and to learn they can express it in healthy ways. The book teaches them how to recognize anger in themselves and others, how to handle situations and emotions (loneliness, guilt, frustration, fear) that lead to or mask anger, and how to deal with the anger they feel. This revised edition addresses children's exposure to increased societal violence and includes discussion and examples of anger related to texting and social media. Young readers learn that cruelty and violence are not acceptable and there are safer, more positive ways to resolve conflicts. They also discover what to do when people around them are angry, how to get help, and how to locate other resources when they need more support.
