We all negotiate on a daily basis. We negotiate with our spouses, children, parents, and friends. We negotiate when we rent an apartment, buy a car, purchase a house, and apply for a job. Your ability to negotiate might even be the most important factor in your career advancement. Negotiation is also the key to business success. No organization can survive without contracts that produce profits. At a strategic level, businesses are concerned with value creation and achieving competitive advantage. But the success of high-level business strategies depends on contracts made with suppliers, customers, and other stakeholders. Contracting capability—the ability to negotiate and perform successful contracts—is the most important function in any organization. This book is designed to help you achieve success in your personal negotiations and in your business transactions. The book is unique in two ways. First, the book not only covers negotiation concepts, but also provides practical actions you can take in future negotiations. This includes a Negotiation Planning Checklist and a completed example of the checklist for your use in future negotiations. The book also includes (1) a tool you can use to assess your negotiation style; (2) examples of “decision trees,” which are useful in calculating your alternatives if your negotiation is unsuccessful; (3) a three-part strategy for increasing your power during negotiations; (4) a practical plan for analyzing your negotiations based on your reservation price, stretch goal, most-likely target, and zone of potential agreement; (5) clear guidelines on ethical standards that apply to negotiations; (6) factors to consider when

deciding whether you should negotiate through an agent; (7) psychological tools you can use in negotiations—and traps to avoid when the other side uses them; (8) key elements of contract law that arise during negotiations; and (9) a checklist of factors to use when you evaluate your performance as a negotiator. Second, the book is unique in its holistic approach to the negotiation process. Other books often focus narrowly either on negotiation or on contract law. Furthermore, the books on negotiation tend to focus on what happens at the bargaining table without addressing the performance of an agreement. These books make the mistaken assumption that success is determined by evaluating the negotiation rather than evaluating performance of the agreement. Similarly, the books on contract law tend to focus on the legal requirements for a contract to be valid, thus giving short shrift to the negotiation process that precedes the contract and to the performance that follows. In the real world, the contracting process is not divided into independent phases. What happens during a negotiation has a profound impact on the contract and on the performance that follows. The contract's legal content should reflect the realities of what happened at the bargaining table and the performance that is to follow. This book, in contrast to others, covers the entire negotiation process in chronological order beginning with your decision to negotiate and continuing through the evaluation of your performance as a negotiator. A business executive in one of the negotiation seminars the author teaches as a University of Michigan professor summarized negotiation as follows: “Life is negotiation!” No one ever stated it better. As a mother with young children and as a company leader, the executive realized that negotiations are pervasive in our personal and business lives. With its emphasis on practical action, and with its chronological, holistic approach, this book provides a roadmap you can use when navigating through your life as a negotiator.

Teaching Conflict Resolution Through Children's Literature Jossey-Bass

There is conflict in all facets of life, including the professional lives of academics. It is necessary, first, to acknowledge that conflict exists, and that it is inevitable, especially in a setting where independent thought is encouraged. There is a sense, often articulated, that because of the nature of the academy, conflict should be cloaked. However, it must be acknowledged. Conflict can be either destructive or constructive. The likelihood that it will be constructive is increased when it is openly acknowledged, analyzed, and dealt with.

By the close of the twentieth century, the United States became known for its reliance on incarceration as the chief means of social control, particularly in poor communities of color. The carceral state has been extended into the public school system in these communities in what has become known as the "school-to-prison pipeline." Through interviews with young people suspended from school, Weissman examines the impact of zero tolerance and other harsh disciplinary approaches that have transformed schools into penal-like institutions. In their own words, students describe their lives, the challenges they face, and their efforts to overcome those challenges. Unlike other studies, this book illuminates the students' perspectives on what happens when the educational system excludes them from regular school. Weissman draws attention to research findings that suggest punitive disciplinary policies and practices resemble criminal justice strategies of arrest, trial, sentence, and imprisonment. She demonstrates how harsh school discipline prepares young people from poor communities of color for their place in the carceral state. An invaluable resource for policy makers, Prelude to Prison presents recommendations for policy, practice, and political change that have the potential to dismantle the school-to-prison pipeline.

In *When the Adults Change, Everything Changes: Seismic Shifts in School Behaviour*, Paul Dix upends the debate on behaviour management in schools and offers effective tips and strategies that serve to end the search for change in children and turn the focus back on the adults. You can buy in the best behaviour tracking software, introduce 24/7 detentions or scream 'NO EXCUSES' as often as you want - but ultimately the solution lies with the behaviour of the adults. It is the only behaviour over which we have absolute control. Drawing on anecdotal case studies, scripted interventions and approaches which have been tried and tested in a range of contexts, from the most challenging urban comprehensives to the most privileged international schools, behaviour training expert and Pivotal Education director Paul Dix advocates an inclusive approach that is practical, transformative and rippling with respect for staff and learners. An approach in which behavioural expectations and boundaries are exemplified by people, not by a thousand rules that nobody can recall. *When the Adults Change, Everything Changes* illustrates how, with their traditional sanction- and exclusion-led methods, the 'punishment brigade' are losing the argument. It outlines how each school can build authentic practice on a stable platform, resulting in shifts in daily rules and routines, in how we deal with the angriest learners, in restorative practice and in how we appreciate positive behaviour. Each chapter is themed and concludes with three helpful checklists: Testing, Watch out for and Nuggets designed to help you form your own behaviour blueprint. Throughout the book both class teachers and school leaders will find indispensable advice about how to involve all staff in developing a whole school ethos built on kindness, empathy and understanding. Suitable for all head teachers, school leaders, teachers, NQTs and classroom assistants in any phase or context, including SEND and alternative provision settings who are looking to upgrade their own classroom management or school behaviour plan. *When the Adults Change Everything Changes* was a silver winner 2017 Foreword INDIES Awards in the Education category.
