The Handbook of Conflict Resolution Education Rowman & Littlefield

As the field of conflict analysis and resolution continues to grow, scholars and practitioners increasingly recognize that we can learn from one another. Theory must be informed by practice and practice must draw on sound theory. Above and beyond this lies a further recognition: without at least attempting to actually engage and transform entrenched conflicts, our field cannot hope to achieve its potential. We will merely remain in a more diverse, multi-disciplinary ivory tower. This edition breaks new ground in explicitly connecting the Scholarship of Engagement to the work of conflict resolution professionals including those in the academy, those in the field, and those who refuse to choose between the two. The text explores a wide variety of examples of, and thinking on, the Scholarship of Engagement from participatory action research to peace education, and from genocide prevention to community mediation and transitional justice.

The Big Book of Conflict Resolution Games: Quick, Effective Activities to Improve Communication, Trust and Collaboration Routledge

In an age of terror, national leaders face this sort of question every day. Should we negotiate with the Taliban? Iran? North Korea? What about terrorist groups holding hostages? In private disputes, you may face devils of your own. A business partner has betrayed you and now wants to negotiate a better deal. Your marriage is ending and your spouse is making extortionist demands. A business competitor has stolen your intellectual property. Your sister is fighting you over an inheritance. In cases such as these, you feel outraged. Your gut tells you to fight it out in court. But when facing a devil — anyone you perceive as a harmful adversary — it may make more sense to negotiate rather than fight, says Robert Mnookin, the internationally renowned leader in the art of negotiation. How do you decide? In *Bargaining with the Devil*, Mnookin provides tools for confronting adversaries of all kinds. Using eight conflicts drawn from history (including fascinating examples such as Churchill's approach to Hitler, and Nelson Mandela's response to South Africa's apartheid regime), as well as his own professional experience, he offers a framework that applies equally to international conflicts and everyday life. 'There is no easy, categorical answer,' Mnookin warns. 'Sometimes you should bargain with the Devil and other times you should refuse.' The challenge lies in making wise decisions in particular circumstances. This book shows you how.

Dispute System Design walks readers through the art of successfully designing a system for preventing, managing, and resolving conflicts and legally-framed disputes. Drawing on decades of expertise as instructors and consultants, the authors show how dispute systems design can be used within all types of organizations, including business firms, nonprofit organizations, and international and transnational bodies. This book has two parts: the first teaches readers the foundations of Dispute System Design (DSD), describing bedrock concepts, and case chapters exploring DSD across a range of experiences, including public and community justice, conflict within and beyond organizations, international and comparative systems, and multi-jurisdictional and complex systems. This book is intended for anyone who is interested in the theory or practice of DSD, who uses or wants to understand mediation, arbitration, court trial, or other dispute resolution processes, or who designs or improves existing processes and systems.

?The SAGE Handbook of Conflict Resolution demonstrates the range of themes that constitute modern conflict resolution. It brings out its key issues, methods and dilemmas through original contributions by leading scholars in a dynamic and expanding field of inquiry. This handbook is exactly what it sets out to be: an indispensable tool for teaching, research and practice in conflict resolution? - Peter Wallensteen, Professor of Peace and Conflict Research, Uppsala University and University of Notre Dame

?Bercovitch, Kremenyuk and Zartman are among the most important figures in the conflict resolution field. They have pieced together, with the help of more than 35 colleagues from numerous countries, a state-of-the-art review of the sources of international conflict, available methods of conflict management, and the most difficult challenges facing the individuals and organizations trying to guide us through these conflict-ridden times. The collection is brimming with penetrating insights, trenchant analyses, compelling cases, and disciplined speculation. They help us understand both the promise of as well as the obstacles to theory-building in the new field of conflict resolution? - Lawrence Susskind, Professor and Director of the MIT - Harvard Public Disputes Program

?The last three sentences of this persuasive book: "We conclude this volume more than ever convinced that conflict resolution is not just possible or desirable in the current international environment. It is absolutely necessary. Resolving conflicts and making peace is no longer an option; it is an intellectual and practical skill that we must all possess." If you are part of that "we," intellectually or professionally, you will find this book a superb companion? - Thomas C Schelling, Professor Emeritus, Harvard University and University of Maryland

Conflict resolution is one of the fastest-growing academic fields in the world today. Although it is a relatively young discipline, having emerged as a specialized field in the 1950's, it has rapidly grown into a self-contained, vibrant, interdisciplinary field. The SAGE Handbook of Conflict Resolution brings together all the conceptual, methodological and substantive elements of conflict resolution into one volume of over 35 specially commissioned chapters. The Handbook is designed to reflect where the field is today by drawing on the contributions of experts from different fields presenting, in a systematic way, the most recent research and practice. Jacob Bercovitch is Professor of International Relations, and Fellow of the Royal Society, at the University of Canterbury in Christchurch, New Zealand. Victor Kremenyuk is deputy director of the Institute for USA and Canada Studies, Russian Academy of Sciences, Moscow. He is also a research associate at IIASA. I. William Zartman is Jacob Blaustein Professor of Conflict Resolution and International Organization at the Nitze School of Advanced International Studies of Johns Hopkins University

Beyond the Bake Sale Stanford University Press

The field of conflict resolution has evolved dramatically during the relatively short duration of the discipline's existence. Each

generation of scholars has struggled with the major puzzles of their era, providing theories and solutions that meet the needs of the time, only to be pushed forward by new insights and, at times, totally upended by a changing world. This introductory course text explores the genealogy of the field of conflict resolution by examining three different epochs of the field, each one tied to the historical context and events of the day. In each of these epochs, scholars and practitioners worked to understand and address the conflicts that the world was facing, at that time. This book provides a framework that students will carry with them far into their careers, enriching their contributions and strengthening their voices. Rather than a didactic approach to the field, students will develop their critical analytical skills through an inductive inquiry. Students will broaden their vocabulary, grapple with argumentation, and develop critical reading skills.

Conflict Transformation, Peacebuilding, and Storytelling Pearson

Our Brains at War: The Neuroscience of Conflict and Peacebuilding suggests that we need a radical change in how we think about war, leadership, and politics. Most of us, political scientists included, fail to appreciate the extent to which instincts and emotions, rather than logic, factor into our societal politics and international wars. Many of our physiological and genetic tendencies, of which we are mostly unaware, can all too easily fuel our antipathy towards other groups, make us choose 'strong' leaders over more mindful leaders, assist recruitment for illegal militias, and facilitate even the most gentle of us to inflict violence on others. Drawing upon the latest research from emerging areas such as behavioral genetics, biopsychology, and social and cognitive neuroscience, this book identifies the sources of compelling instincts and emotions, and how we can acknowledge and better manage them so as to develop international and societal peace more effectively.

In this volume, scholars from different disciplines join together to examine the overlapping domains of conflict and collaboration studies. It examines the relationships between ideas and practices in the fields of conflict resolution and collaboration from multiple disciplinary perspectives. The central theme is that conflict and collaboration can be good, bad, or even benign, depending on a number of factors. These include the role of power, design of the process itself, skill level and intent of the actors, social contexts, and world views. The book demonstrates that various blends of conflict and collaboration can be more or less constructively effective. It discusses specific cases, analytical methods, and interventions, and emphasizes both developing propositions and reflecting on specific cases and contexts. The book concludes with specific policy recommendations for many sets of actors—those in peacebuilding, social movements, governments, and communities—plus students of conflict studies. This book will be of much interest to students, scholars, and practitioners of peace and conflict studies, public administration, sociology, and political science.

How many hate or bias incidents occurred on your campus this past year? Did any students opt out of filing formal charges? How many completed a formal resolution process, and what happened? Would you have liked to have other conflict resolution options? "This publication is endorsed by ASCA as a collaborative, collegial new lens through which to consider how social justice practices and student conduct administration can come together to inform best practices in conduct and conflict management on college and university campuses."- Tamara J. King, J.D., 2009 President, Association for Student Conduct Administration Social justice theory provides the lens for expanding our conception of student conduct administration, and the foundation for considering systemic changes in practice - changes that are vital to address the concerns and issues raised by an increasingly diverse student population. Using this lens, this book casts new light on existing principles and current practices; makes issues of power, privilege and oppression manifest; and offers a vision for expanding resolution practices to empower today's students to resolve their own conflicts. Complementing the Model Student Disciplinary Code, this book opens up a whole new range of approaches and models that readers can adapt to their institutional circumstances. Starting from the principle that systems and models are vehicles through which to act on our values, and by focusing on such core values as the commitment to student development, freedom of expression, diversity, accessibility, individual rights and shared responsibilities in a community of learners, the contributors reveal the utility and contemporary relevance of a number of underutilized resolution practices. Part I provides a framework for transforming student conduct administration using conflict resolution methods and social and restorative justice practices. Part II devotes a chapter to explaining each of the seven "Spectrum Model Pathways" to conflict resolution that form the core of this book: Dialogue, Conflict Coaching, Facilitated Dialogue, Mediation, Restorative Justice Practices, Shuttle Diplomacy, and traditional formal student conduct processes informed by social justice theory. Part III provides practical application tools for the ideas presented in this text, including discussion of change management and

assessment, and concludes with an overview of programs from across the country using inclusive conflict resolution methods in student conduct work. This is a book for anyone concerned about issues of access and justice for all students - regardless of race, sexual orientation, belief, or ability - and seeking to develop and implement restorative and safe practices for their campus community.
